4) Issuer's Business, Products and Services

The purpose of this section is to provide a clear description of the issuer's current operations. Ensure that these descriptions are updated on the Company's Profile on www.OTCMarkets.com.

A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations")

The Company operates as a financial technology and treasury management platform focused on capital efficiency, digital asset exposure, and yield generation.

Security First International Holdings, Inc. has strategically transitioned its core business model toward the development and operation of its YieldTether treasury system. YieldTether is designed to optimize capital deployment through structured allocation strategies that incorporate both traditional financial principles and blockchain-based infrastructure.

The Company's primary objective is to enhance shareholder value through disciplined treasury management, where capital is actively allocated across opportunities that seek to generate yield, preserve liquidity, and maintain balance sheet flexibility.

This strategy represents a shift from a passive holding structure to an actively managed treasury model, where performance is driven by capital allocation decisions rather than operating revenue alone.

The Company focuses on:

- Strategic treasury allocation and capital deployment
- Yield generation through digital asset exposure and structured strategies
- Balance sheet optimization and capital efficiency
- Integration of emerging financial technologies into treasury operations

YieldTether serves as the central framework through which these activities are executed, enabling the Company

to dynamically manage its financial position in response to evolving market conditions.

The Company does not act as an investment advisor and does not manage third-party funds.

The Company believes this treasury-focused approach provides a scalable and capital-efficient framework for long-term shareholder value creation.

B. List any subsidiaries, parent company, or affiliated companies.

Smart Future Ventures, LLC

C. Describe the issuers' principal products or services.

The Company's primary product is its YieldTether treasury platform.

YieldTether is a proprietary financial framework designed to manage, allocate, and optimize capital across digital asset markets and related financial instruments. The platform focuses on generating yield while maintaining liquidity and managing exposure.

Core components include:

- Treasury allocation models designed for capital efficiency
- Yield optimization strategies utilizing digital asset infrastructure
- Structured exposure to blockchain-based financial systems
- Internal financial tools supporting treasury decision-making

The platform is designed to evolve alongside market conditions and may incorporate additional financial strategies, instruments, or technologies as the Company expands its treasury capabilities.

5) Issuer's Facilities

The goal of this section is to provide investors with a clear understanding of all assets, properties or facilities owned, used or leased by the issuer and the extent in which the facilities are utilized.

In responding to this item, please clearly describe the assets, properties or facilities of the issuer. Describe the location of office space, data centers, principal plants, and other property of the issuer and describe the condition of the properties. Specify if the assets, properties, or facilities are owned or leased and the terms of their leases. If the issuer does not have complete ownership or control of the property, describe the limitations on the ownership.

SECURITY FIRST INTERNATIONAL HOLDINGS INC.**NOTES TO THE UNAUDITED INTERIM FINANCIAL STATEMENTS DATED MARCH 31, 2026****NOTE 1 – NATURE OF OPERATIONS**

Security First International Holdings, Inc. (the “Company”) was incorporated on March 9, 1990, as “Buckaroom, Inc.” On July 3, 2000, the Company changed its name to “Shaft, Inc.” On January 14, 2003, the Company changed its name to “Elegant Concrete, Inc.” On July 15, 2005, the Company adopted its current name, “Security First International Holdings, Inc.”

The Company operates as a financial technology and treasury management platform focused on capital allocation, balance sheet optimization, and yield generation through digital asset-related strategies.

During the current reporting period, the Company transitioned its primary business model toward the development and operation of its YieldTether treasury system. YieldTether is a proprietary framework designed to manage and deploy capital across digital asset markets and related financial opportunities, with the objective of enhancing capital efficiency while maintaining liquidity and managing exposure.

The Company’s operations are centered on treasury management and capital deployment strategies, yield generation through structured exposure to digital assets, integration of blockchain-based financial infrastructure into treasury operations, and ongoing development of internal financial tools to support capital allocation decisions.

The Company does not act as an investment advisor and does not manage third-party funds.

The Company maintains a 50% equity interest in a title company located in Florida, which is accounted for under the equity method. This investment remains a non-core asset relative to the Company’s current treasury-focused business model.

Management believes that this transition positions the Company to pursue capital-efficient growth aligned with evolving financial markets.

NOTE 2-BASIS OF PRESENTATION**a) Statement of Compliance**

The Company’s financial statements have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) as issued by

the Financial Accounting Standards Board ("FASB").

b) Basis of Measurement

The Company's financial statements have been prepared on the historical cost basis.

c) Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the financial statement date, and the reported amounts of revenues and expenses during the reporting period. The Company's estimates may include, but are not limited to, valuations associated with digital asset-related activities, equity method investments, and the assessment of long-lived assets. These estimates are based on current facts, historical experience, and various other assumptions believed to be reasonable under the circumstances. Actual results may differ materially from these estimates.

d) Reclassification

The company has reclassified certain prior period financial information to conform with the current period presentation. In particular, the company determined that its 50% investment in a title company should be accounted for using the Equity Method of Accounting whereby the Company records its initial investment at cost, and adjusts on an annual basis its proportionate share of earnings or losses.

NOTE 3-SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following summarize the more significant accounting and reporting policies and practices of the Company.

a) Revenue recognition

The Company currently generates limited traditional operating revenue and is primarily focused on treasury-based capital allocation strategies. Revenue, when recognized, is accounted for in accordance with ASC 606, Revenue from Contracts with Customers. To the extent the Company generates income from treasury activities, such amounts are recognized in accordance with applicable accounting guidance and reflected as other income where appropriate.

December 15th 2017. This new revenue recognition standard (new guidance) has a five step process; a) Determine whether a contract exists; b) Identify the performance obligations; c) Determine the transaction price; d) Allocate the transaction price; and e) Recognize revenue when (or as) performance obligations are satisfied. The impact of the Company's initial application of ASC 606 did not have a material impact on its financial statements and disclosures

b) Stock compensation for services rendered.

The Company may issue shares of common stock in exchange for services rendered. The cost of the services are valued according to generally accepted accounting principles and have been charged to operations.

c) Net income (loss) per share

Basic loss per share is computed by dividing the net income (loss) by the weighted average number of common shares outstanding during the period.

Property and equipment.

All property and equipment are recorded at cost and depreciated over their estimated useful lives, using the straight-line method. Upon sale or retirement, the cost and related accumulated depreciation are eliminated from their respective accounts, and the resulting gain or loss is included in the results of operations. Repairs and maintenance charges, which do not increase the useful lives of the assets, are charged to operations as incurred

d) Income Tax

Provisions for income tax are based on taxes payable or refundable for the current year and deferred taxes on temporary differences between the amount of taxable income and pretax financial income, and between the tax bases of assets and liabilities and their reported amounts in the financial statements.

e) Cash and equivalents

For purposes of the statement of cash flows, the Company considers all highly liquid investments with maturity of three months or less when purchased to be cash equivalents

f) Financial Instruments and Fair Value Measurements

The Company may hold financial instruments, including digital asset-related positions and equity investments, as part of its treasury strategy. The Company evaluates such instruments in accordance with applicable accounting guidance, including ASC 825 and ASC 820. The fair value of financial instruments is determined based on observable market data when available, or other valuation techniques when market data is limited.

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Quoted prices in active markets for similar assets and liabilities and inputs that are observable for the asset or liability.

Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The determination of where assets and liabilities fall within this hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

g) Impairment of Long-Lived Assets

A long-lived asset is tested for impairment whenever events or changes in circumstances indicate that its carry value may not be recoverable. An impairment loss is recognized when the carrying amount of the assets exceeds the sum of the undiscounted cash flows resulting from its use and eventual disposition. The impairment loss is measured as the amount by which the carry value of the long-lived assets exceeds its fair value.

h) Related Party Transactions

All transactions with related parties are in the normal course of operations and are

measured at the exchange amount.

i) Intangible Assets

The useful life of intangible assets is assessed as either finite or indefinite. Following the initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Intangible assets with finite useful lives are carried at cost less accumulated amortization. Amortization is calculated using the straight line method over the estimated useful lives.

j) Equity Accounting Method

The Company accounts for investments in which it has between 20 percent and 50 percent ownership and exercises significant influence using the Equity Accounting Method. NOTE 4-GOING CONCERN

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company's ability to continue as a going concern is dependent upon its ability to generate returns from its treasury operations, manage its capital resources effectively, and obtain additional financing if necessary. Management believes that the Company's transition toward a treasury-focused strategy, including the development of its YieldTether platform, provides a framework for potential future capital efficiency and value creation. However, there can be no assurance that these efforts will be successful. Management continues to evaluate strategic opportunities to strengthen the Company's financial position.
