Management's Discussion and Analysis or Plan of Operation

KMA Global Solutions International, Inc. ("KMAG" or the "Issuer") was incorporated on March 9, 2006 under the laws of the State of Nevada. The Company's fiscal year end is January 31. The Company has never been subject to bankruptcy, receivership or any similar proceeding. There are no current, past or pending trading suspensions by a securities regulator.

KMAG is the assignee of active patents issued by the U.S. Patent and Trademark Office (as well as corresponding foreign patents granted in Germany, Spain, France, Italy, Netherlands, United Kingdom and Mexico). These patents relate to a sew-on security label, which anticipates and incorporates RFID technology, improvements and manufacturing processes. KMAG also has patent applications pending in the U.S. (as well as corresponding foreign patent applications in Mexico, Germany, Spain, France, Italy, Netherlands, United Kingdom and Canada) relating to its dual technology EAS label and high speed process, which anticipates and incorporates RFID technology and improvements thereof.

KMAG has been engaged in the Electronic Articles Surveillance (EAS) industry since inception. Shrinkage (the value of goods which are not paid for) is caused primarily by shoplifting and employee theft. Products manufactured in the EAS industries are designed to act as a deterrent to control the problem of merchandise theft. To address this market opportunity, KMAG built the necessary infrastructure to be a source for EAS solutions worldwide.

KMAG continues to develop new products for the retail marketplace and the latest product is called the Gemini Tag. This tag is a Dual Tag which provides both EAS and RFID coverage for retailers developing a RFID solution while needing to protect their merchandise. The Gemini Tag is being made in China using a long time manufacturing source which provides similar solutions to KMAG. We anticipate the product to be in the market by Q4. KMAG has spent \$35,000 in developing this product.

Baggage tag continues to be developed along with the client and at this time we are not producing additional tags until our client has solved their technical challenges.

KMAG continues to produce high speed equipment and seek further clients in this market. KMAG developed high speed packaging line equipment which can apply, read and write a RFID tag in a variety of different tag configurations onto a variety of consumer packaging. Specifically we are working with a customer that will use this equipment for tracking merchandise from production throughout distribution to the customers dock. The opportunity is based on applying RFID tags to different packaging containing liquids that allow for reading with 100% confidence. This closed loop start up phase will transition into point of purchase retail solution which will allow for third party use at retail.

High speed labeling equipment has been installed at our primary customer and is being used as a full production machine. Further development is ongoing as we start to promote the equipment to other manufactures.

KMAG has developed a New Solution called the fashion shoe tag which is sold in the retail sector to protect Fashion Footwear (that is, footwear that is sold at a price point that attracts a greater threat as a theft item) without damaging the shoe. The solution has been developed to contain

both EAS and RFID technology. Further R&D expenditures will occur as we develop more sophisticated solutions for niche markets.

KMAG continues to promote and sell EAS solutions and develop products used by its retail customers in both EAS and RFID. KMAG continues to promote the existing business and has augmented its existing intellectual property and knowledge of the RFID industry.

Although there is no present agreement or understanding for KMAG to make any particular acquisition, it does intend to attempt to seek out, entertain and evaluate proposals for acquisition of other assets and/or business opportunities in exchange for shares of its common stock. There cannot, be any assurance that any such acquisition proposals will be made to or located by KMAG, and it is likely that any which the board of directors might entertain may be on terms that would be deemed unfavorable to and have a dilutive effect on KMAG's existing shareholders.

KMA Global Solutions International Inc. is located at 438 Gibraltar Drive, Suite 11, Mississauga Ontario. We are located in a 4800 square foot facility where current operations and record keeping takes place.

Results of Operations

The following discussion of the financial condition and results of operations should be read in conjunction with the financial statements included herewith. The discussion should not be construed to imply that the results discussed herein will necessarily continue in the future, or that any conclusion reached herein will necessarily be indicative of actual operating results in the future.

Sales

The Company's sales increased \$3,188,068 or 1957% to \$3,350,938 for the three months ended July 31, 2012 compared to \$162,870 for the three months ended July 31, 2011 and increased \$3,932,482 or 1382% to \$4,217,114 for the six months ended July 31, 2012 compared to \$284,632 for the six months ended July 31, 2011. This increase over last year is primarily due to increasing sales in our current EAS business, as well as, expanding our current EAS product lines to include our fashion shoe tag and hard tags. Sales in our RFID product lines have also contributed to the increase in sales over the previous year.

Gross Profit

The Company's Gross Profit was \$616,728 or 18% of sales for the three months ended July 31, 2012, compared with \$44,504 or 27% of sales for the three months ended July 31, 2011 and \$781,404 or 19% of sales for the six months ended July 31, 2012, as compared with \$91,650 or 32% of sales for the six months ended July 31, 2011. This corresponds with planned margins for the market. Increase in sales also resulted in discounted sales pricing.

Net Operating Expenses

Net Operating Expenses were \$321,787 or 10% of sales for the three months ended July 31, 2012, compared with \$48,053 or 30% of sales for the three months ended July 31, 2011and \$435,976 or 10% of sales for the six months ended July 31, 2012, as compared to \$99,840 or 35% for the six months ended July 31, 2011. The decrease in ratio of operating expenses to sales is primarily due to the significant increase in sales offset by increased spending primarily in outside consulting fees, traveland R&D expenses

Operating Income (Loss)

Operating Income before taxes was \$295,941 or 9% of sales for the three months ended July 31, 2012 as compared with an operating loss of \$3,549 or 2% of sales for the three months ended July 31, 2011 and \$345,729 or 8% of sales for the six months ended July 31, 2012, as compared with

an operating loss of \$8,190 or 3% of sales for the six months ended July 31, 2011. The increase in operating income for the three and six months ended July 31, 2012 compared to the three and six months ended July 31, 2011 is due to a significant increase in sales in both EAS & RFID product lines, offset by increase in operating expenses primarily in outside consulting, travel and R&D expenses.

Capital Resources

The Company had, for the six months ended July 31, 2012, current assets of \$1,282,754 and current liabilities of \$831,964.

For the six months ended July 31, 2012, the Company had a cash balance of \$86,815.
