Security Description:

The goal of this section is to provide a clear understanding of the material rights and privileges of the securities issued by the company. Please provide the below information for each class of the company's equity securities, as applicable:

1. **For common equity, describe any dividend, voting and preemption rights.**

Dividends- there has been no dividends declared for the common shares
Voting rights- common shareholders are granted one vote per share

Preemption rights - None

2. **For preferred stock, describe the dividend, voting, conversion, and liquidation rights as well as redemption or sinking fund provisions.**

Series A Convertible Preferred Stock

During the year ended December 31, 2021, the Company issued a Private Placement Memorandum (PPM) for the offering of up to 60,000,000 shares of Series A Convertible Preferred Stock at a purchase price of \$0.25 per share and with an offering period from November 2021 through February 2022. Dividends on the shares are in preference to any dividends on common stock at a rate of 10% per annum (5% in cash and 5% in common stock), compounded and paid quarterly when and if declared by the Company's Board of Directors. Each share is initially convertible, at the holder's option, on a one-for-one basis into the Company's common stock. The shares are convertible at the Company's option upon meeting specified market conditions. The shares are also redeemable at the option of the Company at 120% of the original purchase price between years one and two, at 110% of the original purchase price between years two and three, or at 100% of the original purchase price after the third year. In all cases of redemption, accrued and unpaid dividends must also be paid. There are no sinking fund provisions.

3. **Describe any other material rights of common or preferred stockholders.**

4) Issuer’s Business, Products and Services

The purpose of this section is to provide a clear description of the issuer’s current operations. In answering this item, please include the following:

A. Summarize the issuer’s business operations (If the issuer does not have current operations, state “no operations”)

Company Description

Empire Diversified Energy, Inc. (“Empire” or the “Company”) was incorporated in the state of Delaware in 1986 as Panther Mountain Water Park. In December 2014, the Company changed its name to Empire Diversified Energy, Inc. Empire Diversified Energy Inc. is a diversified energy and logistics company.

Empire Diversified Energy, Inc Overview

Empire Diversified Energy, Inc. (“The Company”, “EDE” or “Empire”) is a multi-faceted energy and logistics company, geographically situated in the heart of the energy and raw material nexus of WV/PA/OH/KY, with barge, rail and trucking capabilities on its properties on the Ohio River. EDE can provide a vast array of energy services and sources to energy buyers and sellers. Empire has continued the implementation of the vertically integrated plan to expand its operations by developing and investing in its existing relationships and business partnerships.

EDE is currently in the development stage and continues to execute its vision to use its rail and dock assets at the Port of West Virginia as the cornerstone for the buildout of a world-class Riverfront Industrial Park that houses environmentally sustainable businesses which are supported by Company-owned multi-model logistics services. To date, EDE has purchased property and terminal assets on the Ohio River to support the Company’s growth plan. EDE’s business model is geared to the deployment of commercially proven, green technologies to recycle and recover the resources in waste byproducts generated by the largest and most difficult-to-decarbonize sectors of the global energy system: the transportation fuel and industrial fuels sector (renewable hydrogen production via anaerobic digestion), waste management / environmental services (renewable gas production through the recycling of waste plastics), and the steel industry (the manufacture of pig iron by recovering the iron

in steel waste). Each of these businesses are a subsidiary in EDE’s portfolio and, once constructed, will enjoy synergistic benefits that reduce operating costs and expand profit margins.

The EDE portfolio is diversified in products and services, which are allocated into seven (7) business segments: Empire Go-Green, LLC, Empire Green Generation, LLC, Empire Ironworks, LLC, Petro Empire Liquids and Storage, LLC, Empire Trimodal Terminal, LLC, Empire River Rail, LLC and Empire South Terminal of West Virginia, LLC. Each of the businesses are co-located on EDE owned property and within the eco-industrial park under development thus enjoy advantaged access to rail and dock infrastructure at the Port of West Virginia and a positive business climate for industrial businesses. EDE’s strategy is to bring together symbiotic businesses in the renewable and waste-to-energy sectors alongside the ESG megatrends shaping the economy and government initiatives geared to move towards a sustainable future.

Empire Go-Green, LLC

Field Services / Feedstock Collection and Preprocessing

In December 2020, Empire Go-Green Recycling, LLC (“Go Green”, “Empire Go-Green”), a wholly owned subsidiary of Empire purchased the business assets and certain liabilities of Go Green American Recycling LLC in exchange for 23,000,000 shares of Empire stock. The acquired business is engaged in the business of manufacturing, storing, handling, or recycling petrochemicals, fuels, or metals. To date, Empire Go-Green has been supported by short term loans that funded the purchase of land and established a recycling facility for steel byproducts, such as steel slag.

Empire Go-Green provides industrial waste services for the steel industry. The Company specializes in the collection and upgrade of steel byproducts from the production of steel, such as steel slag, for re-use in steel manufacturing. Since the Company’s inception in 2020, Go-Green has constructed a beneficiation facility that removes the non-ferrous material from

steel byproducts disposed by steel mills. Through a series of screeners and mechanical processing steps, Go-Green's operations are designed to concentrate and recover the iron contained in the byproducts for re-use as feedstock in steel manufacture.

Concurrent with the buildout of the eco-industrial park, the business model for Empire Go-Green will eventually pivot to include a field services and engineering support system for each of the EDE business segments.

Empire Trimodal Terminal, LLC

Marine and Rail Terminal

Empire Trimodal Terminal, LLC ("ETT", "Trimodal Terminal") is a wholly owned subsidiary of Empire Diversified Energy, LLC. In December 2020, ETT purchased property including land improvements and appurtenances, and personal property including government permits and approvals, tangible personal property and contractual rights collectively referred to as property from Trimodal Terminal, LP. for \$19,000,000. ETT was issued \$26 mm in tax-exempt municipal bonds through the West Virginia Economic Development Authority (WVEDA) to acquire additional property and renovate the rail and dock infrastructure at the Port of West Virginia ("the Port") in Follansbee, WV. The bonds provided the capital needed to complete the renovation project. In February 2023, ETT was awarded \$4 mm in grant funding to further improve the logistics infrastructure and reposition the rail to Company owned property.

Located at the Port of West Virginia, Empire Trimodal Terminal oversees the rail and dock operations. The Company has recently completed a renovation of the terminal assets and plans to move the rail line onto property owned by the Company. The recently revitalized Trimodal Terminal assets are projected to drive increased EBITDA generation through its terminal services. This growth is expected to be compounded by the buildout of the eco-industrial park and the demand for logistics services.

Empire South Terminal of West Virginia, LLC

Marine Terminal

Empire South Terminal of West Virginia, LLC ("South Terminal") is a wholly owned subsidiary of Empire Diversified Energy, Inc. To date, approximately \$15 mm has been invested in South Terminal to acquire property, assets, build two new warehouses for storage of dry/bulk goods that can be received inbound, stored, and shipped outbound, and conduct the relevant engineering and environmental permitting work needed to expand The Port of West Virginia in Follansbee, Brooke County. The expansion will include the redevelopment of the existing tank farm at the former Koppers facility as well the redevelopment of the former Follansbee Steel site. These two project locations represent the current north and south boundaries of Empire's Riverfront Industrial Complex.

Future plans of the Company include construction of additional warehouses, including refrigerated warehouses, to accommodate customers of The Port of West Virginia.

Empire Green Generation, LLC

Plastics Recycling

Empire Green Generation, LLC is a wholly owned subsidiary of Empire Diversified, Energy, LLC. To date, the Company has obtained a bridge loan to fund the purchase and installation of an existing suite of recycling equipment, site work, and the purchase of a prefabricated building to house the equipment. The plant is designed to recycle 70 tons of plastic per day through a pyrolysis process that employs high heat in the absence of oxygen, an environmentally friendly process that is virtually

emission free. The revenues for the project will be in the form of tipping fees and the sale of electricity, chemicals, and byproducts generated by the recycling operations. The Green Generation recycling operations will use commercially proven equipment. The operating experience of the technology suppliers allowed the construction of a reliable financial model and progression of the project financing.

Empire Green Generation, LLC

Anaerobic Digestion and Hydrogen Production

Green Generation is also focused on the production of clean, low-carbon and carbon-negative hydrogen from biogas generated by organic waste sources including, but not limited to, landfills, wastewater treatment plants, dairy farms, and food waste. Biogas is produced naturally from these sources when organic matter is broken down through anaerobic digestion and is a mixture of approximately 60% methane, 40% carbon dioxide plus traces of other contaminant gases. The hydrogen produced is suitable for either injection into the natural gas grid or for direct use as fuel.

Green Generation partnered with Heartland Water, LLC to develop, build, own, and operate an anaerobic digester and biogas conversion facility to manufacture renewable hydrogen. Heartland Water, LLC will contribute approximately \$19.5 mm to the joint venture for the construction of the anaerobic digestion and biogas upgrading system. Empire Green Generation, LLC will hold a majority share of the business. Heartland Water will identify prospective feedstock suppliers and customers through its established industry connections as well as exclusively supply to the joint venture the anaerobic digestion and biogas upgrading equipment at normal margins. Additionally, Heartland will provide long-term operation and maintenance of the equipment under contract. The equity contribution by Heartland will be paid back through a revenue share agreement, which is currently under negotiation.

Green Generation's waste-to-energy project is ESG-centric and caters to a growing market. The anaerobic digestion and biogas upgrading market is estimated to grow, driven by increasing demand for Hydrogen caused primarily by a universal desire to combat climate change by reducing greenhouse gas emissions supported by government regulations and incentives for use of Hydrogen as a transportation fuel and to supplement fossil natural gas in the pipeline distribution network. Through its partnership with Heartland Water, a national leader in anaerobic digestion and biogas upgrading business, Green Generation expects to benefit from this trend.

Notes to Consolidated Financial Statements

NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS

Empire Diversified Energy, Inc. (“Empire” or the “Company”) was incorporated in the state of Delaware in 1986 as Panther Mountain Water Park. In December 2014, the Company changed its name to Empire Diversified Energy, Inc. Empire Diversified Energy Inc. is a diversified energy and logistics company.

In 2020, Empire Trimodal Terminal, LLC (“ETT”), a subsidiary of Empire Diversified Energy, Inc, purchased the real property including land improvements and appurtenances, and personal property including government permits and approvals, tangible personal property and contractual rights from Trimodal Terminal, LP.

The site includes a floating barge facility permitted by the U.S. Army Corps of Engineers. The expanded operation increase the quantity and type of materials that can be handled and stored, which appeal to a larger number of industrial customers. Future additional dock and wharf capacity will allow the Company to expand its material loading and capabilities as well as provide a staging area for up to 108 barges along the property’s 8,000 feet of Ohio River frontage. The site is readily accessed by rail, which is serviced by Norfolk Southern Railway. The facilities currently offer rail spurs available for transloading as well as extensive locations for materials storage, separation, and blending. The modernization and expansion of on-site oil storage infrastructure has begun. Additionally, the site includes a river-water pumping station capable of providing over five million gallons of non-potable water per day to high-volume applications such as gas well drilling & completion and other industrial uses.

In 2020, Empire Go-Green Recycling, LLC, a subsidiary of Empire Diversified Energy, Inc, purchased the business assets and certain liabilities of Go Green America Recycling, LLC (“EGG”). EGG is the operator and service provider at the terminal and provides service work to additional customers.

The operational headquarters of the Company are in Follansbee, WV, geographically located in the heart of the energy and raw material nexus of WV/PA/OH/KY, with barge and rail capabilities on the Ohio River, and a vast array of sources for energy buyers and sellers, with other critical materials available as well. In addition, Empire has developed a wide range of “green energy” products & solutions to industry problems, offering strategic and cost-effective logistics to address (1) LNG and Petrochemical Storage Hubs (2) Petrochemical Loading Facilities (3) Scrap Iron and Mineral Sales, (Slag, HBI, Coal, Water).

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PRESENTATION

Basis of Presentation and Principals of Consolidation

This summary of accounting policies for Empire Diversified Energy, Inc. is presented to assist in understanding the Company’s consolidated financial statements. The Company uses the accrual basis of accounting and accounting principles generally accepted in the United States of America (“US GAAP”) which have been consistently applied in the preparation of the consolidated financial statements. The consolidated financial statements represent the results of the Company and its wholly owned subsidiaries: Empire Minerals, Inc., Empire Minerals of Ohio, Inc, DTE Dickerson, LLC (a subsidiary of Empire Minerals of Ohio, Inc.), Empire Diversified Generation, Inc., Empire Trimodal Terminal, LLC, Empire Go-Green Recycling, LLC, Empire Green Generation, LLC, and Empire South Terminal of West Virginia, LLC. All significant intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates

Management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements. Actual results could differ from those estimates. Estimates are used when accounting for inventory, deferred tax assets and related valuation allowances, potential impairment losses of inventory, stock-based compensation and fair value calculations related to warrants,

common shares issued, committed to be issued, and the business combination. Estimates and assumptions are reviewed periodically, and the effects of the revisions are reflected in the period the change is determined.

Cash

For purposes of the statements of cash flows, the Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents to the extent the funds are not being held for investment purposes. The Company has deposits with financial institutions that maintain Federal Deposit Insurance Corporation “FDIC” deposit insurance up to \$250,000 per depositor. The portion of the deposits in excess of this limit represents a credit risk to the Company. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant risk.

Restricted Cash

The Company considers cash that is restricted legally or that is held as compensating balances for credit arrangements as restricted cash.

Customer Concentration

The Company has two customers that accounted \$303,373, or 41%, of sales for the quarter ended March 31, 2025. These customers accounted for \$127,506, or 23%, of the Company’s accounts receivable as of March 31, 2025. The Company had two customers that accounted for \$144,796, or 27%, of sales for the quarter ended March 31, 2024. One customer accounted for \$65,460, or 23%, of the Company’s accounts receivable as of March 31, 2024

Revenue Recognition

The Company follows Accounting Standards Codification (“ASC”) 606 for revenue recognition. The Company measures revenue based on a consideration specified in a contract with a customer and excludes any sales incentives and amounts collected on behalf of third parties. The Company recognizes revenue when it satisfies a performance obligation by transferring control over a product or service to a customer.

The Company has three revenue streams, which include service work, rental charges, and sales of materials. Service work is recognized over time, as the performance obligation is met with the customer. Rental charges revenue is recognized over time, as the performance obligation is met with the customer. Sales of materials are recognized when the customer receives the materials.

Consolidated Financial Statements (Unaudited)
For the Quarter Ended March 31, 2025

Accounts Receivable

Accounts receivable balances are established for amounts owed to the Company from its customers from the sales of services and products. The Company closely monitors the collectability of outstanding accounts receivable and provides an allowance for credit losses based on estimated collections of outstanding amounts. Receivables are generally uncollateralized customer obligations due under normal terms requiring payment generally within 30 days from the invoice date unless otherwise determined by specific contract terms. The Company's estimate of the allowance for credit losses for trade receivables is primarily determined based upon the length of time that the receivables are past due and management estimates of probable losses based upon an analysis of prior collection experience, specific account risks and economic conditions. The Company determined that there was no need for an allowance for credit losses as of March 31, 2025 or December 31, 2024.

Inventories

The Company's inventory consists of steel slag, and limestone and is carried at the lesser of cost or net realizable value. Total inventories were \$618,055 as of March 31, 2025 and \$787,329 at December 31, 2024.

Mineral Rights

We have determined that our mining rights meet the definition of mineral rights, as defined by accounting standards, and are tangible assets. As a result, our direct costs to acquire or lease mineral rights are initially capitalized as a mineral property. Mineral rights include costs associated with acquiring mining rights.

For mineral rights in which proven and probable reserves have not yet been established, we assess the carrying values for impairment at the end of each reporting period and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. If we establish proven and probable reserves for a mineral property and establish that the mineral property can be economically developed, mineral rights will be amortized over the estimated useful life of the property following the commencement of commercial production or expensed if it is determined that the mineral property has no future economic value or if the property is sold or abandoned.

The net carrying value of our mineral rights represents the cost at the time the mineral rights were acquired. Proven and probable reserves have not been established for mineral rights as of March 31, 2025, and December 31, 2024.

Property, Plant and Equipment

Property, plant, and equipment are stated at cost less accumulated depreciation and amortization. The Company provides for depreciation and amortization using the straight-line method over the estimated useful lives of the related assets. Maintenance and repair costs are expensed as they are incurred while renewals and improvements which extend the useful life of an asset are capitalized. At the time of retirement or disposal of property and equipment, the cost and related accumulated depreciation and amortization are removed from the accounts and any resulting gain or loss is reflected in the consolidated statements of operations.

The Company has varying types of equipment with a range of useful lives between 3 and 16 years, varying vehicles with a range of useful lives between 5 and 12 years, railroad track with a useful life of 15 years, and various improvements with a life of 15 years.

Intangible assets

Intangible assets acquired individually or with a group of other assets or in a business combination or developed internally are carried at cost less accumulated d accumulated impairment loss based on their estimated useful lives. Intangible assets are amortized, using the straight-line method, over the estimated useful lives of the intangible assets. Trademarks/names are being amortized over an estimated useful life of 20 years.

EMPIRE DIVERSIFIED ENERGY, INC.
Consolidated Financial Statements (Unaudited)
For the Quarter Ended March 31, 2025

Impairment

If facts and circumstances suggest that the carrying value of a long-lived asset or asset group may not be recoverable, the asset or asset group is reviewed for potential impairment. If this review indicates that the carrying amount of the asset will not be recoverable through projected undiscounted cash flows generated by the asset and its related asset group over its remaining life, then an impairment loss is recognized by reducing the carrying value of the asset to its fair value.

The Company reviews its long-lived assets, comprised of property, plant and equipment and amortized intangible assets (comprised solely of trademarks/names), for impairment whenever events or circumstances occur that indicate possible impairment. If events or changes in circumstances occur that indicate possible impairment, the impairment review is based on an undiscounted cash flow analysis at the lowest level at which cash flows of the long-lived assets are largely independent of other groups of assets and liabilities. If impairment is indicated, the estimated future cash flows are then discounted to determine the estimated fair value of the asset or asset group and an impairment charge is recorded for the difference between the carrying value and the estimated fair value. The Company recognized no impairment charges for long-lived assets during the three months ended March 31, 2025 or 2024.

Fair Value Measurements

The Company measures and reports fair value in accordance with ASC 820, “Fair Value Measurements and Disclosure” defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles and expands disclosures about fair value investments.

Fair value, as defined in ASC 820, is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of an asset should reflect its highest and best use by market participants, principal (or most advantageous) markets, and an in-use or an in-exchange valuation premise. The fair value of a liability should reflect the risk of nonperformance, which includes, among other things, the Company’s credit risk.

Valuation techniques are generally classified into three categories: the market approach; the income approach; and the cost approach. The selection and application of one or more of the techniques may require significant judgment and are primarily dependent upon the characteristics of the asset or liability, and the quality and availability of inputs. Valuation techniques used to measure fair value under ASC 820 must maximize the use of observable inputs and minimize the use of unobservable inputs. ASC 820 also provides fair value hierarchy for inputs and resulting measurement as follows:

Level 1: Quoted prices (unadjusted) in active markets that are accessible at the measurement date for identical assets or liabilities.

Level 2: Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities; and

Level 3: Unobservable inputs for the asset or liability that are supported by little or no market activity, and that are significant to the fair values.

Fair value measurements are required to be disclosed by the Level within the fair value hierarchy in which the fair value measurements in their entirety fall.

The warrant liability falls under the Level 2 hierarchy, as the Company determined the fair value using a Black – Scholes model. The Black – Scholes model variables include market prices of stock transactions, similar company stock pricing information, and volatility based on similar companies in the market, which are Level 2.

Consolidated Financial Statements (Unaudited)
For the Quarter Ended March 31, 2025

As disclosed in Note 8, the Company has warrant liabilities presented on the balance sheet at fair value in accordance with ASC 815 and has a recorded balance of \$119,463 as of March 31, 2025 and December 31, 2024.

Derivative Financial Instruments

Fair value accounting requires bifurcation of embedded derivative instruments such as conversion features in convertible debt or equity instruments and measurement of their fair value for accounting purposes. In assessing the convertible debt instruments, management determines if the convertible debt host instrument is conventional convertible debt and further if there is a beneficial conversion feature requiring measurement. If the instrument is not considered conventional convertible debt under ASC 470, the Company will continue its evaluation process of these instruments as derivative financial instruments under ASC 815.

Once determined, derivative liabilities are adjusted to reflect fair value at each reporting period end, with any increase or decrease in the fair value being recorded in results of operations as an adjustment to fair value of derivatives.

Income Taxes

Income taxes are accounted for under the assets and liability method which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. Use of net operating loss carry forwards for income tax purposes may be limited by Internal Revenue Code section 382 if a change of ownership occurs.

The Company recognizes deferred tax assets to the extent that we believe these assets are more likely than not to be realized. In evaluating our ability to recover our deferred tax assets within the jurisdiction from which they arise, we consider all available positive and negative evidence, including projected future taxable income, scheduled reversals of our deferred tax liabilities, tax planning strategies, and results of recent operations. Our projections of future taxable income are subject to change due to economic, political, and other conditions, and significant judgment is required in determining our ability to use our deferred tax assets.

The Company records uncertain tax positions in accordance with ASC 740 on the basis of a two-step process whereby (1) we determine whether it is more likely than not that the tax positions will be sustained on the basis of the technical merits of the position and (2) for those tax positions that meet the more-likely-than-not recognition threshold, we recognize the largest amount of tax benefit that is more than 50 percent likely to be realized upon ultimate settlement with the related tax authority. We recognize interest and penalties related to unrecognized tax benefits within the income tax expense line in the accompanying consolidated income statements. Accrued interest and penalties are included within the related tax liability line in our consolidated balance sheets.

Net Income (Loss) Per Common Share

Net income (loss) per common share is calculated by dividing the Company's net income (loss) applicable to common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated by dividing the Company's net income available to common shareholders by the diluted weighted average number of shares outstanding during the year.

Stock-Based Compensation

The Company accounts for stock-based compensation to employees and directors in accordance with ASC 718, *Compensation – Stock Compensation*. The Company recognizes compensation cost for all share-based awards granted. For awards with graded vesting, compensation cost is recognized on a straight-line basis over the related vesting

period. Forfeitures are recognized as incurred. Stock-based compensation expense totaled \$0 and \$179,966 for the quarters ended March 31, 2025 and 2024, respectively.

Pursuant to ASC 505, the guidelines for recording stock issued for services require the fair value of the shares granted be based on the fair value of the services received or the publicly traded share price of the Company's registered shares on the date the shares were granted (irrespective of the fact that the shares granted were unregistered), whichever is more readily determinable. This position has been further clarified by the issuance of ASC 820. ASC 820 defines fair value as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date". Accordingly, the Company elected the application of these guidelines. The Company has determined that the fair value of all common stock issued for goods or services is more readily determinable based on the last per share price for issuances for cash on the date of grant.

Related Parties

The Company follows subtopic 850-10 of the FASB Accounting Standards Codification for the identification of related parties and disclosure of related party transactions.

Pursuant to Section 850-10-20 the related parties include (a) affiliates of the registrant; (b) entities for which investments in their equity securities would be required, absent the election of the fair value option under the Fair Value Option Subsection of Section 825-10-15, to be accounted for by the equity method by the investing entity; (c) trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management; (d) principal owners of the Company; (e) management of the Company; (f) other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests; and (g) Other parties that can significantly influence the management or operating policies of the transacting parties or that have an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests

The financial statements include disclosures of material related party transactions, other than compensation arrangements, expense allowances, and other similar items in the ordinary course of business. However, disclosure of transactions that are eliminated in the preparation of financial statements is not required in those statements. The disclosures shall include: (a) the nature of the relationship(s) involved; (b) description of the transactions, including transactions to which no amounts or nominal amounts were ascribed, for each of the periods for which income statements are presented, and such other information deemed necessary to an understanding of the effects of the transactions on the financial statements; (c) the dollar amounts of transactions for each of the periods for which income statements are presented and the effects of any change in the method of establishing the terms from that used in the preceding period; and (d) amounts due from or to related parties as of the date of each balance sheet presented and, if not otherwise apparent, the terms and manner of settlement.

Treasury stock

Treasury stock purchases are accounted for under the cost method whereby the entire cost of the acquired stock is recorded as treasury stock.

Reclassifications

Certain reclassifications have been made to the prior year financial statements to conform to the current year presentation.

Recently Issued Accounting Pronouncements

In December 2023, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update ("ASU") 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures*, which addresses income tax

Consolidated Financial Statements (Unaudited)
For the Quarter Ended March 31, 2025

disclosure requirements, primarily around the disclosure of the rate reconciliation and income taxes paid. The ASU is effective for fiscal years beginning after December 15, 2024. The Company is currently evaluating the impact the adoption of the standard will have on the Company's consolidated financial statements.

NOTE 3 – GOING CONCERN

The Company's consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. The Company had net loss of \$2,633,891 for the three months ending March 31, 2025 and net cash provided by operations of \$761,072 for the three months ending March 31, 2025. The Company had a net loss of \$15,651,007 for the year ended December 31, 2024, and net cash used in operations of \$7,384,221 for the year then ended.

There can be no assurance the necessary debt or equity financing will be available or will be available on terms acceptable to the Company. Because these debt financing events are outside of the sole control of the Company, management believes that substantial doubt about the Company's ability to continue as a going concern exists. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Management plans to fund additional working capital requirements and acquisitions through additional debt and equity financing. Debt instruments may be convertible or non-convertible and will vary based on the Company's needs and financing options available at such times.

NOTE 4 – NOTES PAYABLE

The Company entered into a 20-year non-convertible note payable in December 2020 for \$26,000,000, maturing December 2040. NOTE 8 – STOCKHOLDERS’ EQUITY

The Company has a total of 1,500,000,000 shares of all classes of capital stock authorized, consisting of 1,000,000,000 shares of \$0.00001 par value common stock and 500,000,000 shares of \$0.00001 par value Preferred Stock.

The Company has never declared or paid any cash dividends on our common stock. The Company intends to retain any earnings for future growth and do not anticipate paying any cash dividends on our common stock in the foreseeable future. Any future determination to pay any dividends on our common stock will be at the discretion of our Board of Directors and will depend on our results of operations, financial conditions, contractual and legal restrictions and other factors the Board of Directors deems relevant.

Series A Convertible Preferred Stock

During the years ended December 31, 2022 and 2021, the Company issued 4,600,000 shares of Series A Convertible Preferred Stocks in a Private Placement Memorandum at a purchase price of \$0.25 per share. Dividends on the shares are in preference to any dividends on common stock at a rate of 10% per annum (5% in cash and 5% in common stock), compounded and paid quarterly when and if declared by the Company’s Board of Directors. Each share is initially convertible, at the holder’s option, on a one-for-one basis into the Company’s common stock. The shares are convertible at the Company’s option upon meeting specified market conditions. The shares are also redeemable at the option of the Company at 110% of the original purchase price between years two and three, or at 100% of the original purchase price after the third year. In all cases of redemption, accrued and unpaid dividends must also be paid.

For each Series A Convertible Preferred share purchased, the subscriber also received a warrant for the Company’s common stock exercisable at \$0.40 per share. The strike price of the warrants could be modified under certain situations requiring bifurcation of the warrant as a liability in accordance with ASC 815. As of March 31, 2025 and December 31, 2024, the Company had issued 4,600,000 warrants in connection with the PPM. The fair value of the warrants totaled \$0 at March 31, 2025 and December 31, 2024.

Equity Incentive Plan

The Company’s 2021 Equity Incentive Plan (“Equity Incentive Plan”) was approved by the Company’s Board of Directors and stockholders during the year ended December 31, 2021. The Equity Incentive Plan permits the granting of stock options with an exercise price equal to or greater than fair value of the Company’s common stock on the date of grant, and other awards including stock appreciation rights, restricted stock awards and other stock-based or performance-based awards. The maximum number of common shares that may be delivered as a result of the exercise of incentive stock options is 20,000,000 and no such awards may be granted after the tenth anniversary of the adoption of the Equity Incentive Plan.

The fair value of stock options is recorded as compensation expense on a straight-line basis over the vesting periods of the options and forfeitures are accounted for when they occur. Total compensation expense recognized during the quarters ended March 31, 2025 and 2024 totaled \$0 and \$13,300, respectively. No stock options or other awards were issued during the three months ended March 31, 2025 or 2024. NOTE 9 – COMMITMENTS AND CONTINGENCIES

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's consolidated financial statements. If the assessment indicates that a potential material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, and an estimate of the range of possible losses, if determinable and material, would be disclosed. The Company is a party to routine contract litigation and routine audits of state and local tax returns arising in the ordinary course of business. The outcome and impact of open matters, and related claims and investigations that may be brought in the future, are subject to many variables, and cannot be predicted. The Company records accruals for estimated losses relating to claims and lawsuits when available information indicates that a loss is probable and the amount of the loss, or range of loss, can be reasonably estimated. The Company expenses legal costs as they are incurred. The Company is not aware of any pending claims or assessments which may have a material adverse impact on its liquidity, financial position, results of operations or cash flows. The Company had no accruals for contingent liabilities as of March 31, 2025 and December 31, 2024.

NOTE 10 – LEASES

The Company accounts for leases in accordance with ASC 842, Leases, which requires the Company to recognize a right-of-use (ROU) asset and a lease liability at the lease commencement date for leases with a term longer than twelve months. The ROU asset represents the right to use the leased asset for the term of the lease. The lease liability represents the present value of the lease payments. The Company does not recognize ROU assets or lease liabilities for renewal periods unless it is determined that lease renewal is reasonably certain at inception or when a triggering event occurs. The Company recognizes its minimum rental expense on a straight-line basis based on the fixed components of a lease arrangement. Variable lease costs represent amounts that are not fixed in nature and are not tied to an index or rate and are recognized as incurred. The Company's variable lease costs are not material.

In determining our ROU assets and lease liabilities, we apply a discount rate to the minimum lease payments within each lease agreement. When we cannot readily determine the discount rate implicit in the lease agreement, we utilize our fully collateralized incremental borrowing rate. To estimate our specific incremental borrowing rates we consider, among other factors, interest rates on our existing credit facilities and the term of the leases.

NOTE 11 – INCOME TAXES

The current and historical tax rate has been 0% due to the full valuation of the Company's deferred tax assets. In determining the need for a valuation allowance, the Company has considered both positive and negative evidence, the most significant of which is the Company's historical losses. This position is consistent with the December 31, 2024 annual financial statements.

NOTE 12 – SUBSEQUENT EVENTS

The Company evaluated events and transactions subsequent to March 31, 2025, through May 15, 2025, the date the consolidated financial statements were available to be issued.

The Company entered into an Option Agreement in the fourth quarter 2024 for the sale of approximately 412 acres of Company property for the purchase price of seventeen million dollars (\$17,000,000) and an access license for three million dollars (\$3,000,000). In 2024, the Company received \$600,000 related to the Option Agreement; the option fee and option extension which is reflected in the accompanying Consolidated Statement of Operations under other income. The initial option period was extended to February 2025 where the Company received \$225,000 during the quarter ended March 31, 2025 and reflected in other income. The Company received an additional two hundred twenty-five thousand dollars (\$225,000) after March 31, 2025, to further extend the option period to June 2025.
