4) Issuer's Business, Products and Services

The purpose of this section is to provide a clear description of the issuer's current operations. Ensure that these descriptions are updated on the Company's Profile on www.OTCMarkets.com.

A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations")

BioEnergy Development Inc. (OTC: CNER) has created and will fund a subsidiary company that is a project developer and operator of distributed bioenergy microgrid projects that convert forestry and agricultural waste into clean, behind-the-meter power, biochar, and verified carbon removals.

The company's mission is to turn waste liabilities into renewable energy assets—helping landowners, processors, and industrial operators manage biomass waste while generating reliable, carbon-negative energy. BEDi focuses on modular, waste-to-energy infrastructure on-site and near-site installations that provide reliable baseload energy and carbon-negative outputs without requiring grid interconnection or regulated-utility status.

Each project uses the EXRGY™ Thermal Conversion BioReactor, a North American-engineered system owned by Bio Energy Solutions Inc. (BESi). Under an exclusive commercialization license, BEDi finances, builds, and operates project throughout North America through long-term site agreements.. BEDi holds an exclusive commercialization and deployment license for the technology and leads all project development, financing, and operations under a long-term strategic partnership with BESi.

Each EXRGY™ system processes local biomass—such as sawmill residues, field waste, forestry slash or manure—into high-value outputs: syngas for on-site power generation, biochar and biocarbon for soil and industrial markets, and certified carbon removals registered with Puro.earth (certifier) and Carbonfuture (brokers). Projects are containerized, factory-built, and commissioned in 3–6 months, allowing rapid replication across agricultural and forestry sites in the U.S. and Canada.

B. List any subsidiaries, parent company, or affiliated companies.

Syngas BioEnergy Inc., incorporated in the state of Wyoming on April 28, 2025 and is 75% owned by bioEnergy Development Inc. (formerly China New Energy Group Company) and 25% owned by Bio Energy Solutions Inc. a corporation in the Province of Alberta and the inventor and licensor of the bioreactor technology called XRGY.

bioEnergy Technologies Inc, (as a wholly owned subsidiary of Syngas bioEnergy Inc.) incorporated in the state of Wyoming.

C. Describe the issuers' principal products or services.

BioEnergy Development Inc. (OTC: CNER) has created and will fund a subsidiary company that develops, finances, and operates distributed bioenergy microgrid projects that convert agricultural and forestry residues into clean, behind-the-meter power, biochar, and verified carbon removals.

Each project is anchored by the EXRGY™ Thermal Conversion BioReactor, a modular, factory-built system that converts waste biomass into syngas, biochar, and biocarbon while permanently sequestering carbon. Projects are designed, owned, and operated by BEDi under long-term agreements with host sites such as Lumber Mills, wood products manufacturers, agricultural operators, and processors.

Host Partnership Model — Simple Solution

BEDi provides an end-to-end service that requires no capital investment from the host. The company installs, owns, and operates the equipment on-site, managing waste and delivering energy under long-term performance agreements (PPA).

Host Benefits

- Solves waste problems by eliminating open burning, hauling, or landfill disposal.
- Delivers clean, reliable energy directly to the site for heat or power at pre-negotiated rates
- No CapEx or operational burden—BEDi funds, maintains, and monitors the system.
- Long-term certainty through 10- to 20-year agreements with stable pricing and guaranteed performance.

This straightforward model gives the host measurable environmental gains and cost savings while securing BEDi long-term feedstock and energy offtake commitments.

Revenue Model — Diversified, Contracted Cash Flows

Each BEDi project generates multiple complementary revenue streams that together create resilient, infrastructure-grade returns:

Revenue Stream	Description	Contract Basis
Power / Thermal Energy (PPA)	Sale of syngas-derived electricity or heat to host operations	10–20 year Power Purchase Agreements
Carbon Credits (CORCs)	Durable carbon removals verified by Puro.earth (certifier) and brokered via Carbonfuture (broker)	Multi-year registry-verified issuance
Biochar & Biocarbon Sales	Carbon-rich materials for soil improvement and industrial uses	Spot and offtake contracts
Soil Amendments / Bio-stimulants	By-products marketed into agricultural applications	Recurring sales
Investment Tax Credits (IRA §48)	Transferable clean-energy credits monetized post-commissioning	One-time or annual transfers
Technology Sales and Support	Turn-key EXRGY™ BioReactor sales to qualified operators, with commissioning, remote monitoring, and maintenance services	Unit sales + service agreements

Technology and Operational Advantages

The EXRGY™ BioReactor, engineered by Bio Energy Solutions Inc. (BESI), combines torrefaction and pyrolysis in a closed-loop process with the following advantages:

- High throughput: ≈ 2 tons of biomass / hour (~16 000 t per year).
- Feedstock flexibility: Handles forestry residues, crop waste, and manures with minimal preprocessing.
- Reliability: > 92 % uptime with automated PLC controls and remote monitoring.
- Digital MRV integration: Continuous data capture enables transparent carbon-accounting for Puro.earth and Carbonfuture.
- Rapid deployment: Factory-built modules installed and commissioned within 4–6 months.

These characteristics make BEDi projects bankable, certifiable, and rapidly scalable, aligning the company with the growing demand for measurable, verifiable carbon-removal infrastructure.

Financing and Operations

BEDi develops, finances, and operates projects through special-purpose subsidiaries (SPVs) or a fund using a two-tier capital model:

- Corporate Growth Equity (\$5–10 M): Funds platform expansion, licensing, acquisition and digital MRV systems.

- Non-recourse Project Financing: Combines equity, green debt, transferable tax credits, and forward carbon-credit sales.

Each installation remains behind the meter, providing on-site energy to industrial, agricultural, or forestry clients. BEDI does not own or operate public grids, set electricity rates, or engage in regulated-utility activities.

This integrated model transforms waste liabilities into reliable, carbon-negative energy assets—creating measurable climate impact, reducing wildfire and landfill risk, and delivering long-term, contracted returns for investors.

5) Issuer's Facilities

The goal of this section is to provide investors with a clear understanding of all assets, properties or facilities owned, used or leased by the issuer and the extent in which the facilities are utilized.

In responding to this item, please clearly describe the assets, properties or facilities of the issuer. Describe the location of office space, data centers, principal plants, and other property of the issuer and describe the condition of the properties. Specify if the assets, properties, or facilities are owned or leased and the terms of their leases. If the issuer does not have complete ownership or control of the property, describe the limitations on the ownership.

CNER and its subsidiary operates in Spokane WA with a management office. It is the intention that the subsidiary companies will acquire operations close to the biowaste for supporting the bioreactors located on the client sites.

6) All Officers, Directors, and Control Persons of the Company

Using the table below, please provide information, as of the period end date of this report, regarding all officers and directors of the company, or any person that performs a similar function, regardless of the number of shares they own.

In addition, list all individuals or entities controlling 5% or more of any class of the issuer's securities.

If any insiders listed are corporate shareholders or entities, provide the name and address of the person(s) beneficially owning or controlling such corporate shareholders, or the name and contact information (City, State) of an individual representing the corporation or entity. Include Company Insiders who own any outstanding units or shares of any class of any equity security of the issuer.

The goal of this section is to provide investors with a clear understanding of the identity of all the persons or entities that are involved in managing, controlling or advising the operations, business development and disclosure of the issuer, as well as the identity of any significant or beneficial owners.

Individual Name (First, Last) or Entity Name (Include names of control person(s) if a corporate entity)	Position/Company Affiliation (ex: CEO, 5% Control person)	City and State (Include Country if outside U.S.)	Number of Shares Owned (List common, preferred, warrants and options separately)	Class of Shares Owned	Percentage of Class of Shares Owned (undiluted)

CHINA NEW ENERGY GROUP COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION

China New Energy Group Company. (“CNER” or the “Company”) plans to work with leading research and development companies around the world to license enabling technology for the delivery of Biosafety as a Service (“BaaS”) to Points of Entry (Airports, Sporting Events, Schools, Business) and to develop a concierge service whereby testing can be ordered and performed on demand at the user’s home or place of business. CNER’s purpose is to protect people and places from pathogens such as bacteria, viruses, fungus, spores, mold and toxins. Additionally, CNER has shifted its focus to developing technologies for diabetes care and deploying these technologies with clinics they are acquiring or building.

China New Energy Group Company was originally incorporated in the state of Delaware and redomiciled in the state of Wyoming. On April 3, 2023, the corporate name China New Energy Group Company was changed to Thrive Global Biosafety Inc and then changed to Thrive Precision Health Inc. (“Thrive”) and then changed back to China New Energy Group Company.

As of June 30, 2025, the Company does not have any subsidiaries. The Company previously had four wholly-owned subsidiaries: Thrive Precision Health Innovations Inc. (formerly Thrive Testing and Biosafety Inc.), incorporated in the State of Wyoming, Thrive Precision Health Hawaii, Inc., incorporated in the state of Hawaii, Thrive Precision Health USA Inc., incorporated in the state of Wyoming, and Thrive Precision Health, Inc., incorporated in the state of Nevada (“TPHI-NV”).

On June 7, 2024, the Company formed TPHI-NV in anticipation of completing a spinoff of certain assets and liabilities of the Company. On June 7, 2024, TPHI-NV assumed the assets and liabilities of Thrive Precision Health, Inc. (“TPHI-FL”), a Florida corporation, previously owned by the Chief Executive Officer of the Company. TPHI-FL was dissolved on June 18, 2024.

On July 3, 2024, Thrive Precision Health Inc., a subsidiary of China New Energy Group Company issued a Promissory Note to a Lender with a principal amount of \$250,000, accruing interest at a rate of 6% annually. The Note matures on July 4, 2025, if not converted with a registered financing before such time.

On July 18, 2024, the Company, perfected its security on True Neuropathy and Wound Solutions Inc., (Borrower) against the secured promissory note executed May 31, 2024 and having advanced \$902,585.00 in loan funds for support of ongoing clinical operations of the Borrower. Repayment demand was made in accordance of the Secure Promissory Note and the Borrower defaulted on repayment.

On July 31, 2024, all clinical operations ceased, all staff were terminated, and all creditors notified of the liquidation. The Company will now process, acting as trustee, dissolve all operations of the Borrower. The Company fully impaired all the assets during 2024.

On September 27, 2024, China New Energy Group Company, made the decision to not pursue a spin off arrangement of the Thrive Precision Health subsidiaries due to cost and regulatory complexities relative to the value of these assets. All corporate actions were terminated.

On October 23, 2024 further amended on December 28, 2024, the Company entered into a Debt Assumption and Asset Transfer Agreement (the “DAAT Agreement”) with Thrive Health Inc., a privately held Wyoming corporation, pursuant to which the Company transferred ownership of its previously held four wholly owned subsidiaries. In addition, Thrive Health Inc. agreed to assume substantially all related liabilities, including certain convertible notes and accrued obligations. Accordingly, the Company has removed these liabilities from its consolidated balance sheet based on management’s belief that they have been economically transferred. See Note 3 for additional discussion.

1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION (CONTINUED)

On April 21, 2025, CNER executed a joint venture agreement to create a jointly owned subsidiary company. The parties to the agreement are China New Energy Group Company (OTC:CNER), Bio Energy Solutions Inc. (an Alberta corporation), Yellowbike Solutions Inc. (an Alberta corporation), and Lynden Holdings, LLC (a Nevada company).

On April 28, 2025, a new subsidiary company was formed under China New Energy Group Company called SynGas BioEnergy Corporation and was incorporated in the State of Wyoming. CNER owns 70%, Bio Energy Solutions Inc., owns 25% and Lynden Holding LLC owns 5% of the restricted common stock.

On May 6, 2025, the Company executed a name change in the State of Wyoming, changing its name to bioEnergy Development Inc., from China New Energy Group Company.

Liquidity Uncertainties. As of June 30, 2025 and December 31, 2024, the Company had no cash and cash equivalents. The Company's current cash and cash equivalents will not be sufficient to support its operating requirements for the next 12 months from this date.

The Company will need additional capital in order to generate revenues. Any additional equity financing, if available, may not be on favorable terms and would likely be significantly dilutive to the Company's current stockholders, and debt financing, if available, may involve restrictive covenants. The Company's ability to access capital when needed is not assured and, if not achieved on a timely basis, will likely have a materially adverse effect on our business, financial condition and results of operations.

Basis of Presentation. The accompanying unaudited condensed financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") for interim financial reporting. All significant intercompany transactions and balances have been eliminated in consolidation. In the opinion of management, the unaudited condensed financial statements included herein contain all adjustments necessary to present fairly the Company's financial position and the results of its operations and cash flows for the interim periods presented. Such adjustments are of a normal recurring nature. The results of operations for the three and six months ended June 30, 2025 may not be indicative of results for the full year. These unaudited condensed financial statements should be read in conjunction with the audited financial statements and the notes to those statements for the year ended December 31, 2024 included in the Annual Report.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. The Company's significant estimates used in these consolidated financial statements include, but are not limited to, revenue recognition and the determination of the economic useful life of depreciable property and equipment. Certain of the Company's estimates could be affected by external conditions, including those unique to the Company and general economic conditions. It is reasonably possible that these external factors could have an effect on the Company's estimates and could cause actual results to differ from those estimates.

Cash and Cash Equivalents. The Company considers all highly liquid, short-term investments with original maturities of three months or less when purchased to be cash equivalents.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Contingent Liabilities. The Company, from time to time, may be involved in certain legal proceedings. Based upon consultation with outside counsel handling its defense in these matters and the Company's analysis of potential outcomes, if the Company determines that a loss arising from such matters is probable and can be reasonably estimated, an estimate of the contingent liability is recorded in its consolidated financial statements. If only a range of estimated loss can be determined, an amount within the range that, based on estimates, assumptions and judgments, reflects the most likely outcome, is recorded as a contingent liability in the consolidated financial statements. In situations where none of the estimates within the estimated range is a better estimate of probable loss than any other amount, the Company records the low end of the range. Any such accrual would be charged to expense in the appropriate period. Litigation expenses for these types of contingencies are recognized in the period in which the litigation services were provided.

Earnings Per Share. The Company follows ASC 260 when reporting Earnings Per Share resulting in the presentation of basic and diluted earnings per share. Basic net (loss) income per common share is computed by dividing net (loss) income by the weighted average number of vested common shares outstanding during the period. Diluted net income per common share is computed by dividing net income by the weighted average number vested of common shares, plus the net impact of common shares (computed using the treasury stock method), if dilutive, resulting from the exercise of dilutive securities. In periods when losses are reported, the weighted-average number of common shares outstanding excludes common stock equivalents because their inclusion would be anti-dilutive.

Income Taxes. The Company accounts for income taxes under the provisions of the FASB ASC Topic 740 "Income Taxes" ("ASC Topic 740"). The Company recognizes deferred tax assets and liabilities for the expected future tax consequences of items that have been included or excluded in the consolidated financial statements or tax returns. Deferred tax assets and liabilities are determined on the basis of the difference between the tax basis of assets and liabilities and their respective financial reporting amounts ("temporary differences") at enacted tax rates in effect for the years in which the temporary differences are expected to reverse. The Company utilizes a recognition threshold and measurement process for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Management has evaluated and concluded that there were no material uncertain tax positions requiring recognition in the Company's unaudited consolidated financial statements as of June 30, 2025 and December 31, 2024. The Company does not expect any significant changes in its unrecognized tax benefits within twelve months of the reporting date. The Company's policy is to classify assessments, if any, for tax related interest as interest expense and penalties as general and administrative expenses in the consolidated statements of comprehensive income. The Company is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Fair Value Measurements. The Company measures the fair value of financial assets and liabilities based on the guidance of ASC 820 "Fair Value Measurements and Disclosures" ("ASC 820") which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements.

ASC 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 describes three levels of inputs that may be used to measure fair value:

- Level 1 — quoted prices in active markets for identical assets or liabilities
- Level 2 — quoted prices for similar assets and liabilities in active markets or inputs that are observable
- Level 3 — inputs that are unobservable (for example, cash flow modeling inputs based on assumptions)

The carrying amounts of the Company's financial instruments, such as cash, accounts receivable, accounts payable and other current liabilities approximate fair values due to the short-term nature of these instruments.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Concentration of Credit Risks. Financial instruments that potentially subject the Company to concentrations of credit risk are cash equivalents and accounts receivable. Cash and cash equivalents are invested in deposits with certain financial institutions and may, at times, exceed federally insured limits. The Company has not experienced any significant losses on its deposits of cash and cash equivalents. In regard to trade receivables, the Company performs ongoing evaluations of its customers' financial condition as well as general economic conditions and, generally, requires no collateral from its customers.

3. DIVESTITURES

On October 23, 2024, the Company entered into the DAAT Agreement with Thrive Health Inc., a privately held Wyoming corporation controlled by a former officer of the Company. Pursuant to the DAAT Agreement, the Company transferred 100% of its equity interest in the following subsidiaries to Thrive Health Inc.:

- Thrive Precision Health Inc., a Wyoming corporation
- Thrive Precision Health Hawaii, Inc., a Hawaii corporation
- Thrive Precision Health Innovations Inc., a Wyoming corporation
