**RODEDAWG INTERNATIONAL INDUSTRIES, INC.**  
**NOTES TO FINANCIAL STATEMENTS**  
**March 31 2026**

**NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS**

Rodedawg International Industries, Inc. was a company focusing on the worldwide distribution of recreational, amphibious and off road vehicles. In September 2025 the company sold its controlling interest and intends to focus on a new line of business.

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

*Basis of presentation*

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP")

*Use of estimates*

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accordingly, actual results could differ from those estimates. Such estimates include management's assessments of the carrying value of certain assets, useful lives of assets, and related depreciation and amortization methods applied.

*Cash equivalents*

The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents.

*Fair value of financial instruments*

The Company adopted the provisions of FASB Accounting Standards Codification ("ASC") 820-10 (the "Fair Value Topic") which defines fair value, establishes a framework for measuring fair value under U.S. GAAP, and expands disclosures about fair value measurements.

The Fair Value Topic defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. It requires that valuation techniques maximize the use of observable inputs and minimize the use of unobservable inputs. It also establishes a fair value hierarchy, which prioritizes the valuation inputs into three broad levels.

Level 1: Quoted market prices available in active markets for identical assets or liabilities as of the reporting date. An active market for an asset or liability is a market in which transactions for the asset or liability occur with significant frequency and volume to provide pricing information on an ongoing basis.

Level 2: Observable inputs other than Level 1 inputs. Example of Level 2 inputs include quoted prices in active markets for similar assets or liabilities and quoted prices for identical assets or liabilities in markets that are not active.

Level 3: Unobservable inputs based on the Company's assessment of the assumptions that are market participants would use in pricing the asset or liability.

### Commitments and contingencies

The Company follows subtopic 450-20 of the FASB ASC to report accounting for contingencies. Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated.

### Revenue recognition

The Company follows paragraph 605-10-S99-1 of the FASB ASC for revenue recognition. The Company will recognize revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable and (iv) collectability is reasonably assured. In addition, the Company records allowances for accounts receivable that are estimated to not be collected.

### Income taxes

The Company follows Section 740-10-30 of the FASB ASC, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the fiscal year in which the temporary differences are expected to be recovered or settled. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB ASC ("Section 740-10-25") with regards to uncertainty in income taxes. Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. The Company had no material adjustments to its assets and/or liabilities for unrecognized income tax benefits according to the provisions of Section 740-10-25.

*Net income (loss) per share*

The Company computes basic and diluted earnings per share amounts pursuant to section 260-10-45 of the FASB ASC. Basic earnings per share is computed by dividing net income (loss) available to common shareholders, by the weighted average number of shares of common stock outstanding during the period, excluding the effects of any potentially dilutive securities. Diluted earnings per share is computed by dividing net income (loss) available to common shareholders by the diluted weighted average number of shares of common stock during the period. The diluted weighted average number of common shares outstanding is the basic weighted number of shares adjusted as of the first day of the year for any potentially diluted debt or equity.

*Subsequent events*

The Company follows the guidance in Section 855-10-50 of the FASB ASC for the disclosure of subsequent events. The Company will evaluate subsequent events through the date when the financial statements were issued.

*Recently issued accounting pronouncements*

The Company has implemented all new accounting pronouncements that are in effect. These pronouncements did not have any material impact on the financial statements unless otherwise disclosed, and the Company does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

**NOTE 3 – GOING CONCERN**

The Company's financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. The financial statements do not include any adjustment relating to recoverability and classification of recorded amounts of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

The Company has a minimum cash balance available for payment of ongoing operating expenses. Its continued existence is dependent upon its ability to continue to execute its operating plan and to obtain additional debt or equity financing. There can be no assurance the necessary debt or equity financing will be available, or will be available on terms acceptable to the Company.

**NOTE 4 FIXED ASSETS**

The Company's fixed assets consist of computers and equipment valued at cost of \$9,941 and depreciated over a useful life of five years and a truck valued at 21,000 and depreciated over three years. In January 2026 the Company purchased land for \$675,000. The current depreciation for the six months was \$4,325.

#### **NOTE 5 -NOTE PAYABLE**

The Company is obligated on a note including interest payable on demand for \$6,600.

The Company is obligated on a convertible note to a related party for \$675,000 for the purchase of land.

The note is due in three installments in July 2026, January 2027, and July 2027.

In the event the Company is unable to pay the debt the holder can convert the note into stock at a discount of 50% Of the closing bid price on day of default.
