The Company is a development stage enterprise devoting substantial efforts to establishing a new business, financial planning, raising capital, and research into products which may become part of the Company's product portfolio. The Company has not realized significant sales through since inception. A development stage company is defined as one in which all efforts are devoted substantially to establishing a new business and, even if planned principal operations have commenced, revenues are insignificant.

The accompanying financial statements have been prepared assuming the continuation of the Company as a going concern. The Company has not yet established an ongoing source of revenues sufficient to cover its operating costs and is dependent on debt and equity financing to fund its operations. Management of the Company is making efforts to raise additional funding until a registration statement relating to an equity funding facility is in effect. While management of the Company believes that it will be successful in its capital formation and planned operating activities, there can be no assurance that the Company will be able to raise additional equity capital, or be successful in the development and commercialization of the products it develops or initiates collaboration agreements thereon. The accompanying financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the possible inability of the Company to continue as a going concern.

Note 2 – Summary of significant accounting policies

Cash and Cash Equivalents

For purposes of reporting within the statements of cash flows, the Company considers all cash on hand, cash accounts not subject to withdrawal restrictions or penalties, and all highly liquid debt instruments purchased with a maturity of three months or less to be cash and cash equivalents.

Income Taxes

The Company accounts for income taxes pursuant to FASB ASC Topic 740, *Income Taxes*. Under FASB ASC Topic 740, deferred tax assets and liabilities are determined based on temporary differences between the bases of certain assets and liabilities for income tax and financial reporting purposes. The deferred tax assets and liabilities are classified according to the financial statement classification of the assets and liabilities generating the differences.

The Company maintains a valuation allowance with respect to deferred tax assets. The Company establishes a valuation allowance based upon the potential likelihood of realizing the deferred tax asset and taking into consideration the Company's financial position and results of operations for the current period. Future realization

of the deferred tax benefit depends on the existence of sufficient taxable income within the carry-forward period under the Federal tax laws.

Changes in circumstances, such as the Company generating taxable income, could cause a change in judgment about the reliability of the related deferred tax asset. Any change in the valuation allowance will be included in income in the year of the change in estimate.

Employee Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with ASC 718 Compensation - Stock Compensation ("ASC 718"). ASC 718 addresses all forms of share-based payment ("SBP") awards including shares issued under employee stock purchase plans and stock incentive shares. Under ASC 718 awards result in a cost that is measured at fair value on the awards' grant date, based on the estimated number of awards that are expected to vest and will result in a charge to operations.

Estimates

The financial statements are prepared on the basis of accounting principles generally accepted in the United States of America. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of June 30, 2025 and June 30, 2024, and expenses for the quarters ended June 30, 2025 and June 30, 2024, and cumulative from inception. Actual results could differ from those estimates made by management.

Subsequent Event

The Company evaluated subsequent events through the date when financial statements are issued for disclosure consideration.

Recent Accounting Pronouncements

In February 2016, the FASB issued an accounting standards update for leases. The ASU introduces a lessee model that brings most leases on the balance sheet. The new standard also aligns many of the underlying principles of the new lessor model with those in the current accounting guidance as well as the FASB's new revenue recognition standard. However, the ASU eliminates the use of bright-line tests in determining lease classification as required in the current guidance. The ASU also requires additional qualitative disclosures along with specific quantitative disclosures to better enable users of financial statements to assess the amount, timing, and uncertainty of cash flows arising from leases.
