B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported and disclosed amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written, such reserves are computed by pro rata methods.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred.

Certain assets are non-admitted and charged directly against surplus. Such assets principally include premiums over 90 days past due, non-admissible taxes, and prepaid expenses.

In addition, the Company uses the following policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds are stated at amortized cost using the interest method.
- (3) Common stocks are stated at fair value with the exception of the investments in the wholly-owned subsidiaries as described in (7) below.
- (4) Preferred stocks are stated at fair value.
- (5) The Company does not hold investments in mortgage loans.
- (6) Asset-backed securities are stated at amortized cost. The retrospective adjustment method is used to value all securities except for interest only securities or securities where the yield had become negative, that are valued using the prospective method. Securities for which the Company does not expect to recover the entire amortized cost basis are stated at the present value of cash flows expected to be collected, discounted at the security's effective interest rate.
- (7) Common stock investments in First Acceptance Insurance Company of Georgia, Inc., a wholly owned Georgia-domiciled property and casualty insurer, and First Acceptance Insurance Company of Tennessee, Inc., a wholly owned Tennessee-domiciled property and casualty insurer, are carried at their underlying statutory capital and surplus.
Common stock in First Acceptance Services, Inc., a wholly owned claims adjustment services company, is carried at its underlying GAAP equity, adjusted for any assets which would be non-admitted if owned directly by the Company. The net carrying value of this investment was zero at both March 31, 2026 and December 31, 2025.
- (8) The Company does not hold investments in joint ventures, partnerships, or LLCs.
- (9) The Company does not hold investments in derivatives.
- (10) The Company does not anticipate investment income when evaluating the need for premium deficiency reserves.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount based on historical experience for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its predefined capitalization thresholds from those of the prior year.
- (13) The Company has no pharmaceutical rebate receivables.

- (1) For fixed-rate agency mortgage-backed securities, the Company uses investment software to calculate prepayment speeds utilizing Mortgage Industry Advisory Corporation (MIAC) Mortgage Industry Medians (MIMs). MIMs are derived from a semi-monthly dealer-consensus survey of long-term prepayment projections. For other mortgage-backed, loan-backed, and structured securities, company utilizes prepayment assumptions from Moody's Analytics. Moody's applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody's projections are not available, company's investment software uses data from Reuters, which utilizes the median prepayment speed from contributors' models.

Note 20 - Fair Value Measurements

A. Assets and Liabilities Measured at Fair Value

STATEMENT AS OF MARCH 31, 2026 OF THE First Acceptance Insurance Company, Inc.

(1) Fair Value Measurements at Reporting Date

SSAP 100R defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP 100R specifies a fair value hierarchy based on whether the inputs to valuation techniques used to measure fair value are observable or unobservable. The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels based on the reliability of the inputs. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The hierarchy, based on the reliability of inputs, is as follows:

Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities: This category, for items measured at fair value on a recurring basis, includes exchange-traded preferred and common stocks. It also includes derivative liabilities for written call options on common stock which are also exchange traded. The estimated fair value of the equity securities and derivatives within this category are based on quoted prices in active markets and are thus classified as Level 1.

Level 2 - Significant Other Observable Inputs: This category for items measured at fair value on a recurring basis includes bonds, preferred stocks and common stocks which are not exchange-traded. The estimated fair values of some of these items were determined from quotations received from third-party nationally recognized pricing services ("Pricing Service") using observable inputs. Others were based on quotes from markets which were not considered actively traded.

Level 3 - Significant Unobservable Inputs.

The availability of observable inputs can vary and is affected by a wide variety of factors, including, for example, the type of financial instrument, whether the financial instrument is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires significantly more judgment. Accordingly, the degree of judgment exercised by management in determining fair value is greatest for instruments categorized in Level 3 hierarchy. The Company uses prices and inputs that are current at the measurement date. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified between levels.

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
a. Assets at fair value

Because net asset value (NAV) is more readily available, the Company elected to use NAV for all its other investments.

(2) Fair Value Measurements in (Level 3) of the Fair Value Hierarchy

Description	Beginning Balance as of Prior Quarter End	Transfers into Level 3	Transfers out of Level 3	Total gains and (losses) included in Net Income	Total gains And (losses) Included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance for Current Quarter End
a. Assets:

Total Assets	1,989,259	0	0	0	0	0	0	0	0	1,989,259

(3) At the end of each reporting period, the Company evaluates whether or not any event has occurred, or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the year ended December 31, 2025, no asset was transferred into Level 3 and no asset was transferred out of financial instruments.

(4) U.S. government and U.S. agency bonds are based on quoted market prices in active markets and are included in the Level 1 fair value hierarchy. All other bonds are carried at fair value categorized as Level 2 and were valued using a market approach. These valuations were determined to be Level 2 valuations as quoted markets prices for similar instruments in an active market were utilized. Preferred stock and common stock are based on quoted market prices in active markets and are included in the Level 1 fair value hierarchy.
