Interim Report **2025**

CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

The maximum number of shares of the Company (the “**Shares**”) which may be issued pursuant to the Scheme is 18,000,000 Shares, representing 6% of the total number of Shares in issue as at the Adoption Date. Upon adoption of the Scheme or any other share option scheme by the Company, the maximum number of Shares which may be issued upon exercise of share options to be granted under the Scheme, the new and other existing share option schemes of the Company shall not exceed 10% of the total number of issued Shares. An offer shall have been accepted by an eligible person in respect of the Shares which are offered to such eligible person when the duplicate letter comprising acceptance of the offer duly signed by the eligible person together with a remittance in favour of the Company of HK\$1.00 by way of consideration for the grant thereof is received by the Company within such time as may be specified in the offer (which shall not be later than 10 days from the grant date). Such remittance shall in no circumstances be refundable.

Upon an offer being accepted by an eligible person, the share options to which the offer relates will be deemed to have been granted by the Company to such eligible person on the grant date. To the extent that the offer is not accepted within the time specified in the offer, it will be deemed to have been irrevocably declined.

The exercise price of the share options granted under the Scheme shall be the higher of (i) the closing price of the Shares as stated in the Stock Exchange’s daily quotations sheet on grant date, which must be a business day; and (ii) the average closing price of the Shares as stated in the Stock Exchange’s daily quotations sheets for the five business days immediately preceding the grant date.

Expected volatility (%)	44.186%

At the date of approval of these consolidated financial statements, the Company had 1,200,000 share options outstanding under the Scheme, which represented approximately 4% of the Company's Shares in issue as at that date.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Group is a wastewater and drinking water treatment engineering services provider in the PRC. The Group is principally engaged in the provision of engineering services for wastewater and drinking water treatment facilities. The Group acts either as the contractor, which is responsible for the whole project from launch to final operational management (the “**EPC Projects**”), or as the equipment contractor, which is responsible for providing technical advice and equipment procurement services for the project (the “**Equipment Projects**”). Since mid-2020, the Group started operating a sludge treatment service concession arrangement (the “**Service Concession Arrangement**”) in a wastewater treatment plant located in Guangzhou, the PRC. The Group is also engaged in other environmental protection projects, the provision of operating and maintenance services (the “**O&M Projects**”) for customers in connection with the management of wastewater treatment and drinking water treatment facilities, as well as consultation services in relation to the improvement of wastewater and drinking water treatment facilities of various constructions.

During the Period, the revenue of the Group increased by approximately RMB29,391,000, or 164.8% to approximately RMB47,223,000 as compared to the corresponding period in 2024. During the Period, the Group recognised approximately RMB28,242,000 in revenue from the EPC Projects, approximately RMB28,000 in revenue from the Equipment Project, approximately RMB10,157,000 in revenue from the Service Concession Arrangement and approximately RMB8,796,000 in revenue from others. In comparison, approximately RMB570,000 in revenue from the EPC Projects, approximately RMB144,000 in revenue from the construction project (the “**Construction Project**”), approximately RMB4,147,000 in revenue from the Equipment Projects, approximately RMB11,240,000 in revenue from the Service Concession Arrangement and approximately RMB1,731,000 in revenue from the O&M Projects were recognised in the corresponding period in 2024.

Profits attributable to owners of the Company for the Period amounted to approximately RMB1,996,000 which compared to loss attributable to owners of the Company of approximately RMB814,000 in the corresponding period in 2024. The increase in revenue and the change to profit attributable to owners of the Company is mainly attributable to the Group’s new projects in Vietnam has commenced at the end of 2024 and hence more revenue was recognised during the Period.

OUTLOOK

On the environmental protection business front, as previously mentioned, the Group has increased its investment in human resources and operations in Vietnam. Headquarters staff have also enhanced communication and interaction with the Vietnam branch, providing more support to it. In the first half of this year, the Group achieved relatively strong performance in Vietnam. As the focus of the environmental protection business increasingly shifts toward Vietnam, the Group believes that Vietnam will gradually become one of the key markets for the Group’s sustained development.

As for local customers, apart from continuing to handle service concession arrangement projects and other environmental protection projects as usual, the Group has been more prudent in handling new engineering, procurement and construction project business from local customers. Accordingly, the Group has been more selective in choosing clients, favoring large enterprises, and has signed new contracts this year. On the other hand, the Group has also allocated more resources to service concession arrangements and other environmental protection projects, which carry relatively lower cash flow risks compared to engineering, procurement and construction projects. Nevertheless, the Group continues to focus on the Greater Bay Area in China and will continue to monitor the operational status of our clients while maintaining communication with new clients. The Group believes that when the positive effects of economic recovery become more favorable, it will be able to deliver better and more robust performance in familiar markets (such as the Greater Bay Area) and with familiar customers.

Starting this year, the Group has also entered the property leasing market and successfully secured related projects in July 2025. Similar to the data business market the Group entered earlier, compared to the Group’s traditional core businesses, the property leasing market aligns more closely with the characteristics of a “consumer market”. Although the direct clients of property leasing may not necessarily be “individual consumers,” due to the nature of its operations, it is closely related to “individual consumers”, resulting in a broader market and clients with stronger payment capabilities. Furthermore, final consumption expenditure remains one of the primary drivers of GDP growth at the moment. Therefore, the Group believes that, under the principle of prudence, by prioritizing factors such as the geographical location and current operational status of property leasing projects, and leveraging the Group’s many years of experience in managing its own property rentals, revenue from property leasing can serve as an effective supplement to the revenue from the Group’s core business.

MANAGEMENT DISCUSSION AND ANALYSIS

In terms of the data business, the Group continued to record approximately RMB6.6 million in operating revenue in the first half of the year. Based on a series of preparations commenced last year, the data business is expected to see greater development in the second half of the year, which is anticipated to bring more performance contributions to the Group.

While the Group's traditional businesses continue to primarily serve traditional industries, in the context of China's economic recovery, the Group believes that the Group should adapt to the latest economic conditions in China, prioritize stability, and actively seek growth. Therefore, having achieved profitability in the first half of the year, the Group will maintain a cautious yet pragmatic approach. At the same time, the Group believes it should: (i) strengthen the development of the Group's traditional businesses in Vietnam; (ii) closely monitor economic trends in the Greater Bay Area, paying attention to both traditional and new businesses; and (iii) consider the data business and property leasing business as new growth points.

MANAGEMENT DISCUSSION AND ANALYSIS

CORPORATE GOVERNANCE PRACTICES

The Board is committed to maintaining good corporate governance standard, with the chairman being primarily responsible for establishing relevant practices and procedures. The Board believes that good corporate governance standard will provide a framework for the Group to formulate its business strategies and policies, and manage the associated risks through effective internal control procedures. It will also enhance the transparency of the Group and strengthen accountability to shareholders and creditors. Therefore the Board has reviewed and will continue to review and improve the Company's corporate governance practices from time to time.

The Company adopted the code provisions set out in the Corporate Governance Code (the “**CG Code**”) contained in Part 2 of Appendix 15 to the GEM Listing Rules as its own code of corporate governance. Save for code provision C.2.1 of the CG Code, that the roles of the chairman and chief executive officer of the Company should be separate and should not be performed by the same individual, the Board is satisfied that the Company had complied with the CG Code for the Period. Mr. Xie Yang (“**Mr. Xie**”) is chairman and the chief executive officer of the Company. With extensive experience in the wastewater and water treatment engineering services industry, Mr. Xie is responsible for the Group's overall strategic planning and management of its business. The Board considers that vesting the roles of chairman and chief executive officer in the same person is beneficial to the business prospects and management of the Group given Mr. Xie's expertise in wastewater and water treatment engineering and thus will allow Mr. Xie to provide strong and consistent leadership capabilities to the Group. Furthermore, the balance of power and authority is ensured by the operation of the senior management and the Board, which comprises experienced individuals, in overseeing different aspects of the Company's affairs and thereby provides adequate safeguards to ensure the balance of power and authority. The Board is comprised of five executive Directors (including Mr. Xie) and three independent non-executive Directors during the Period and therefore has sufficient independent elements in its composition.
