4) Issuer's Business, Products and Services

The purpose of this section is to provide a clear description of the issuer's current operations. Ensure that these descriptions are updated on the Company's Profile on www.OTCMarkets.com.

A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations")

McRae Industries, Inc. engages in the following lines of business: manufacturing and selling of military combat boots, western and work boots.

⁶ The total number of shares that can be issued upon full conversion of the Outstanding Balance. The number should not factor any "blockers" or limitations on the percentage of outstanding shares that can be owned by the Noteholder at a particular time. For purposes of this calculation, please use the current market pricing (e.g. most recent closing price, bid, etc.) of the security if conversion is based on a variable market rate.

B. List any subsidiaries, parent company, or affiliated companies.

Refer to www.mcraeindustries.com for information regarding subsidiaries

C. Describe the issuers' principal products or services.

Military combat boots, western and work boots

5) Issuer's Facilities

The goal of this section is to provide investors with a clear understanding of all assets, properties or facilities owned, used or leased by the issuer and the extent in which the facilities are utilized.

In responding to this item, please clearly describe the assets, properties or facilities of the issuer. Describe the location of office space, data centers, principal plants, and other property of the issuer and describe the condition of the properties. Specify if the assets, properties, or facilities are owned or leased and the terms of their leases. If the issuer does not have complete ownership or control of the property, describe the limitations on the ownership.

This information is included in the notes to the financial statements in the 2025 Annual Report posted to the OTC website.

6) All Officers, Directors, and 5% Beneficial Owners of the Company

Using the table below, please provide information, as of the period end date of this report, regarding all officers and directors of the company, or any person that performs a similar function, regardless of the number of shares they own.

In addition, list all individuals or entities controlling 5% or more of any class of the issuer's securities.

If any insiders listed are corporate shareholders or entities, provide the name and address of the person(s) beneficially owning or controlling such corporate shareholders, or the name and contact information (City, State) of an individual representing the corporation or entity. Include Company Insiders who own any outstanding units or shares of any class of any equity security of the issuer.

The goal of this section is to provide investors with a clear understanding of the identity of all the persons or entities that are involved in managing, controlling or advising the operations, business development and disclosure of the issuer, as well as the identity of any significant or beneficial owners.

McRAE INDUSTRIES, INC.
REPORTS EARNINGS FOR THE SECOND QUARTER AND
FIRST SIX MONTHS OF FISCAL 2026

Mount Gilead, N.C. – March 17, 2026. **McRae Industries, Inc. (Pink: MCRAA and MCRAB)** reported consolidated net revenues for the second quarter of fiscal 2026 of \$27,948,000 as compared to \$27,548,000 for the second quarter of fiscal 2025. Net earnings for the second quarter of fiscal 2026 amounted to \$956,000, or \$0.42 per diluted Class A common share as compared to \$1,053,000, or \$0.47 per diluted Class A common share, for the second quarter of fiscal 2025.

Consolidated net revenues for the first six months of fiscal 2026 totaled \$59,151,000 as compared to \$56,250,000 for the first six months of fiscal 2025. Net earnings for the first six months of fiscal 2026 amounted to \$2,404,000, or \$1.07 per diluted Class A common share, as compared to net earnings of \$2,899,000, or \$1.28 per diluted Class A common share, for the first six months of fiscal 2025.

SECOND QUARTER FISCAL 2026 COMPARED TO SECOND QUARTER FISCAL 2025

Consolidated net revenues totaled \$27.9 million for the second quarter of fiscal 2026 as compared to \$27.5 million for the second quarter of fiscal 2025. Sales related to our western/lifestyle boot products for the second quarter of fiscal 2026 totaled \$21.4 million as compared to \$20.4 million for the second quarter of fiscal 2025. This increase in net revenues was attributed to the Dan Post and Dingo brands. Revenues from our work boot products decreased from \$7.5 million for the second quarter of fiscal 2025 to \$6.7 million for the second quarter of fiscal 2026. This was a result of decreased sales for all work boots, which includes our military boots.

Consolidated gross profit for the second quarter of fiscal 2026 amounted to approximately \$7.3 million, or 26.2%, as compared to \$7.1 million, or 25.9%, for the second quarter of fiscal 2025.

Consolidated selling, general and administrative expenses totaled approximately \$6.7 million for the second quarter of fiscal 2026 as compared to \$6.4 million for the second quarter of fiscal 2025. This increase resulted primarily from increased marketing expenses.

As a result of the above, the consolidated operating profit for both the second quarter of fiscal 2026 and fiscal 2025 amounted to approximately \$0.7 million.

FIRST SIX MONTHS FISCAL 2026 COMPARED TO FIRST SIX MONTHS FISCAL 2025

Consolidated net revenues for the first six months of fiscal 2026 totaled \$59.2 million as compared to \$56.3 million for the first six months of fiscal 2025. Our western and lifestyle product sales totaled \$44.0 million for the first six months of fiscal 2026 as compared to \$41.4 million for the first six months of fiscal 2025. This increase was a result of increased sales in the Dan Post and Dingo brands, offset by decreased sales in the Laredo and El Dorado brands. Net revenues from our work boot business slightly decreased from \$15.5 million for the first six months of fiscal 2025 to \$15.4 million for the first six months of fiscal 2026. There was a decrease in our Dan Post and Laredo work boot product lines, which was offset by an increase in our military boot sales.

Consolidated gross profit totaled \$15.3 million, or 25.8%, for the first six months of fiscal 2026 as compared to \$15.5 million, or 27.5%, for the first six months of fiscal 2025. As mentioned in our first quarter release, tariffs have significantly impacted our margins in this fiscal year. Based on current information, we expect

the tariff impact to decrease in the second half of the year. Alternatively, our military boot operation profitability may be negatively impacted in the third quarter due to the installation of new manufacturing equipment.

Consolidated selling, general and administrative expenses totaled approximately \$13.4 million for the first six months of fiscal 2026 as compared to \$12.9 million for the first six months of fiscal 2025. This increase resulted primarily from increased sales commissions and marketing expenses.

As a result of the above, the consolidated operating profit amounted to \$1.9 million for the first six months of fiscal 2026 as compared to \$2.6 million for the first six months of fiscal 2025.

Financial Condition and Liquidity

Our financial condition remained strong at January 31, 2026 as cash and cash equivalents totaled \$29.9 million as compared to \$31.6 million at August 2, 2025. Our working capital decreased from \$85.9 million at August 2, 2025 to \$81.6 million at January 31, 2026.

We currently have two lines of credit totaling \$6.75 million, all of which was fully available at January 31, 2026. One credit line totaling \$1.75 million (which is restricted to one hundred percent of the outstanding receivables due from the Government) expires in January 2027. Our \$5.0 million line of credit, which also expires in January 2027, is secured by the inventory and accounts receivable of our Dan Post Boot Company subsidiary.

For the first six months of fiscal 2026, operating activities provided approximately \$3.6 million of cash. Net earnings contributed approximately \$2.4 million of cash. Adjustments to reconcile net earnings to net cash used in operating activities totaled approximately \$1.2 million. These adjustments were driven significantly by decreased inventory and offset by increased prepaid expenses.

Net cash used in investing activities totaled approximately \$4.0 million, primarily due to the purchase and sale of securities.

Net cash used in financing activities totaled \$1.3 million, which was used primarily for dividend payments.

The Board of Directors of the Company has approved the repurchase of up to \$700,000 of shares of McRae A Common Stock or McRae B Common Stock. Repurchases of shares of common stock under the stock repurchase program will be made in the open market and in accordance with applicable securities laws. The stock repurchase program does not obligate the Company to acquire any particular amount of common stock, and it may be suspended or terminated at any time at the Company's discretion.

We believe that our current cash and cash equivalents, cash generated from operations, and available credit lines will be sufficient to meet our capital requirements for the remainder of fiscal 2026.

Forward-Looking Statements

This press release includes certain forward-looking statements. Important factors that could cause actual results or events to differ materially from those projected, estimated, assumed or anticipated in any such forward-looking statements include: the impact of higher tariff rates on our gross margins in future quarters; the effect of competitive products and pricing, risks unique to selling goods to the Government (including variation in the Government's requirements for our products and the Government's ability to terminate its contracts with vendors), changes in fashion cycles and trends in the western boot business, loss of key customers, acquisitions, supply interruptions, additional financing requirements, our expectations about future Government orders for military boots, loss of key management personnel, our ability to successfully develop new products and services, and the effect of general economic conditions in our markets.

McRAE INDUSTRIES, INC.
NOTES TO THE FINANCIAL STATEMENTS
(Unaudited)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business

McRae Industries, Inc., (the “Company”, which may be referred to as “we”, “us” or “our”), is a Delaware corporation organized in 1983 and is the successor to a North Carolina corporation organized in 1959. Our principal lines of business are manufacturing and selling military combat boots and importing and selling western and work boots.

Principles of Consolidation

The consolidated financial statements include the accounts of all of the Company’s wholly owned subsidiaries and other businesses over which we exercise significant control. All significant intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates

The timely preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company defines cash and cash equivalents as cash and short-term investments with original maturities of three months or less. The Company maintains cash balances with financial institutions, which are insured by the Federal Deposit Insurance Corporation (FDIC) up to \$250,000. Although the Company maintains balances that exceed the federally insured limit, the Company has not experienced any losses related to this balance and the Company believes credit risk to be minimal.

Accounts Receivable

Accounts receivable are stated at amounts expected to be collected from outstanding balances. Probable uncollectible accounts are reserved for by a charge to earnings and a credit to the allowance for doubtful accounts based on the assessment of the current status of individual accounts. Balances that are still outstanding after using reasonable collection efforts are written off through a charge to the allowance and a credit to accounts receivable. The Company performs on-going credit evaluations of its customers’ financial condition and establishes an allowance for losses on trade receivables based upon factors surrounding the credit risk of specific customers, historical trends, and other information.

Our western and work boot business records an allowance for sales returns which is calculated by applying historical return data to sales subject to potential returns.

Inventories

Inventories are stated at the lower of cost or market value using the last-in, first-out (LIFO) method for military boots and using the first-in, first-out (FIFO) method for all other inventories. We regularly review our FIFO basis inventory quantities on hand and record a provision for excess and obsolete inventory based primarily on our estimated forecast and demand requirements for the next twelve months. Actual demand and market conditions may be different from those projected by our management primarily as a result of fashion cycles and trends and the overall financial condition of competitors in the western and work boot business.

Investments

The Company measures all equity investments that do not result in consolidation and are not accounted for under the equity method at fair value with the change in fair value included in net income. We use quoted market prices to determine the fair value of equity securities with readily determinable fair values. For equity securities without readily determinable fair values, we have elected the measurement alternative under which we measure these investments at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer. Management assesses each of these investments on an individual basis.

Our investments in debt securities are carried at either amortized cost or fair value. Investments in debt securities that the Company has the positive intent and ability to hold to maturity are carried at amortized cost and classified as held-to-maturity. Investments in debt securities that are not classified as held-to-maturity are carried at fair value and classified as either trading or available-for-sale. Realized and unrealized gains and losses on trading debt securities as well as realized gains and losses on available-for-sale debt securities are included in net income. Unrealized gains and losses, net of tax, on available-for-sale debt securities are included in our consolidated balance sheet as a component of AOCI, except for the change in fair value attributable to the currency risk being hedged, if applicable, which is included in net income.

Long-Lived Assets and Other Intangibles

The Company reviews long-lived assets with estimable useful lives for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to undiscounted future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less cost to sell.

The Company tests identifiable intangible assets with an indefinite life for impairment annually. Furthermore, such assets are required to be tested for impairment on an interim basis if an event or circumstance indicates that it is more likely than not an impairment loss has been incurred. An impairment loss shall be recognized to the extent that the carrying amount of such assets exceeds its implied fair value. Impairment losses shall be recognized in operations. The Company's valuation methodology for assessing impairment requires management to make judgments and assumptions based on historical experience and projections of future operating performance. If these assumptions differ materially from future results, the Company may record impairment charges in the future. Based on its most recent analysis, the Company believes that no impairment exists as of August 2, 2025 and August 3, 2024, respectively.

Leases

In accordance with Accounting Standards Update (ASU) 2016-02, Leases (Topic 842), the Company determines if an arrangement contains a lease at inception based on whether there is an identified asset and whether the Company controls the use of the identified asset throughout the period of use. The Company classifies leases as either financing or operating. Right-of-use (ROU) assets are recognized at the lease commencement date and represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. Lease liabilities are recognized at the lease commencement date based on the present value of future lease payments over the remaining lease term. Present value of lease payments are discounted based upon the risk free rate.

The Company's operating lease ROU assets are measured based on the corresponding operating lease liability adjusted for (i) payments made to the lessor at or before the commencement date, (ii) initial direct costs incurred and (iii) lease incentives under the lease. Options to renew or terminate the lease are recognized as part of our ROU assets and lease liabilities when it is reasonably certain the options will be exercised. ROU assets are also assessed for impairments consistent with the long-lived asset guidance.

The Company does not allocate consideration between lease and non-lease components, such as operating costs, as the Company has elected to not separate lease and non-lease components for any leases within its existing classes of

assets. Operating lease expense for fixed lease payments is recognized on a straight-line basis over the lease term. Operating leases are presented separately as operating lease ROU assets and operating lease liabilities in the accompanying consolidated balance sheets.

Revenue Recognition

Revenue is recognized upon the transfer of control of promised products or services to customers in an amount that reflects the consideration the Company expects to receive in exchange for those products or services. Where a formal contract does not exist, the Company determined that customer purchase orders primarily represent contracts. The Company's contracts generally include promises to sell boots. Customers also have the ability to receive shipments directly from the Company's vendors. Revenue associated with the sales of the Company's products are recognized at a point in time, which occurs when control of a good promised in a contract is transferred to a customer. Control is obtained when the customer has the ability to direct the use of and obtain substantially all of the remaining benefits from that good, which generally occurs either on shipment or delivery based on the contractual terms.

Revenue is measured as the amount of consideration the Company expects to receive in exchange for the transfer of the promised products and services. The amount of consideration the Company expects to receive changes due to variable consideration is associated with allowances due to promotional programs, discounts, and rebates that we offer to customers. The amount of variable consideration which is included in the transaction price is only included in net sales to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur in a future period.

Costs of Goods Sold

Costs of goods sold consist of costs associated with procuring materials from suppliers. Sales discounts received from suppliers are recorded as a reduction of the cost of inventory.

Income Taxes

The Company accounts for income taxes under the asset and liability method. Federal and state income taxes are computed at current tax rates, less tax credits. Taxes are adjusted both for items that do not have tax consequences and for the cumulative effect of any changes in tax rates from those previously used to determine deferred tax assets or liabilities. Tax provisions include amounts that are currently payable, plus changes in deferred tax assets and liabilities that arise because of temporary differences between the time when items of income and expense are recognized for financial reporting and income tax purposes. A valuation allowance is recorded to reduce the carrying amounts of deferred tax assets unless it is more likely than not such assets will be realized.

The Company follows the applicable authoritative guidance related to accounting for uncertainty in income tax reporting. This guidance clarifies the accounting for uncertainty in income taxes recognized in the Company's financial statements. It also prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return.

The Company's policy is to recognize interest and penalties that would be assessed in relation to the settlement value of unrecognized tax benefits as a component of income tax expense. The Company has recognized no interest or penalties since the adoption of the accounting guidance related to accounting for uncertainty in income taxes.

The Company and its subsidiaries are subject to U.S. federal income tax as well as income tax in multiple state jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal or state income tax examinations for fiscal years ending before 2018. However, to the extent allowed by law, the tax authorities may have the right to examine prior periods where net operating losses were generated and carried forward, and make adjustments up to the amount of the net operating loss carry forward amount.

Earnings per Share

Under our Articles of Incorporation, we may pay dividends on our Class A Common Stock in excess of the dividends we pay on our Class B Common Stock. As a result, we have computed our earnings per share in compliance with the

applicable authoritative guidance. This guidance requires companies that have multiple classes of equity securities to use the “two class” or “if converted method” in computing earnings per share.

For our diluted earnings per share calculation, we use the if-converted method. This calculation assumes that all Class B Common Stock is converted into Class A Common Stock. As a result, there are no holders of Class B Common Stock to participate in undistributed earnings. Furthermore, for Class A shares, distributed earnings with respect to Class A and all undistributed earnings are used to calculate diluted earnings per share.

Earnings per share has been presented in accordance with the applicable guidance. We believe that the holders of Class A and Class B Common Stock have equal rights to the Company’s undistributed earnings, and that our calculation best expresses economic reality.

The Company had no common stock equivalents issued or outstanding for the three-year period ended August 2, 2025.

Advertising

The Company charges advertising costs when incurred as a component of selling, general and administrative expenses.

Shipping and Handling

The Company incurs shipping and handling costs when delivering products to customers. All amounts billed to a customer in a sales transaction related to shipping and handling are recognized as revenue for the goods provided. Shipping and handling costs are classified as part of operating expenses in the accompanying consolidated statement of operations.

Real Estate Held for Investment

Real estate held for investment is land recorded at cost plus the cost of any improvements. Land is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable.

2. PROPERTY AND EQUIPMENT

Property and equipment are recorded at cost. Depreciation for financial reporting purposes is provided using the straight-line method over the estimated useful lives of the assets. Estimated useful lives range from three years for computer equipment to thirty-one and one-half years for buildings. Expenditures for routine maintenance and repairs are charged to expense as incurred.

3. INVESTMENTS

Equity securities with readily determinable fair values are not assessed for impairment, since they are carried at fair value with the change included in net income. Debt securities classified as available-for-sale or held-to-maturity are reviewed each reporting period to determine whether a significant event or change in circumstances has occurred that may have an adverse effect on the fair value of each investment. When such events or changes occur, we evaluate the fair value compared to our cost basis in the investment. In the event the fair value of an investment declines below our cost basis, management is required to determine if the decline in fair value is other than temporary. If management determines the decline is other than temporary, an impairment charge is recorded.

4. NOTES PAYABLE AND LINES OF CREDIT

Lines of Credit

The Company has a \$5,000,000 revolving line of credit with a bank. The Company had no outstanding borrowings under this line of credit as of August 2, 2025 and August 3, 2024. This line of credit provides for interest on

outstanding balances to be paid monthly at the prime rate less 1.0%. This line of credit expires in January 2026 and is secured by the inventory and accounts receivable of the Company's western and work boot subsidiary.

The Company has an additional \$1,750,000 line of credit with a bank. This line is restricted to 100% of the outstanding accounts receivable due from the U.S. Government. There were no outstanding borrowings under this line of credit as of August 2, 2025 and August 3, 2024. The line of credit expires in January 2026 and provides for interest on outstanding balances to be paid monthly at the prime rate.

5. EMPLOYEE BENEFIT PLANS

The Company's employee benefit program consists of an employee stock ownership plan, a 401-K retirement plan, a cash bonus program, incentive awards, and other specified employee benefits as approved by the Board of Directors.

The employee stock ownership plan (ESOP) covers substantially all employees. Its principal investments include shares of Class A Common Stock and Class B Common Stock of the Company and collective funds consisting of short-term cash, fixed-income, and equity investments. There have been no contributions to the ESOP in fiscal years 2025, 2024 or 2023.

The Company has a 401-K retirement plan, which covers substantially all employees. Employees can contribute up to 25% of their annual salary to the plan. At its sole discretion, the Board of Directors determines the amount and timing of any Company matching contribution.

6. SHAREHOLDERS' EQUITY

Common Stock

The Company's Bylaws provide for seven directors, two of whom are elected by the holders of the Class A Common Stock voting as a separate class, and five of whom are elected by the holders of the Class B Common Stock voting as a separate class. On all other matters (except matters required by law or the Company's Certificate of Incorporation or Bylaws to be approved by a different vote), the holders of Class A Common Stock and Class B Common Stock vote together as a single class with each share of Class A Common Stock entitled to one-tenth vote and each share of Class B Common Stock entitled to one vote. Each share of Class B Common Stock can be converted to Class A Common Stock on a share for share basis. All dividends paid on Class B Common Stock must also be paid on Class A Common Stock in an equal amount.

The Company has adopted the McRae Industries, Inc. 1998 Incentive Equity Plan (the Plan). Under the Plan, 100,000 shares of the Company's Class A Common Stock are reserved for issuance to certain key employees of the Company. At August 2, 2025, there were 100,000 shares available for future grants under the Plan.

The common stock is currently quoted in the Pink Sheets and stockholders are able to trade their shares in the over-the-counter markets or private transactions.

7. FAIR VALUE OF FINANCIAL INSTRUMENTS

FASB ASC 820 "Fair Value Measurements and Disclosures" defines fair value as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date (that is, an exit price). The exit price is based on the amount that the holder of the asset or liability would receive or need to pay in an actual transaction (or in a hypothetical transaction if an actual transaction does not exist) at the measurement date. In some circumstances, the entry and exit price may be the same; however, they are conceptually different. The accounting standards also establish a three-level hierarchy that prioritizes the inputs used in fair value measurements. The hierarchy consists of three broad levels as follows:

Level 1 – Quoted market prices in active markets for identical assets or liabilities;

Level 2 – Observable inputs other than quoted prices within Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data; and

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. These include certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The fair values of the Company's available for sale securities are determined using quoted market prices in active markets for identical assets or liabilities, which are classified as Level 1 inputs.

8. LEASES

The Company is following the below practical expedients:

- Package of practical expedients which eliminates the need to reassess (1) whether any expired or existing contracts are or contain leases; (2) the lease classification for any expired or existing leases; and (3) the initial direct costs for any existing leases.
- The practical expedient whereby the lease and non-lease components will not be separated for all classes of assets.
- Not to recognize ROU assets and corresponding lease liabilities with a lease term of 12 months or less from the lease commencement date.
- Elected to use the risk-free rate as the discount rate in circumstances where the implicit lease rate is not determinable.

Short-term leases are leases having a term of twelve months or less. The Company recognizes short term leases on a straight-line basis and does not record a related lease asset or liability for such leases. Operating lease ROU assets consist of distribution centers and office facilities with terms of 3 to 7 years.
