MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The interim condensed consolidated financial statements and all information in the quarterly report are the responsibility of the Board of Directors and management. These interim condensed consolidated financial statements have been prepared by management in accordance with International Financial Reporting Standards. Management maintains the necessary systems of internal controls, policies and procedures to provide assurance that assets are safeguarded and that the financial records are reliable and form a proper basis for the preparation of financial statements.

The Board of Directors ensures that management fulfils its responsibilities for financial reporting and internal control through an Audit Committee. This committee, which reports to the Board of Directors, meets with the independent auditors and reviews the financial statements.

The interim condensed consolidated financial statements for the nine months ended August 31, 2025 are unaudited and prepared by Management. The Company's independent auditor has not performed a review of these interim condensed consolidated financial statements in accordance with standards established by the Chartered Professional Accountants of Canada for a review of interim financial statements by an entity's auditor.

Blue Star Gold Corp.
Notes to the Interim Condensed Consolidated Financial Statements
For the nine months ended August 31, 2025
(Expressed in Canadian dollars)
(Unaudited)

1. Nature of Operations

Blue Star Gold Corp. (“Blue Star” or the “Company”) was incorporated on April 13, 2007 pursuant to the *Business Corporations Act* of British Columbia. The Company’s principal business activity is the acquisition and exploration of mineral property interests. The Company is in the exploration stage and substantially all the Company’s efforts are devoted to financing and developing these property interests. There has been no determination whether the Company’s interests in unproven exploration and evaluation assets contain economically recoverable mineral resources.

The Company is listed for trading on the TSX Venture Exchange (“TSX-V”) under the symbol “BAU” and on OTCQB under the symbol “BAUFF”, and its corporate head office is located at 507 - 700 West Pender Street, Vancouver, BC, Canada V6C 1G8.

2. Basis of Presentation

a) Statement of compliance

These unaudited interim condensed consolidated financial statements, including comparatives that are unaudited, have been prepared in accordance with IAS 34 (“IAS 34”) using accounting policies consistent with the IFRS Accounting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

These interim condensed consolidated financial statements have been prepared using accounting policies consistent with those used in the Company’s audited annual financial statements for the year ended November 30, 2024 except for income tax expense which is recognized and disclosed for the full financial year in the audited financial statements.

These interim condensed consolidated financial statements were authorized by the Board of Directors on October 15, 2025.

b) Going concern

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of its resource properties and the Company’s continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise alternative financing, if necessary, or alternatively, upon the Company’s ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values.

These consolidated financial statements have been prepared in accordance with IFRS on a going concern basis, which contemplates that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Accordingly, these consolidated financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

The Company incurred a loss of \$1,968,035 during the nine months ended August 31, 2025 and had an accumulated deficit of \$52,772,358 (November 30, 2024 - \$50,804,323) as at August 31, 2025. These circumstances may cast significant doubt as to the ability of the Company to meet its obligations as they come due, and accordingly, the appropriateness of the use of accounting principles applicable to a going concern. The outcome of these matters cannot be predicted at this time.

2. Basis of Presentation (continued)

c) Consolidation

These consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Ulu Mining Inc. and Inukshuk Exploration Incorporated (“Inukshuk”), both incorporated under the laws of British Columbia. All significant intercompany transactions have been eliminated upon consolidation. A subsidiary is an entity that the Company controls, either directly or indirectly. Control is based on whether an investor has power over the investee, exposure or rights to variable returns from its involvement with the investee, and the ability to use its power over the investee to affect the amount of returns.

d) Functional and presentation currency

The Company and its wholly owned subsidiaries’ reporting and functional currency is the Canadian dollar. Monetary assets and liabilities of the Company are translated into Canadian dollars at the exchange rate in effect on the consolidated statements of financial position date, while non-monetary assets and liabilities are translated at historical rates. Expenses are translated at the average rates over the reporting period. Gains and losses from these translations are included in profit or loss.

e) Basis of measurement

These consolidated financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit or loss, which are stated at their fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

f) Estimates and judgments

The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These consolidated financial statements include estimates, which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised, and the revision affects both current and future periods.

Information about critical judgments and estimates in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements are as follows.

Critical accounting estimates

i. Share-based compensation

Estimating the fair value of granted stock options requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected rate of forfeitures, expected life, price volatility, interest rate and dividend yield. Changes in the input assumptions can significantly affect the fair value estimate of the Company’s earnings and reserves.

ii. Interest rates

The Company estimates a market interest rate in determining the fair value of the liability component of its loan payable and an incremental borrowing rate in determining the right-of-use asset. The determination of market interest rate is subjective and could significantly affect the fair value estimate.

2. Basis of Presentation (continued)

f) Estimates and judgments (continued)

Critical accounting judgments

i. Impairment of exploration and evaluation assets

Assets or cash-generating units are evaluated at each reporting date to determine whether there are any indications of impairment. The Company considers both internal and external sources of information when making the assessment of whether there are indications of impairment for the Company's exploration and evaluation assets.

ii. Going concern

The assessment of the Company's ability to continue as a going concern and to raise sufficient funds to pay its ongoing operating expenditures, meet its liabilities for the ensuing year, and to fund planned and contractual exploration programs, involves significant judgment based on historical experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances.

ii. Application of IFRS 16 *Leases*

The Company applies judgment in determining whether the contract contains an identified asset, whether the Company has the right to control the asset, and the lease term. Lease term reflects the period over which the lease payments are reasonably certain including renewal options that the Company is reasonably certain to exercise. The determination of lease terms involves significant judgment with respect to assumptions of whether lease extensions will be utilized. Management makes assumptions about long-term industry outlook which relate to future events and circumstances. Actual results could vary from these assumptions, and the differences could be material to the carrying value of the lease liabilities and right-of-use assets, for which the lease term is the basis for determining useful life.

iii. Flow-through expenditures

The Company is required to spend proceeds received from the issuance of flow-through shares on qualifying resource expenditures. Differences in judgment between management and regulatory authorities with respect to qualified expenditures may result in disallowed expenditures by the tax authorities. Any amount disallowed may result in the Company's required expenditures not being fulfilled.

iv. Modification versus extinguishment of financial liability

Judgement is required in applying IAS 32 *Financial Instruments: Presentation* and IFRS 9 *Financial Instruments: Recognition and Measurement* to determine whether the amended terms of the loan payable are a substantial modification of an existing financial liability and whether it should be accounted for as an extinguishment of the original loan payable.

3. Significant Accounting Policies

These Condensed Interim Consolidated Financial Statements have been prepared using accounting policies consistent with those used in the Company's audited consolidated financial statements for the year ended November 30, 2024.

New, amended and future accounting pronouncements

The following standards are effective for future periods:

On April 9, 2024, the IASB issued a new standard – IFRS 18, “Presentation and Disclosure in Financial Statements” with a focus on updates to the statement of profit or loss. The key new concepts introduced in IFRS 18 relate to:

- the structure of the statement of profit or loss;
- required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures); and
- enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general.

IFRS 18 will replace IAS 1; many of the other existing principles in IAS 1 are retained, with limited changes. IFRS 18 will apply for reporting periods beginning on or after 1 January 2027. Retrospective application is required and early application is permitted.

We are currently assessing the effect of this new standard on our consolidated financial statements.

4. Change in Accounting Policy

Effective September 1, 2024, the Company changed its accounting policy related to exploration costs. Previously, the Company capitalized its exploration costs on an individual prospect basis until such time as an economic ore body was defined or the prospect was abandoned. The Company will continue to capitalize all direct costs related to the acquisition of a mineral property interest upon acquiring the legal right to explore the property; however, exploration costs incurred prior to the determination of the feasibility of mining operations and a decision to proceed with development will be charged to operations as incurred.

Accordingly, the Company also reclassified the advances to exploration service suppliers at year end from long-term deposit to short-term deposit.

The change in policy has been made to more appropriately disclose the operations of the Company and the value of its mineral properties.

In accordance with IAS 8 – *Accounting Policies in Accounting Estimates and Errors*, the impact of the change in policy has been applied retrospectively in these financial statements and the comparatives have been adjusted accordingly for all the periods present, as if the policy has been applied as of December 1, 2022. The summary of the impact of these changes is disclosed below:

5. Capital Management

Capital includes all the components of shareholders' equity as well as proceeds from loans. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the acquisition and exploration of its exploration and evaluation assets and to maintain a flexible capital structure for its projects for the benefit of its stakeholders. As the Company is in the exploration stage, its principal source of funds is from the issuance of common shares. Further information relating to liquidity risk is disclosed in note 6.

The Company manages the capital structure and adjusts it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may issue new shares, enter into joint venture property arrangements, acquire or dispose of assets, or adjust the amount of cash.

To facilitate the management of its capital requirements, the Company prepares budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The budgets are approved by the Board of Directors.

There were no changes in the Company's approach to capital management during the nine months ended August 31, 2025. The Company is not subject to externally imposed capital requirements.

6. Management of Financial Risks

Fair value measurement disclosure includes classification of financial instrument fair values in a hierarchy comprising three levels reflecting the significance of the inputs used in making the measurements, described as follows:

Level 1: Valuations based on quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: Valuations based on directly or indirectly observable inputs in active markets for similar assets or liabilities, other than Level 1 prices, such as quoted interest or currency exchange rates; and

Level 3: Valuations based on significant inputs that are not derived from observable market data, such as discounted cash flow methodologies based on internal cash flow forecasts.

The Company's financial instruments as at August 31, 2025 are as follows:

	Level 1	Level 2	Level 3

Lease liabilities	\$ -	\$ 10,768	\$ -
Loans payable	\$ -	\$ 2,148,616	\$ -

The Company's financial instruments are exposed to certain financial risks. The risk exposures and the impact on the Company's financial instruments are summarized below.

6. Management of Financial Risks (continued)

a) Fair value

The carrying value of cash and cash equivalents, accounts payable and accrued liabilities and amounts due to related parties approximated their fair value since the interest payable on those borrowings is either close to current market rates or the borrowings are of a short-term nature. The lease liabilities and loans payable are classified as level 2 due as the fair value is determined based on indirectly observable market interest rates.

b) Interest rate risk

The Company has no significant exposure at August 31, 2025 and November 30, 2024 to interest rate risk through its financial instruments. The Company has a loan payable with fixed interest rate at 3% per annum.

c) Currency risk

As at August 31, 2025 and November 30, 2024, the majority of the Company's cash and cash equivalents was held in Canadian dollars, the Company's functional and reporting currency. The majority of the Company's accounts payable and accrued liabilities are denominated in Canadian dollars. Loan payable and lease liabilities outstanding as at August 31, 2025 and November 30, 2024 are denominated in Canadian dollars. Currency risk is not significant.

d) Credit risk

Concentration of credit risk exists with respect to the Company's cash and cash equivalents, as substantially all amounts are held at major financial institutions. The credit risk associated with cash and cash equivalents is minimized by ensuring that these financial assets are placed with financial institutions with investment-grade ratings by a primary ratings agency.

e) Liquidity risk

The Company attempts to manage liquidity risk by maintaining sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short-term obligations. As at August 31, 2025, the Company had cash and cash equivalents of \$2,436,173 (November 30, 2024 - \$845,871) to settle current liabilities of \$701,497 (November 30, 2024 - \$1,737,365).

7. Long-term deposits

As at August 31, 2025, the Company has the following long-term deposits:

a) a deposit of \$943,835 (November 30, 2024 - \$943,835) held with the Kitikmeot Inuit Association pursuant to its Land Use License for the Ulu Gold Project;

b) a deposit of \$1,685,542 (November 30, 2024 - \$1,685,542) with Crown-Indigenous Relations and Northern Affairs Canada, in relation to the Ulu Water License issued by the Nunavut Water Board ("NWB") for the reclamation liability of the mining license;

a) Ulu Property

The Ulu Property consists of a renewable 21-year lease with an area of approximately 947 hectares and an expiry date of November 18, 2038.

On January 8, 2018, the Company and Mandalay Resources Corporation (“Mandalay”) entered into an Ulu Property Option Agreement, which was further amended on July 19, 2019, pursuant to which, the Company acquired 100% of Ulu Property on February 10, 2020.

On June 6, 2024, the Company entered into an Advanced Exploration Lease (AEL) with the Kitikmeot Inuit Association (“KIA”) which provides the Company exclusive surface rights and access to this area of Inuit Owned Lands for a period of 10 years. According to the AEL, the Company is required to pay an annual rent of \$16,400 and water fee of \$1,000. On July 18, 2024, the Company also issued 2,460,000 common shares on to KIA valued at \$332,100.

b) Hood River Property

The Company, through its subsidiary Inukshuk Exploration Inc. (“Inukshuk”), holds the Hood River Property in Nunavut through a 20-year renewable mineral exploration agreement (“MEA”) dated June 1, 2013, issued by Nunavut Tunngavik Incorporated (“NTI”).

On February 26, 2018, the Company signed a final Transaction Agreement (the “Definitive Agreement”) and Net Smelter Royalty Agreement (“Royalty Agreement”) to acquire 100% of the outstanding shares of Inukshuk, with an effective date as of September 18, 2014.

Under the terms of the Royalty Agreement in the Definitive Agreement, the Company will pay the following:

- i. Pay a 3% NSR royalty on the disposition of all minerals produced from the Hood River Property;
- ii. Make advance royalty payments totaling \$500,000 (paid);
- iii. Offer the vendor a right of conveyance if the Company abandons the Hood River Property; and
- iv. Maintain the Hood River Property in good standing during the conveyance period.

10. Exploration and Evaluation Assets (continued)

b) Hood River Property (continued)

Prior to the commencement of commercial production on the Hood River Property, the Company has the option to acquire up to 2% of the NSR for up to \$8,000,000 under the following terms:

- i. Purchase an initial 0.5% of the NSR for \$1,000,000;
- ii. Purchase an additional 0.5% of the NSR for an additional \$1,500,000;
- iii. Purchase an additional 0.5% of the NSR for an additional \$2,500,000; and
- iv. Purchase an additional 0.5% of the NSR for an additional \$3,000,000.

On January 25, 2022, the Company signed an amended Hood River MEA with NTI resulting in an expansion of the project area by approximately 40%. The project area now encompasses 11,203 hectares.

c) Roma Property

On February 17, 2021, the Company entered into a Property Purchase Agreement to acquire 100% interest in nine mineral claims ("Roma") located in Nunavut. The Company issued 75,000 shares (fair valued at \$67,500) on February 22, 2021 and reimbursed all expenses (\$22,230) in connection with staking the claims. In January 2022, the Company staked additional claims at a cost of \$7,885.

Also in January 2022, the Company entered into a 20-year renewable mineral exploration agreement ("MEA") with NTI for an exploration area of 4,119 hectares. On October 1, 2024, the Company entered into an amendment to the MEA agreement to increase the exploration area from 4,119 hectares to 5,706 hectares.

Title to resource properties

Although the Company has taken steps to verify the title to exploration properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

Environmental

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company conducts its mineral exploration activities in compliance with applicable environmental protection legislation. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company. Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions. If the restrictions adversely affect the scope of exploration and development on the resource properties, the potential for production on the property may be diminished or negated.

12. Loan Payable (continued)

For accounting purposes, the loans with bonus shares were considered a hybrid financial instrument and were allocated into corresponding debt and equity components at the date of issue. The Company used the residual value method to allocate the principal amount of the loans between the liability and obligation to issue shares component. The Company valued the debt component of the loan agreements by calculating the present value of principal and interest payments, discounted at a rate of 21% which represents managements best estimate of the rate that a loan without bonus shares would earn. The debt component is subsequently accreted to the face value of the loan agreements with an effective interest rate of 19%.
