Notes to Financial Statements**

Basis of Presentation

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of

America, (“GAAP”).

Principles of Consolidation

The consolidated financial statements include the accounts of AMFIL technologies INC and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and accompanying notes. Actual results could differ from those estimates.

Functional currency and foreign currency translation

Some of the Company’s subsidiaries functional currency is the Canadian dollar (“CAD”) while the Company’s reporting currency is the U.S. dollar.

All transactions initiated in Canadian dollars or Euros are translated into U.S. dollars in accordance with ASC 830, Foreign Currency Translation as follows:

- Monetary assets and liabilities at the rate of exchange in effect at the balance sheet date.
- Equity at historical rates.
- Revenue and expense items and cash flows at the average transactions rate of exchange during the period.

Adjustments arising from such translations are deferred until realization and are included as a separate component of stockholders’ deficit as a component of accumulated other comprehensive income or loss. Therefore, translation adjustments are not included in determining net loss but reported as other comprehensive loss.

For foreign currency transactions, the Company translates these amounts to the Company’s functional currency at the exchange rate effective on the invoice date. If the exchange rate changes between the time of purchase and the time actual payment is made, a foreign exchange transaction gain or loss results which is included in determining net income for the period.

Cash

The Company considers all highly liquid short-term investments purchased with an original maturity date of three months or less to be cash equivalents. At times, the Company’s bank balances may exceed federally insured limits. There was \$172,280 in cash equivalents as of Sept 30, 2025.

Accounts Receivable

Accounts receivables are recorded and carried at the original invoiced amount less an allowance for any potential uncollectible amounts. The Company makes estimates for the allowance for doubtful accounts based upon its assessment of various factors, including historical experience, the age of the accounts receivable balances, credit quality of our customers, current economic conditions, and other factors that may affect customers’ ability to pay. as of June 30, 2025, there was \$0 in allowance for doubtful accounts.

Inventories

Inventories are stated at lower of cost or net realizable value using the first-in, first-out method and are evaluated at least annually for impairment. Write-downs for potentially obsolete or excess inventory are made based on management's analysis of inventory levels, historical obsolescence and future sales forecasts. For the Year ended June 30 2025 no impairment charges were recorded.

Property and Equipment, net

Fixed assets are stated at cost less accumulated depreciation. Depreciation is calculated based on the straight-line method basis over their estimated useful lives, which range as follows: Office and furniture equipment 5 –15 years Computer equipment 3 –5 years Capitalized software –internal use 3 –5 years Leasehold improvements Shorter of lease term or useful life

Business Combinations

We include the results of operations of the businesses that we acquire as of the respective dates of acquisition. We allocate the fair value of the purchase price of our acquisitions to the tangible assets acquired, liabilities assumed, and intangible assets acquired, based on their estimated fair values. The excess of the fair value of purchase price over the fair values of these identifiable assets and liabilities is recorded as goodwill. In accordance with ASC 805, the Company accounts for acquisitions using the purchase method under which the acquisition purchase price is allocated to the assets acquired and liabilities assumed based upon their respective fair values. The Company utilizes management estimates and, in some instances, may retain the services of an independent third-party valuation firm to assist in determining the fair values of assets acquired, liabilities assumed and contingent consideration granted. Such estimates and valuations require the Company to make significant assumptions, including projections of future events and operating performance.

Convertible notes

Convertible notes with characteristics of both liabilities and equity are classified as either debt or equity based on the characteristics of their monetary value, with convertible notes classified as debt being measured at fair value, in accordance with ASC 480-10, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity.

Warrants

The Company accounts for warrants on capital stock based on guidelines provided in ASC 815, Derivatives and Hedging – Contracts in Entity's Own Equity, which provides guidance on contracts that are settled in the Company's own shares as either a liability or as an equity instrument depending on the warrant agreement. The Company uses the Black-Scholes or trinomial pricing models, depending on the applicable terms of the warrant agreement, to value the derivative warrant.
