Organization Basis of Presentation

St. Joseph, Inc. (the “Company”) was incorporated in Colorado on March 19, 1999, as Pottery Connection, Inc. On March 19, 2001, the Company changed its name to St. Joseph Energy, Inc. and on November 6, 2003, the Company changed its name to St. Joseph, Inc.

During operation the Company, through its wholly owned subsidiary, Staf*Tek, specialized in the recruitment and placement of professional data processing and technical personnel for clients on both a permanent and contract basis.

Due to economic conditions, the Company has discontinued its temporary and permanent staffing services. The Staf-Tek subsidiary was suspended by operation of Oklahoma law on November 4, 2015.

On May 18, 2023, the Board of St. Joseph, Inc. entered an agreement to merge RPM, a specialty mainstream and alternative healthcare providing company into St. Joseph, Inc. in exchange for 86,544,659 common shares of St. Joseph, Inc. The existing St. Joseph, Inc. shareholders shall retain the currently issued 13,455,341 shares.

Northern Arizona Orthopedic Sales, LLC, MedHab, LLC, and CP Biologics, LLC, became wholly owned entities on May 20, 2023, ORSA Resources, LLC, on July 5, 2023, by exchanging shares for RPM’s shares in St. Joseph, Inc., and then RPM disappeared. On April 11, 2023, ORSA Resources LLC entered into a strategic partnership agreement with Summit One Source. On May 15, 2023, Vital Touch, LLC was acquired for share in St. Joseph, Inc. as a whole-owned subsidiary. On November 1, 2025, MedHab, LLC spun out for a return of 8,654,466 common shares. On February 1, 2025, ORSA LLC spun out for a return of 8,654,466 common shares.

On March 15, 2026, the company acquired Fastbase AI Corporation., a Wyoming company as a wholly owned subsidiary in exchange for 3,000,000 common shares of St. Joseph, Inc

Recently Adopted and Recently Enacted Accounting Pronouncements

In September 2015, the FASB issued ASU No. 2015-16, Business Combinations (Topic 805) (“ASU 2015-16”). Topic 805 requires that an acquirer retrospectively adjust provisional amounts recognized in a business combination, during the measurement period. To simplify the accounting for adjustments made to provisional amounts, the amendments in the Update require that the acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amount is determined. The acquirer is required to also record, in the same period’s financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, because of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. In addition, an entity is required to present separately on the face of the income statement or disclose in the notes to the financial statements the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. ASU 2015-16 is effective for fiscal years beginning December 15, 2015. The adoption of ASU 2015-016 is not expected to have a material effect on the Company’s consolidated financial statements.

In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date (“ASU 2015-14”). The amendment in this ASU defers the effective date of ASU No. 2014-09 for all entities for one year. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in ASU 2014-09 to annual reporting periods beginning December 15, 2017, including interim reporting periods within that reporting period. Earlier application is permitted only as of annual reporting periods beginning after December 31, 2016, including interim reporting periods with that reporting period.

In April 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2015-03, Interest–Imputation of Interest (Subtopic 835-30) (“ASU 2015-03”), which changes the presentation of debt issuance costs in financial statements. ASU 2015-03 requires an entity to present such costs in the balance sheet as a direct deduction from the related debt liability rather than as an asset. Amortization of the costs will continue to be reported as interest expense. It is effective for annual reporting periods beginning after December 15, 2016. Early adoption is permitted. The new guidance will be applied retrospectively to each prior period presented. The Company is currently in the process of evaluating the impact of adoption of ASU 2015-03 on its balance sheets.

Going Concern

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. As shown in the accompanying financial statements, the Company has incurred recurring losses and has negative working capital at March 31, 2026, and 2025.

Cash Equivalents and Fair Value of Financial Instruments

For the purposes of the statements of cash flows, the Company considers all highly liquid debt instruments purchased with an original maturity of twelve months or less to be cash equivalents. The Company had no cash equivalents on March 31, 2026, and 2025.

The carrying amounts of cash, receivables and current liabilities approximate fair value due to the short-term maturity of the instruments. The company currently has \$177,315 in receivables; and \$117,290 in current liabilities as of March 31, 2026.

The Financial Accounting Standards Board's ("FASB") Accounting Standards Codification ("ASC") clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. It also requires disclosure about how fair value is determined for assets and liabilities and establishes a hierarchy for which these assets and liabilities must be grouped, based on significant levels of input as follows:

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Quoted prices in active markets for similar assets and liabilities and inputs that are observable for the asset or liability.

Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The determination of where assets and liabilities fall within this hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The valuations of the majority of the assets are considered Level 1 fair value measures under ASC 820.

Accounts Receivable

Accounts receivable consists of amounts due from customers related to the Company's employee placement services. The Company considers accounts more than 30 days old to be past due. The Company uses the allowance method for recognizing bad debts. When an account is deemed uncollectible, it is written off against the allowance. The Company generally does not require collateral for its accounts receivable. The company currently has no accounts receivable for the periods ended March 31, 2026, and 2025, respectively.

Property, Equipment and Depreciation

Property and equipment are stated at cost. Property and equipment are depreciated using the straight-line method over the estimated useful lives of the assets as follows:

Furniture and fixtures	7 years
Office equipment	5 years
Computer equipment	3 years

Upon retirement or disposition of an asset, the cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in operations. Repairs and maintenance are charged to expense as incurred and expenditures for additions and improvements are capitalized. The company currently has \$82,042 and \$26,412 depreciable property as of March 31, 2026, and 2025, respectively.

Impairment and Disposal of Long-lived Assets

The Company evaluates the carrying value of its long-lived assets when indicators of impairment are present. Impairment is assessed when the undiscounted future cash flows estimated to be generated by those assets are less than the assets' carrying amount. If such assets are impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying value or fair value, less costs to sell. There were no impairments recognized for the three months ending March 31, 2026, and 2025.

Income/Loss Per Common Share

The Company reports earnings (loss) per share using a dual presentation of basic and diluted earnings per share. Basic loss per share excludes the impact of common stock equivalents. Diluted loss per share utilizes the average market price per share when applying the treasury stock method in determining common stock equivalents. Preferred stock outstanding at March 31, 2026 was not included in the diluted loss per share as all 5,708 preferred shares were anti-dilutive as the Company incurred losses during the year. The basic and diluted losses per share at March 31, 2026, and 2025 remained equal.

Income Taxes

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes related primarily to differences between the recorded book basis and the tax basis of assets and liabilities for financial and income tax reporting. The deferred tax assets and liabilities represent the deductible when the assets and liabilities are recovered or settled. Deferred taxes are also recognized for operating losses that are available to offset future taxable income and tax credits that are available to offset future federal income taxes.

The Company has analyzed filing positions in all the federal and state jurisdictions where it is required to file income tax returns, as well as all open tax years in these jurisdictions. The Company has identified its federal tax return and its state tax return in Colorado as "major" tax jurisdictions, as defined. The Company believes that its income tax filings positions and deductions will be sustained on audit and does not anticipate any adjustments that will result in a material adverse effect on the Company's financial conditions, results of operations, or cash flow. Therefore, no reserves for uncertain income tax positions have been recorded pursuant to ASC 740.

Use of Estimates

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities; disclosure of contingent assets and liabilities at the date of the consolidated financial statements; and the reported amounts of revenues and expenses during the reporting period. Accordingly, actual results could differ from those estimates.

Recently Adopted and Recently Enacted Accounting Pronouncements

In September 2015, the FASB issued ASU No. 2015-16, Business Combinations (Topic 805) ("ASU 2015-16"). Topic 805 requires that an acquirer retrospectively adjust provisional amounts recognized in a business combination, during the measurement period. In addition, an entity is required to present separately on the face of the income statement or disclose in the notes to the financial statements the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. ASU 2015-16 is effective for fiscal years beginning December 15, 2015. The adoption of ASU 2015-016 is not expected to have a material effect on the Company's consolidated financial statements.

In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date ("ASU 2015-14"). The amendment in this ASU defers the effective date of ASU No. 2014-09 for all entities for one year. Public

business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in ASU 2014-09 to annual reporting periods beginning December 15, 2017, including interim reporting periods within that reporting period. Earlier application is permitted only as of annual reporting periods beginning after December 31, 2016, including interim reporting periods with that reporting period.

In April 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2015-03, Interest–Imputation of Interest (Subtopic 835-30) (“ASU 2015-03”), which changes the presentation of debt issuance costs in financial statements. ASU 2015-03 requires an entity to present such costs in the balance sheet as a direct deduction from the related debt liability rather than as an asset. Amortization of the costs will continue to be reported as interest expense. It is effective for annual reporting periods beginning after December 15, 2016. Early adoption is permitted. The new guidance will be applied retrospectively to each prior period presented. The Company is currently in the process of evaluating the impact of adoption of ASU 2015-03 on its balance sheets. On November 2014, The Financial Accounting Standards Board (FASB) issued Accounting Standard Update No. 2014-16—Derivatives and Hedging (Topic 815): Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity (a consensus of the FASB Emerging Issues Task Force). The amendments in this Update do not change the current criteria in GAAP for determining when separation of certain embedded derivative features in a hybrid financial instrument is required. That is, an entity will continue to evaluate whether the economic characteristics and risks of the embedded derivative feature are clearly and closely related to those of the host contract, among other relevant criteria. The amendments clarify how current GAAP should be interpreted in evaluating the economic characteristics and risks of a host contract in a hybrid financial instrument that is issued in the form of a share. The effects of initially adopting the amendments in this Update should be applied on a modified retrospective basis to existing hybrid financial instruments issued in the form of a share as of the beginning of the fiscal year for which the amendments are effective. Retrospective application is permitted to all relevant prior periods.

On November 2014, The Financial Accounting Standards Board (FASB) issued Accounting Standard Update No. 2014-17—Business Combinations (Topic 805): Pushdown Accounting (a consensus of the FASB Emerging Issues Task Force). The amendments in this Update provide an acquired entity with an option to apply pushdown accounting in its separate financial statements upon occurrence of an event in which an acquirer obtains control of the acquired entity. The amendments in this Update are effective on November 18, 2014. After the effective date, an acquired entity can make an election to apply the guidance to future change-in-control events or to its most recent change-in-control event. However, if the financial statements for the period in which the most recent change-in-control event occurred already have been issued or made available to be issued, the application of this guidance would be a change in accounting principle.

On August 2014, The Financial Accounting Standards Board (FASB) issued Accounting Standard Update No. 2014-15, Presentation of Financial Statements – Going Concerns (Subtopic 205-40): Disclosures of Uncertainties about an Entity’s Ability to Continue as a Going Concern. The amendments require management to assess an entity’s ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards. Specifically, the amendments (1) provide a definition of the term substantial doubt, (2) require an evaluation every reporting period including interim periods, (3) provide principles for considering the mitigating effect of management’s plans, (4) require certain disclosures when substantial doubt is alleviated as a result of consideration of management’s plans, (5) require an express statement and other disclosures when substantial doubt is not alleviated, and (6) require an assessment for a period of one year after the date that the financial statements are issued (or available to be issued). The amendments in this Update are effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted.

In September 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-12, Compensation – Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. The new guidance requires share-based compensation that requires a specific performance target to be achieved in order for employees to become eligible to vest in the awards and that could be achieved after an employee completes the requisite service period and be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant-date fair value of the award. Compensation costs should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. If the performance target becomes probable of being achieved before the end of the requisite service period, the remaining unrecognized compensation cost should be recognized prospectively over the remaining requisite service period. The total amount of compensation cost recognized during and after the requisite service period should reflect the number of awards that are expected to be vested and should be adjusted to reflect those awards that ultimately vest. The requisite service period ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. This new guidance is effective for fiscal years and interim periods within those years beginning after

December 15, 2015. Early adoption is permitted. Entities August apply the amendments in this Update either (a) prospectively to all awards granted or modified after the effective date or (b) retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter. The adoption of ASU 2014-12 is not expected to have a material impact on our financial position or results of operations.

In September 2014, the FASB issued ASU No. 2014-10: Development Stage Entities (Topic 915): Elimination of Certain Financial Reporting Requirements, Including an Amendment to Variable Interest Entities Guidance in Topic 810, Consolidation, to improve financial reporting by reducing the cost and complexity associated with the incremental reporting requirements of development stage entities. The amendments in this update remove all incremental financial reporting requirements from U.S. GAAP for development stage entities, thereby improving financial reporting by eliminating the cost and complexity associated with providing that information. The amendments in this Update also eliminate an exception provided to development stage entities in Topic 810, Consolidation, for determining whether an entity is a variable interest entity on the basis of the amount of investment equity that is at risk. The amendments to eliminate that exception simplify U.S. GAAP by reducing avoidable complexity in existing accounting literature and improve the relevance of information provided to financial statement users by requiring the application of the same consolidation guidance by all reporting entities. The elimination of the exception August change the consolidation analysis, consolidation decision, and disclosure requirements for a reporting entity that has an interest in an entity in the development stage. The amendments related to the elimination of inception-to-date information and the other remaining disclosure requirements of Topic 915 should be applied retrospectively except for the clarification to Topic 275, which shall be applied prospectively. For public companies, those amendments are effective for annual reporting periods beginning after December 15, 2014, and interim periods therein. Early adoption is permitted. The adoption of ASU 2014-10 is not expected to have a material impact on our financial position or results of operations.
