Security Description:

The goal of this section is to provide a clear understanding of the material rights and privileges of the securities issued by the company. Please provide the below information for each class of the company's equity securities, as applicable:

1. For common equity, describe any dividend, voting and preemption rights.

The following summary description of the common stock of Allied Energy Corporation (“we”, “our” or “us”) is based on the provisions of our articles of incorporation as amended (“Articles of Incorporation”), as well as our bylaws (“Bylaws”), and the applicable provisions of the Nevada Revised Statutes (“Nevada Law”). This information is qualified entirely by reference to the applicable provisions of our Articles of Incorporation, Bylaws and Nevada Law. Our Articles of Incorporation and Bylaws have previously been filed as exhibits with the Securities and Exchange Commission or posted on OTC Markets.

Voting Rights

Holders of our common stock are entitled to one vote per share in the election of directors and on all other matters on which shareholders are entitled or permitted to vote. Holders of our common stock are not entitled to cumulative voting rights.

Dividend Rights

Subject to the terms of any then outstanding series of preferred stock, the holders of our common stock are entitled to dividends in the amounts and at times as may be declared by our board of directors out of funds legally available therefor.

Liquidation Rights

Upon liquidation or dissolution, holders of our common stock are entitled to share ratably in all net assets available, if any, for distribution to shareholders after we have paid, or provided for payment of, all of our debts and liabilities, and after payment of any liquidation preferences to holders of any then outstanding shares of preferred stock.

Other Matters

Holders of our common stock have no redemption, conversion or preemptive rights. There are no sinking fund provisions applicable to our common stock. The rights, preferences and privileges of the holders of our common stock are subject to the rights of the holders of shares of any series of outstanding preferred stock and preferred stock that we may issue in the future.

All of our outstanding shares of common stock are fully paid and non-assessable.

2. For preferred stock, describe the dividend, voting, conversion, and liquidation rights as well as redemption or sinking fund provisions.

The following is a summary description of the preferred stock of Allied Energy Corporation.

Preferred Stock

The Preferred Stock consists of 4,990,000 shares and have no voting rights until converted. The stock can be converted to Common shares on a basis of (1:100) where: One (1) Preferred Stock converts into One Hundred (100) Common Stock.

Series A Preferred Stock

On March 16, 2018, the Board of Directors designated a series of preferred stock titled Series A Preferred Stock consisting of 10,000 shares. There is currently no market for the shares of Series A Preferred Stock and they cannot be converted into shares of common stock of the Company. The shares have voting rights equal to seventy-five percent of the total voting stock of the Company. Each share of Series A Preferred Stock shall vote the percentage in its ratio to the number of shares of Series A Preferred Stock issued and outstanding at the time of any such vote. The Preferred Series A do not contain any rights to dividends; have no liquidation rights, redemption or sinking fund provisions; and are not to be amended without the holder's approval.

3. Describe any other material rights of common or preferred stockholders.

None.

4. Describe any material modifications to rights of holders of the company's securities that have occurred over the reporting period covered by this report.

None.

ITEM 3 ISSUANCE HISTORY

The goal of this section is to provide disclosure with respect to each event that resulted in any changes to the total shares outstanding of any class of the issuer's securities **in the past two completed fiscal years and any subsequent interim period.**

Disclosure under this item shall include, in chronological order, all offerings and issuances of securities, including debt convertible into equity securities, whether private or public, and all shares or any other

securities or options to acquire such securities issued for services. Using the tabular format below, please describe these events.

ITEM 4 ISSUER'S BUSINESS, PRODUCTS AND SERVICES

The purpose of this section is to provide a clear description of the issuer's current operations.

A. Summarize the issuer's business operations:

Allied Energy Corporation (the "Company") was originally incorporated in the State of Nevada on May 5, 1994 as Sterling Harvest, Ltd. In January 2006, the Company changed its name to Allied Energy Corporation its current name. The Company is currently engaged in exploration and development of oil and gas properties in the state of Texas and the world wide marketing and sales of Proprietary Brands of Organic fertilizers used by commercial producers of fruits, vegetables, nuts and grains.

B. List any subsidiaries, parent company, or affiliated companies.

None.

C. Describe the issuers' principal products or services.

Allied Energy Corp. is an energy development and production company acquiring oil & gas reserves in some of the most prolific hydrocarbon bearing regions of the United States. The Company specializes in the business of reworking & re-completing 'existing' oil & gas wells located in the thousands of mature oil & gas producing fields across the United States. The Company applies its knowledge, experience, and effective well-remediation technologies to achieve higher production volumes, longer well life, and more efficient recovery of the proven and available oil and gas reserves in the fields/projects in which it has acquired an ownership interest. The Company will utilize updated technologies such as hydraulic fracturing ("fracking"), drilling of lateral ("horizontal") legs in productive zones, and utilizing new cased hole electric logging to locate bypassed pays, all to enhance daily rates and oil & gas recoveries. By acquiring interests in a growing number of selected projects in various regions, Allied Energy Corp. is diversifying its exposure and effectively minimizing risk as it pursues corporate growth, top line & bottom-line revenues to the benefit of all stakeholders. There are proven, recoverable reserves contained in the many aging oil & gas fields that have been bypassed by companies moving away from these fields in search of deeper, more plentiful, but more costly reserves. The Company plans to concentrate on bypassed oil and gas as there is less competition and as mentioned above, the costs are considerably less. Additionally, the company will acquire interests in marginal wells that can be acquired at minimal cost, of which there are 420,000 wells in the U.S. Quoting Barry Russell, President of the Independent Petroleum Association of America ("IPAA") - "With approximately 20 percent of American oil production and 10 percent of American natural gas production coming from marginal wells, they are America's true strategic petroleum reserve."

RE: Summary of Estimated Reserves & Net Present Value, Effective July 1st, 2021 for the Allied Energy Corporation's **Green Lease** located in North Texas.

Mr. Monteith,

Submitted for your review please find an engineering and economic evaluation of oil and gas reserves for those certain properties operated by Allied Energy Corporation (**Green Lease**). The reserves shown in this report are estimates only and should not be construed as exact quantities. The estimated reserves shown herein represent net reserves attributable to the leasehold and royalty interests in the referenced certain properties as represented on July 1st, 2021.

The reserves may or may not be recovered; if they are recovered, the revenues therefrom and the costs related thereto could be more or less than the estimated amounts. Because of uncertainties of supply and demand, the sales rates, prices received for the reserves, and costs incurred in recovering such, reserves may vary from assumptions made while preparing this report. Also, estimates of reserves may increase or decrease as a result of future operations.

The revenues and present worth of future net revenues are not represented to be market value either for individual properties or on a total property basis. The estimation of fair market value for oil and gas properties requires additional analysis other than evaluating undiscounted and discounted future net revenues.

EXECUTIVE SUMMARY

The reserves determinations of such GREEN LEASE located in Baylor County, Texas U.S.A. account for the total net proved, probable and possible natural oil and gas hydrocarbon reserves as of July 1st, 2021. Based upon independent study of the property, the representations herein conform to the most conservative calculations and parameters using U.S. SEC requirements and regulations and definitions as of that date.

The data, technical processes and interpretations, lend that the overall procedures and methodologies utilized in preparing the estimates of the proved, probable and possible reserves, future production and discounted future net income as of July 1st, 2021 comply with current U.S. Soil and gas reserve estimation guidelines. Table I summarizes the NET reserves and future cumulative cash flow, both undiscounted and discounted (at 10%) prior to the effects of Federal Income Taxes:

RESERVE ESTIMATES

Proved oil and gas reserves are those quantities of oil and gas which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible from a given date forward. The proved reserves were estimated using deterministic methods. If deterministic methods are used, the U.S. SEC has defined reasonable certainty for proved reserves as a “high degree of confidence that the quantities will be recovered.”

The U.S. SEC states that “probable reserves are those additional reserves that are less certain to be recovered than proved reserves but which, together with proved reserves, are likely as not to be recovered.”

The U.S. SEC states that “possible reserves are those additional reserves that are less certain to be recovered than probable reserves and the total quantities ultimately recovered from a project have a low probability of exceeding proved plus probable plus possible reserves.” All quantities of reserves within the same reserve category must meet the U.S. SEC definitions as noted above.

Reserves and schedules of production included in this report are only estimates. The amount of available data, reservoir and geological complexity, reservoir drive mechanism, and mechanical aspects can have a material effect on the accuracy of these reserve estimates.

PRODUCT PRICES

The estimated reserves and future net income amounts presented are related to hydrocarbon prices. The reserve and income projections, as of July 1st, 2021, used the end of the day, 12 month trailing average price for oil (TTM \$46.26 oil) and costs associated with extraction of oil and gas known as of July 1st, 2021 for its calculations under US SEC requirements of economically recoverable oil and gas from the properties. The stated oil prices and discounts as well as, Lease Operating Expenses, etc. were held constant throughout the projected life of the properties. Lease and well operating costs used in this report are based on operating expense historical records.

ABANDONMENT COSTS

Cost estimates for future plugging and abandonment procedures associated with the subject properties have NOT been included in the provided economics. Expected, is for salvage values to equal required costs for plugging and abandonment. **During fiscal 2025, the Green Lease was plugged and abandoned.**

RE: Summary of Estimated Reserves & Net Present Value, Effective July 1st, 2021
for the Allied Energy Corporation's **Annie Gilmer Et Al Lease** located in North Texas.

Mr. Monteith,

Submitted for your review please find an engineering and economic evaluation of oil and gas reserves for those certain properties operated by Allied Energy Corporation (**Annie Gilmer ET AL Lease**). The reserves shown in this report are estimates only and should not be construed as exact quantities. The estimated reserves shown herein represent net reserves attributable to the leasehold and royalty interests in the referenced certain properties as represented on July 1st, 2021.

The reserves may or may not be recovered; if they are recovered, the revenues therefrom and the costs related thereto could be more or less than the estimated amounts. Because of uncertainties of supply and demand, the sales rates, prices received for the reserves, and costs incurred in recovering such, reserves may vary from assumptions made while preparing this report. Also, estimates of reserves may increase or decrease as a result of future operations.

The revenues and present worth of future net revenues are not represented to be market value either for individual properties or on a total property basis. The estimation of fair market value for oil and gas properties requires additional analysis other than evaluating undiscounted and discounted future net revenues.

Respectfully submitted,

Mark D. McBryde Petroleum

PRODUCT PRICES

The estimated reserves and future net income amounts presented are related to hydrocarbon prices. The reserve and income projections, as of July 1st, 2021, used the first day of each month, 12-month trailing average price for oil and gas (TTM \$46.26 BO, \$2.43 MMbtu), and costs associated with extraction of oil and gas known as of

July 1st, 2021 for its calculations under US SEC requirements of economically recoverable oil and gas from the properties. ABANDONMENT COSTS

Cost estimates for future plugging and abandonment procedures associated with the subject properties have NOT been included in the provided economics. Expected, is for salvage values to equal required costs for plugging and abandonment. **During fiscal 2025, 2 wells on the Anne Gilmer ET AL Lease was plugged and abandoned.**

PROMETHEUS LEASE

Allied Energy Corporation acquired the 325-acre Prometheus Lease in Garza County, Texas, in October 2021. The lease includes multiple wells, with Prometheus Well 1H being a primary focus. Originally drilled by Apache Corporation in 2014, Well 1H was completed with a 24-stage fracturing program and horizontal drilling to a total measured depth of 11,370 feet. Initial tests reported production of 335 barrels of oil per day and 298,000 cubic feet of natural gas per day.

In November 2021, Allied Energy initiated a three-phase plan to bring Well 1H back online. Phase one involved the installation of 7,000 feet of tubing, setting a blow-out preventer, and deploying a heavy downhole pump among other equipment. Subsequent phases aimed to complete the pump installation and conduct system tests to optimize production.

Regarding reserves and net present value (NPV), specific estimates are not publicly available. However, the initial production rates and the implementation of advanced recovery technologies suggest a potentially significant increase in production and reserves. Allied Energy's strategy focuses on enhancing production from existing wells using updated technologies like hydraulic fracturing and horizontal drilling to maximize recovery from proven reserves.

For detailed and current information on reserves and NPV, it would be advisable to consult Allied Energy Corporation's official communications or financial reports.

THIEL LEASE

Allied Energy Corporation's Thiel Lease, located near Brenham, Texas, represents a significant natural gas asset within the company's portfolio. Here's a summary of its estimated reserves and associated developments:

Historical Production and Reserves:

Initial Drilling and Production: The Thiel Well was drilled by Union Pacific Resources in 1996 as a dual lateral well. Upon completion, it reported an absolute open flow rate of 44 million cubic feet (MMcf) of natural gas per day. Over its first three years, the well produced approximately 3 billion cubic feet (Bcf) of natural gas.

Recent Operations: From 2009 to 2021, the Thiel Well was operated by Jenex Petroleum Corporation. Allied Energy Corp acquired the Thiel Lease and Well in 2022, aiming to expand its natural gas holdings.

Recent Developments:

Capacity Expansion: As of February 2025, Allied Energy is enhancing the Thiel site's operational capacity by installing two 1.25 megawatt (MW) generators. Plans include adding a third unit, aiming for a total capacity

of approximately 3.5 MW by the end of the third quarter of 2025. This expansion leverages Texas's competitive electricity rates, potentially enhancing profitability.

Net Present Value (NPV):

Specific figures regarding the Net Present Value (NPV) of the Thiel Lease are not publicly disclosed in the available sources. NPV calculations typically depend on factors such as current production rates, projected future cash flows, operational costs, and prevailing market conditions. For precise valuation metrics, consulting Allied Energy Corporation's official financial statements or investor relations materials is recommended.

In summary, the Thiel Lease has demonstrated substantial natural gas production historically, and ongoing developments suggest a strategic focus on maximizing its output and profitability.

Joint Development Agreement

On May 5, 2013, Allied Energy Corporation entered into a Joint Development Agreement and a World Wide Licensing Agreement with Natural Mining International, Inc., for the development, sale and distribution of organic fertilizers, currently marked under the name BBWG, Building a Better World Green and Organic Green Products. These fertilizer products are used in commercial agriculture for the production of organic fruits, vegetables, nuts and grains. Current high growth markets for the sale of these products include the United States, Canada, Mexico, Brazil and China. The Licensing Agreement is valued at \$1,000,000 USD with a life expectancy of 10 years. **The World Wide Licensing Agreement has expired and carries no value on our financial statements.**

ITEM 5 ISSUER'S FACILITIES

The goal of this section is to provide a potential investor with a clear understanding of all assets, properties or facilities owned, used or leased by the issuer and the extent in which the facilities are utilized.

In responding to this item, please clearly describe the assets, properties or facilities of the issuer, give the location of the principal plants and other property of the issuer and describe the condition of the properties. If the issuer does not have complete ownership or control of the property (for example, if others also own the property or if there is a mortgage on the property), describe the limitations on the ownership.

If the issuer leases any assets, properties or facilities, clearly describe them as above and the terms of their leases.

The Company rents a space located at: Offices are located at 1821 N Lake Forest Drive, Suite 700, Box 354 McKinney, TX 75071

ITEM 6 ALL OFFICERS, DIRECTORS AND CONTROL PERSONS OF THE COMPANY

Using the table below, please provide information, as of the period end date of this report, regarding all officers and directors of the company, or any person that performs a similar function, regardless of the number of shares they own.

In addition, list all individuals or entities controlling 5% or more of any class of the issuer's securities. If any insiders listed are corporate shareholders or entities, provide the name and address of the person(s) beneficially owning or controlling such corporate shareholders, or the name and contact information (City, State) of an individual representing the corporation or entity.

Include Company Insiders who own any outstanding units or shares of any class of any equity security of the issuer.

The goal of this section is to provide investors with a clear understanding of the identity of all the persons or entities that are involved in managing, controlling or advising the operations, business development and disclosure of the issuer, as well as the identity of any significant or beneficial shareholders.

ALLIED ENERGY CORPORATION
NOTES TO FINANCIAL STATEMENTS
March 31, 2026
(Unaudited)

NOTE 1 – ORGANIZATION AND OPERATIONS

Allied Energy Corporation (the “Company”) was originally incorporated in the State of Nevada on May 5, 1994 as Sterling Harvest, Ltd. In January 2006, the Company changed its name to Allied Energy Corporation its current name. The Company is currently engaged in exploration and development of oil and gas properties in the state of Texas and the world wide marketing and sales of Proprietary Brands of Organic fertilizers used by commercial producers of fruits, vegetables, nuts and grains.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting Principles

The Company’s accounting and reporting policies conform to generally accepted accounting principles in the United States.

Revenue Recognition

The Company will recognize revenue in accordance with ASC topic 606 “Revenue Recognition”. The Company recognizes revenue when products are fully delivered, or services have been provided and collection is reasonably assured. The Company generally recognizes revenue at the time of delivery of goods. Sales are reflected net of sales taxes, discounts and returns.

Cash and Cash Equivalents

Cash equivalents consist of highly liquid investments with maturities of three months or less when purchased. Cash and cash equivalents are on deposit with financial institutions without any restrictions. At March 31, 2026 and March 31, 2025, cash equivalents amounted to \$1,416 and \$4,493.

Fair Value of Financial Instruments

The Company’s financial instruments comprise cash, accounts receivable – related party, accounts payable and accrued liabilities, notes payable and advances. The carrying value of Company’s short-term instruments approximates fair value, unless otherwise noted, due to the short-term maturity of these instruments. In management’s opinion, the fair value of notes payable is approximate to carrying value as the interest rates and other features of these instruments approximate those obtainable for similar instruments in the current market. Unless otherwise noted, it is management’s opinion that the Company is not exposed to significant interest, currency or credit risks in respect of these financial instruments.

Property and Equipment

Property and equipment are stated at cost and depreciated or amortized using the straight-line method over the following estimated useful lives:

Property and Equipment	-	5 Years
------------------------	---	---------

Income Taxes

The Company follows FASB ASC Subtopic 740, Income Taxes, for recording the provision for income taxes. Deferred tax assets and liabilities are computed based upon the difference between the financial statement and income tax basis of assets and liabilities using the enacted marginal tax rate applicable when the related asset or liability is expected to be realized or settled.

Deferred income tax expenses or benefits are based on the changes in the asset or liability each period. If available evidence suggests that it is more likely than not that some portion or all of the deferred tax assets will not be realized, a valuation allowance is required to reduce the deferred tax assets to the amount that is more likely than not to be realized. Future changes in such valuation allowance are included in the provision for deferred income taxes in the period of change.

Stock-based Compensation

The Company accounts for stock-based compensation under the provisions of ASC 718 *Compensation- Stock Compensation*, which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors, including employee stock options, based on estimated fair values.

ASC 718 requires companies to estimate the fair value of share-based payment awards on the date of the grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as expenses over the requisite service periods in the Company's statements of income.

Basic Loss Per Share

FASB ASC Subtopic 260, Earnings Per Share, provides for the calculation of "Basic" and "Diluted" earnings per share. Basic earnings per share is computed by dividing net loss available to common shareholders by the weighted average number of common shares outstanding for the period. All potentially dilutive securities have been excluded from the computations since they would be anti-dilutive. However, these dilutive securities could potentially dilute earnings per share in the future.

NOTE 3 – GOING CONCERN

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates continuity of operations, realization of assets, and liquidation of liabilities in the normal course of business.

As reflected in the accompanying financial statements, the Company had an accumulated deficit of \$5,031,218 as of March 31, 2026 and its liabilities exceeded its assets. These factors among others raise substantial doubt about the Company's ability to continue as a going concern.

While the Company is attempting to commence operations and generate revenues, the Company's cash position may not be significant enough to support the Company's daily operations. Management intends to raise additional funds by way of a public or private offering. Management believes that the actions presently being taken to further implement its business plan and generate revenues provide the opportunity for the Company to continue as a going concern. While the Company believes in the viability of its strategy to generate revenues and in its ability to raise additional funds, there can be no assurances to that effect. The ability of the Company to continue as a going concern is dependent upon the Company's ability to further implement its business plan and generate revenues.

The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

NOTE 6 – INTANGIBLE ASSET

On May 5, 2013, Allied Energy Corporation entered into a Joint Development Agreement and a World Wide Licensing Agreement with Natural Mining International, Inc., for the development, sale and distribution of organic fertilizers, currently marked under the name BBWG, Building a Better World Green and Organic Green Products. These fertilizer products are used in commercial agriculture for the production of organic fruits, vegetables, nuts and grains. Current high growth markets for the sale of these products include the United States, Canada, Mexico, Brazil and China. The Licensing Agreement is valued at \$1,000,000 USD with a life expectancy of 10 years.

NOTE 7 – AMORTIZATION

World Wide Licensing Agreement with Natural Mining International was initially recognized at cost and are subsequently carried at cost less accumulated amortization and accumulated impairment losses. These costs are amortized to profit or loss using the straight-line method over 10 years, which is the shorter of their estimated useful lives and periods of contractual rights.

NOTE 8– OIL AND GAS PROPERTY

During the fiscal year ended 2025, the Company completed the plugging and abandonment of two oil and gas leases: the Green Lease and the Annie Gilmer et al. Lease. As a result of these activities, management performed a reassessment of the carrying value of its oil and gas properties.

Based on this evaluation, the Company determined that a reduction in the carrying value of oil and gas properties of \$1,000,000 was necessary to reflect the impairment associated with these abandoned assets. This impairment has been recognized in the accompanying financial statements for the year ended 2025.
