

OTC Markets

Joining us today is Anthony Sarvucci, CEO and President of CleanGo Innovations, that trades in our OTCQB Venture Market under the ticker CLGOF. CleanGo Innovations is an FDA and Health Canada approved manufacturer of a suite of green, non-toxic, and biodegradable cleaning products for industrial, commercial, and consumer markets.

Anthony, thanks so much for joining us today.

Anthony Sarvucci

Thanks, Cecilia. Thanks for having me.

OTC Markets

Absolutely. So to begin, walk us through your background and journey to founding CleanGo Innovations.

Anthony Sarvucci

I have a background in the public markets and I was approached actually from a friend of mine who had come across a very interesting company and wanted me to take a look at it. I heard the the topic was cleaning products and going to honest, it didn't sound all that exciting. But the more I got involved in the company and involved in structuring this idea and learning about the different things that are going on today with clean cleaning products and cleaning companies, it really intrigued me. It really did, due to the fact that you know what we did 40, 50, 60 years ago, there's a new way now. And it's a better way with these you know greener and cleaner in ingredients. And it was really ah an eye-opener for me.

OTC Markets

Yes. So, tell us more about these, these products that you have in your line.

Anthony Sarvucci

Well, this is the thing. As I mentioned, this was brought to my attention as an excuse me as a as a cleaning product. and Like I said, it didn't sound real exciting, but when I found out the the toxic and caustic chemicals that are currently used in a lot of the non-environmentally friendly green products that are out there, that's really what intrigued me and what sets our product up. You know apart from our competition, is our product is a green certified product. We're certified by Green Seal, which I believe is the largest certifier of green products in North America. And they've been around since the 80s certifying green products.

So, it was ah it's a really great certification. In addition to that, we also hold other certifications through Health Canada, the US EPA, ah FDA, and Cruelty-Free Leaping Bunny.

OTC Markets

Talk about the formation of Kubera Black Energy and your CleanGo's innovations plans to expand its industrial solutions.

Anthony Sarvucci

Yeah, so what happened is we started this company and we started selling products to retail, commercial and industrial clients. And the retail products work extremely well, our commercial products work extremely well and so do our industrial. However, it was a little confusing for a lot of consumers because they'd say, well, you get a pay you know ah retail product I can buy on Amazon. How does that factor into an industrial environment? And the industrial environment is, for us, oil and gas, bunkering, commercial ah cleaning companies, different things like that. And so, what we needed to do is we needed to separate ourselves and differentiate ourselves from the retail to the industrial side of things. So Kubera was formed, and that's how we market our industrial products now.

OTC Markets

What steps have you taken to be more eco and environmentally friendly?

Anthony Sarvucci

Well, we have an incredible board that works with me on a day-to-day basis. And what we've done is we've taken the greenest and cleanest ingredients that are available today to create the the different products that we develop. We have five products that are currently certified through both Green Seal and Health Canada as well with a DIN number, which is a drug identification number, which allows us to claim 99.9% disinfecting. And so we're not only are we a green product, we're also a disinfecting product. And like I said, the the nice thing about our product is we don't utilize any of the toxic or caustic ingredients that are found in a lot of our competitors' products.

OTC Markets

What are some key strategic initiatives that investors can look forward to seeing this year and next?

Anthony Sarvucci

Well, we're definitely on the cutting edge of the products that we've created. The thing that is most exciting is just recently we announced a strategic joint venture partnership in Saudi Arabia, where we will be not only selling the products in Saudi Arabia, we'll also be producing them. We also have a similar agreement in Buenos Aires, Argentina, as well. We produce a product here locally in Houston and in Canada. And that's really some exciting news for us. And from an investor standpoint, we've really expanded our global footprint, which I think will be very beneficial for both the company and the shareholders.

OTC Markets

CleanGo Innovations trades on the OTCQB Venture Market here in the US and has also traded on the CSE in Canada, as well as the Frankfurt Stock Exchange. How does cross trading on the OTCQB Venture Market enhance your investor strategy with us?

Anthony Sarvucci

The fact that we sell our products globally, I think that we're really working hard to make our product ah a household name. And it makes the investor community, I'm sorry, it makes it a lot easier for the investor community to invest in our in our company and follow our company with the different listings that we have and the different jurisdictions that we produce our products in.

OTC Markets

Well, Anthony, it's been a pleasure to speak with you. Thanks so much for your time today.

Anthony Sarvucci

Thank you very much for having me.

OTC Markets

CleanGo Innovations trades under the symbol CLGOF on our OTCQB Venture Market.
