1 Security Data File

1.1 Overview

The OTC Markets Group Security Data File provides key security detail and trade data for the U.S. OTC equity market. For example, the file includes security symbol/identifiers (US & home country), shares outstanding, security type, 52 week high/low, transfer agent information and ADR ratios if applicable. The file also includes important security attribute information which is unique to the OTC Marketplace. Key fields include:

- **Caveat Emptor** – An OTC Markets Group designation that notes that there is a public interest concern associated with the company, which may include a spam campaign, questionable stock promotion, known investigation of fraudulent activity committed by the company or insiders, regulatory suspensions, or disruptive corporate actions.
- **OTC Tier** – OTC Markets Group categorizes all securities trading over-the-counter into easily identifiable tiers that inform investors whether an issuer has made public information available in a timely manner.

The Security Data file may be used in conjunction with the End-of-Day Pricing file to obtain a complete view of the trade, quote, and security data for all US OTC equity securities.

Security Data files are made available daily at ~4 AM and ~9:30 PM – on every trading day. File types and delivery methods are outlined in section 1.2 and 1.4

1.2 File Types

Security Data files will be made available to customers in pipe delimited format. Files will be created on every trading day at 4 AM and ~9:30 PM.

Security Data files will be created with and without the cusip field included¹. Security Data file naming convention is as follows:

- 4 AM File CUSIP included: sec_YYYYMMDD0400.txt
- 4 AM File CUSIP not included: sec_YYYYMMDD0400 _nocusip.txt
- 930 PM File CUSIP included: sec_YYYYMMDD.txt
- 930 PM File CUSIP not included: sec_YYYYMMDD _nocusip.txt

File names use Eastern Standard Time and military formatting.

¹ CUSIP is a unique nine-character alphanumeric code appearing on the face of each stock or bond certificate that is assigned to a security by Factset. CUSIP numbers are the property of the American Bankers Association (ABA) and are administered by Factset. Since OTC Markets Group neither owns nor controls CUSIP numbers, distributors cannot be authorized to receive the daily list or fundamental data files including CUSIP data unless they have a daily license in place with CUSIP. Distributors please note: OTC Markets Group is not responsible for obtaining written approval from CUSIP prior to authorizing data distributors to externally redistribute CUSIP data; it is the responsibility of the data distributor to obtain such CUSIP permission for their downstream customers.

The first row of the pipe delimited file includes column labels. File size is approximately 6 MB.
