Security Description:

The goal of this section is to provide a clear understanding of the material rights and privileges of the securities issued by the company. Please provide the below information for each class of the company's equity securities, as applicable:

1. For common equity, describe any dividend, voting and preemption rights.

Dividends - The Holders of the shares of Series A Preferred Stock shall be entitled to receive, when and as declared by the Board, and out of any funds legally available therefor, quarterly dividends of \$.01 per share on the Series A Preferred Stock, if earned and declared, on March 31, 2004 and continuing quarterly thereafter on the last day of each succeeding June, September, December, and March of each year that any Series A Preferred Stock shall be outstanding. Such dividends on the Series A Preferred Stock shall accrue and such dividends be cumulative; but shall be prior to and in preference of any declaration or payment of dividends or other distributions of the Common Stock of the Corporation. Subject to Section 5 (c)(ii), the holders of shares of Series A Preferred Stock shall also be entitled to receive, before any cash dividends shall be paid or declared and set

aside for the Common Stock in such fiscal year, when and as declared by the Board and after payment in full of any declared but unpaid dividends to the Series A Preferred Stock in the amounts and in the priority set forth above, out of funds legally available for that purpose, additional dividends payable in an amount per share for such fiscal year equal to the per share amount, if any, of any cash dividend declared, paid or set aside for the Common Stock during such fiscal year, multiplied by the number of shares of Common Stock into which each such share of Series A Preferred Stock then convertible. Dividends for the Series A Preferred Stock declared by the Board but not paid shall accrue from date of declaration all such declared but unpaid dividends may be paid at the option of the Corporation in common stock valued at its fair market value as determined by the Board.

Voting – Except as otherwise expressly provided hereafter or as required by law, the holders of Series A Preferred Stock shall be entitled to vote on all matters. The Series A Preferred Stock shall each be entitled to the number of votes equal to the shares of Common Stock into which such holder's Series Preferred Stock could then be converted, pursuant to and as determined under Section 6 hereof, on the record date for the determination of shareholders entitled to vote on such matters or, if no record date is established, on the date such vote is taken or any written consent is solicited. Except as otherwise expressly provided herein or as required by law, Series A Preferred Stock, and Common Stock shall be voted together as a single class and not as a separate class.

2. For preferred stock, describe the dividend, voting, conversion, and liquidation rights as well as redemption or sinking fund provisions.

4) Issuer’s Business, Products and Services

The purpose of this section is to provide a clear description of the issuer’s current operations. Ensure that these descriptions are updated on the Company’s Profile on www.OTCMarkets.com.

A. Summarize the issuer’s business operations (If the issuer does not have current operations, state “no operations”)

The Issuer, Rouchon Industries, Inc. DBA Swiftech is in the business of engineering, manufacturing, and distributing thermal management products for the information technology industry.

(i) Industry background information

Following Moore’s law, the computer hardware industry has seen the number of transistors that can be placed on an integrated circuit double approximately every two years since 1965, and this trend is not expected to stop until 2015 or later. As a result, microprocessors such a central processing units, and graphics processing units have substantially increased in speed, computing power, and heat dissipation, ranging from a few watts in the late 90’s to several hundred watts in the recent months.

In addition to the increase in factory baseline thermal power of these microprocessors, technologies have also been developed since the late 90’s that allow end users to further increase the speed of the devices by themselves: a practice commonly called “overclocking”. Increasing the speed of the microprocessors also increases their heat dissipation requirements. These factors have been driving the demand for high end cooling solutions both at the industrial level, and at the consumer level.

(ii) Company background

Since its inception, Swiftech has produced cutting-edge performance cooling products for the IT industry, beginning

⁵ The total number of shares that can be issued upon full conversion of the Outstanding Balance. The number should not factor any “blockers” or limitations on the percentage of outstanding shares that can be owned by the Noteholder at a particular time. For purposes of this calculation, please use the current market pricing (e.g. most recent closing price, bid, etc.) of the security if conversion is based on a variable market rate.

with its first award winning product, the MC370 line of heatsinks early 2000. Swiftech is viewed by many industry experts as one of the founders of the liquid cooling industry for personal computers that started early 2000, and which is gradually becoming a main stream solution, for being used by Dell®, HP®, and many other personal computers manufacturers.

(iii) Business Operations

Administration, sales, engineering, research & development, warehousing, and some product assembly are conducted at the issuer's Corporate Headquarters in Anaheim, CA with a full-time staff of 15 employees.

B. List any subsidiaries, parent company, or affiliated companies.

Swiftech Technology (Shenzhen) Co., Ltd. - Xuyu Science Park, No.1, Xuyu Road, No. 210, Zhen'an West Road, Shangjiao, Chang'an Town, Dongguan City, Guangdong Province, China, 523878

C. Describe the issuers' principal products or services.

According to a [report published by Bcc research](#), the global market for thermal management technologies should grow from \$14.5 billion in 2021 to \$20.9 billion by 2026 with a compound annual growth rate (CAGR) of 7.6% for the period of 2021-2026.)

Swiftech's products and services range from design, manufacturing and distribution of heatsinks, thermal tools using thermoelectric technology, pumps, heat exchangers, waterblocks for CPU's, GPU's, chipsets, and complete liquid cooling systems sold in kits. Products are compatible with Intel® and AMD® central processing units, AMD® (formerly ATI®) and Nvidia® graphics processing units.

Applications for the products range from consumer level "do-it-yourself" (DIY) enthusiast home computer builders, system integration by commercial computer builders and component manufacturers, to industrial thermal tools for component manufacturers. In an average, approximately 20% of the issuer's products are intended for consumer related use, and the rest of the products are intended for industrial related use.

By virtue of being one of the first companies to market custom liquid cooling components and systems for personal computers in the late 90's, the issuer benefits from an exceptionally solid reputation among enthusiast do-it-yourself users, but such activity from a mass market stand-point has remained until relatively recently a low-volume hobby.

However, in the past few years, the PC industry has witnessed a considerable increase in the use of inexpensive all-in-one (AIO) closed-loop CPU liquid cooling systems by tier-one PC makers such as Dell, HP, and others. This is because they provided thermal characteristics on par with traditional heatsinks, but without placing as much weight on the circuit board thus reducing shipping damages.

Naturally, these solutions began trickling down into the DIY retail space with limited acceptance at first until more recently, where they finally succeeded in taking this market by storm by capitalizing on the high efficiency reputation of custom liquid cooling which are substantially more expensive (by a factor of 2 to 3), while offering novice builders inexpensive, plug-and-play, and maintenance free solutions.

When they first appeared, the performance level of these liquid cooling kits generally ranged from inferior to barely on par with high-end air cooling heatsinks used in the enthusiast market. However, high-end air-cooled solutions presented the disadvantage of considerable size and weight on the circuit board. Circa 2011 though, more robust AIO liquid cooled solutions began to appear and captured a substantial market share of the high-end air cooler market. But up until today, all these products have sacrificed upgradability in favor of zero-maintenance, and the true performance potential of liquid cooling in favor of price.

The current market for this type of products is estimated at 80 to 100,000 units per month worldwide, with an estimated 80% of them being used by tier-one PC makers, and the balance being sold in the after-market DIY sector.

They are manufactured under various OEM brands by 5 primary manufacturers: Cool-It, Asetek, AVC, Cooler Master, and PC cooler (Asia). MSRP price range varies between \$50 and \$200. The issuer entered the upper segment of this market in 2013, with its Drive X Series line of products, and has been issued US patents for its technology.

NOTES TO FINANCIAL STATEMENTS SEPTEMBER 30, 2025

NOTE 1 - NATURE OF OPERATIONS

Rouchon Industries, Inc. DBA: Swiftech (Company) was incorporated on January 25, 2001 in the State of California to develop, manufacture and sell thermal management products. The Company will offer a wide variety of advanced products for thermal dissipation and is working with leading hardware vendors to create custom products for future high-end systems.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of the significant accounting policies of the company is presented to assist in understanding the financial statements. The financial statements and notes are representations for the company's management who is responsible for their integrity and objectivity. These accounting policies conform to generally accepted accounting principles and have been consistently applied in the preparation of the financial statements.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all short-term securities purchased with a maturity of nine months or less when purchased to be cash equivalents.

Accounts Receivable

The Company establishes an allowance for doubtful accounts for uncollectible trade accounts receivable based on management's evaluation of the collectivity of outstanding accounts receivable. The allowance for bad debts was \$4,500 as of September 30, 2025.

Property and Equipment

Property and equipment are stated at cost. When items of property are sold or retired, the related costs are removed from the accounts and any gain or loss is included in income. Depreciation of property and equipment is provided using the straight-line method for financial reporting purposes at rates based on the following estimated useful lives:

<u>Assets</u>	<u>Years</u>
Transportation Equipment	3-5
Office Equipment	5-7
Leasehold Improvements	10-15

For Federal income tax purposes, depreciation is computed using the modified accelerated cost recovery system. Expenditures for major renewals and betterments that extend the useful lives of property and equipment are capitalized. Expenditures for maintenance and repairs are charged to expense as incurred.

NOTES TO FINANCIAL STATEMENTS SEPTEMBER 30, 2025

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Income Taxes

Deferred income taxes are reported using the liability method. Deferred tax assets are recognized for deductible temporary differences and operating loss carry forwards. Deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes related primarily to differences between the bases of certain assets and liabilities for financial and tax reporting as described in the preceding paragraph.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

NOTE 3 – LEASES

The Company leases office space and industrial space in Anaheim, California under a long-term lease expiring on August 31, 2028. Future commitments are as follows:

Year ended December 31,	
2025	\$ 40,640
2026	259,278
2027	271,594
2028	<u>186,707</u>
Total	<u>\$ 758,189</u>
