2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The Company’s financial statements for the three months ended March 31, 2026, have been prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”). Any reference in these notes to applicable guidance, is meant to refer to the authoritative U.S. GAAP as found in the Accounting Standards Codification (“ASC”) and Accounting Standards Update (“ASU”) of the Financial Accounting Standards Board (“FASB”).

Estimates and Assumptions

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from the estimates. The significant estimates include management’s conclusions on accounts receivable reserves, the value of the right-of-use assets and the useful lives of long-lived assets.

Fair Value of Financial Instruments

The accounting guidance defines fair value, establishes a consistent framework for measuring fair value, and expands disclosure for each major asset and liability category measured at fair value on either a recurring or nonrecurring basis. Fair value is defined as an exit price representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, the accounting guidance establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1 Observable inputs, such as quoted prices in active markets.

Level 2 Inputs, other than the quoted prices in active markets that are observable either directly or indirectly.

Level 3 Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions which reflect those that a market participant would use.

Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

In determining the fair value of its financial instruments, the Company considers the source of observable market data inputs, liquidity of the instrument, the credit risk of the counterparty to the contract, and its risk of nonperformance. In the case fair value is not observable, for the items subject to fair value measurements, the Company applies valuation techniques deemed the most appropriate under the U.S. GAAP guidance based on the nature of the assets and liabilities being measured.

Recent Accounting Pronouncements

In November 2023, the FASB issued ASU 2023-07, Segment Reporting—Improvements to Reportable Segment Disclosures. This amendment is intended to improve disclosures about a public entity's reportable segments and addresses requests from investors and other decision makers for additional, more detailed information about a reportable segment's expenses. The amendment applies to all public entities that are required to report segment information in accordance with Topic 280. The amendments are to be applied retrospectively to all periods presented and segment expense categories should be based on the categories identified at adoption. The Company adopted ASU 2023-07 effective December 31, 2022. Adoption of ASU 2023-07 did not have a material impact on the Company's financial statements. See Note 7.

In December 2023, the FASB issued ASU No. 2023-09, Income Taxes (Topic 740): Improvements to Income Tax Disclosures. ASU 2023-09 requires enhanced income tax disclosures primarily related to the rate reconciliation and income taxes paid information to provide more transparency by requiring (i) consistent categories and greater disaggregation of information in the rate reconciliation table and (ii) income taxes paid, net of refunds, to be disaggregated by jurisdiction based on an established threshold. The amendments in this standard will be effective for the Company on January 1, 2025. The Company is currently evaluating the impact the amendments will have on the financial statements and related disclosures.

In November 2024, the FASB issued ASU 2024-03, Income Statement - Reporting Comprehensive Income - Expense Disaggregation Disclosures (Subtopic 220-40). The amendments improve the disclosures about a public business entity's expenses and address requests from investors for more detailed information about the types of expenses (including purchases of inventory, employee compensation, depreciation, amortization, and depletion) in commonly presented expense captions (such as cost of sales and research and development). The amendments are effective for annual reporting periods beginning after December 15, 2026, and interim reporting periods beginning after December 15, 2027. We are currently evaluating the impact these changes may have on our financial statements.

4. LIQUIDITY AND GOING CONCERN

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. Accordingly, the financial statements do not include any adjustments relating to the recoverability of assets and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. However, for the reasons described below, Company management does not believe that cash on hand and cash flows generated internally by the Company will be adequate to fund its limited overhead and other cash requirements over the next twelve months. These reasons raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are issued.

The Company will engage in limited activities without incurring significant liabilities that must be satisfied in cash until a source of funding is secured. The Company will offer noncash consideration and seek equity lines as a means of financing its operations. If the Company is unable to obtain revenue-producing contracts or financing or if the revenue or financing it does obtain is insufficient to cover any operating losses it may incur, it may substantially curtail or terminate its operations or seek other business opportunities through strategic alliances, acquisitions or other arrangements that may dilute the interests of existing stockholders.
