SUPPLEMENTAL INFORMATION

Disclosure of Material Corporate Events
Proposed Acquisition of a 70% Interest in an Indonesian Green Coffee Company
October 27, 2026

Rapide Group, Inc. (the "**Company**") provides this Supplemental Information under the current reporting requirements of OTC Markets Group's Disclosure Guidelines for the Pink Market. It relates to a proposed acquisition that is in process and has not been completed. The target's name is withheld for confidentiality and will be disclosed when the definitive agreements are signed or the acquisition completes.

1. Material Agreement and Principal Terms

On October 22, 2026, the Company signed a term sheet with a privately held Indonesian company (the "**Target**") to acquire 70% of the Target's issued shares. A share sale agreement and shareholders' agreement are expected to be signed on or before Dec 31 2026.

Term	Summary
Consideration	US$1,500,000 in newly issued restricted common shares of the Company, priced at the five-day VWAP before completion. No cash is payable.
Lock-up	25% of the shares released at 24, 36, 48 and 60 months after completion, with a daily selling limit subject to SEC approved registration statement.
Working capital	Up to IDR 54 billion (about US$3.0 million) in tranches after completion, at the Company's discretion, aiming to complete within 18 months. The Company's stake reduces pro rata if it stops funding. The Company intends to file a SEC registration statement post merger.
Management	The founder remains President Director for at least five years; the Company appoints at least two directors and the President Commissioner and approves key decisions.
Conditions	Due diligence, conversion to a foreign investment company (PT PMA), Indonesian approvals and statutory procedures, and approval by the Company's board.

2. Proposed Issuance of Restricted Shares

On completion, the Company will issue the consideration shares to the Target's two shareholders, who are residents of Indonesia, in reliance on an exemption from registration, including Regulation S. The number of shares will be US$1,500,000 divided by the five-day VWAP; for example, 21,428,571 shares at US$0.07. These shares will be issued from the current tranche of 500 Million shares owned by current management and will not disturb the existing share structure.

3. The Target

The Target sources green Robusta coffee from farmer groups in Lampung and southern Sumatra, processes and grades it at two sites in Bandar Lampung, and sells it to coffee processors and exporters in Indonesia. The business was previously carried on through a predecessor partnership led by the Target's founder.

Figures are for the predecessor partnership, prepared under Indonesian SAK ETAP standards (not U.S. GAAP), translated at IDR 18,000 per US$1 for convenience only, and may change following due diligence. The 2024 audit opinion was qualified because 2023 opening balances were unaudited and no employee benefit provision was made. Sales for January to September 2026 were approximately IDR 173.1 billion (US$9.6 million). Audited financial statements of the Target will be filed after completion as required.

4. Change in Control

This contemplated merger and disclosure does not change the Company's status or result in a change in control.

5. Risks and Forward-Looking Statements

This document contains forward-looking statements about the signing and completion of the acquisition, the share issuance and the working capital. Actual results may differ materially. Risks include that the agreements may not be signed or the conditions met; Indonesian regulatory approvals; coffee price, crop and currency volatility; dilution from the share issuance; reliance on the founder and a small number of customers; lower 2026 sales; unaudited historical financials and tax positions under review; and the limited trading of the Company's shares. The Company undertakes no obligation to update these statements except as required by law. This document is not an offer to sell or a solicitation of an offer to buy any securities.
