**1. NATURE AND CONTINUANCE OF OPERATIONS**

Sierra Grande Minerals Inc. (the “Company”) was incorporated under the laws of the province of Ontario on November 17, 1994. On June 19, 2009, the Company completed a continuance of business from Ontario to British Columbia.

The Company is listed on the Canadian Securities Exchange (“CSE”) under the symbol “SGRO” as well as on the Berlin and Frankfurt stock exchanges in Germany under the symbol “F91Q”. Commencing June 18, 2021, the Company’s shares began to trade on the OTCQB Venture Market (“OTCQB”) in the United States under the symbol “SIERF”.

The head office, principal address and records office of the Company are 9648-128th Street, Suite 210, Surrey, BC V3T 2X9.

These condensed consolidated interim financial statements have been prepared on the assumptions that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations as at March 31, 2025. The Company has not advanced its mining properties to commercial production and has incurred operating losses since inception of its business. The Company’s continuation as a going concern is dependent upon the successful results from its exploration, its ability to attain profitable operations and generate funds from equity, and debt financing to meet its obligations. These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company’s ability to continue as a going concern. Management intends to finance operating costs over the next twelve months with private placements and debt financing from related parties. Should the Company be unable to continue as a going concern, the net realizable value of its assets may be materially less than the amounts on its consolidated statement of financial position.

These condensed consolidated interim financial statements do not reflect the adjustments to the carrying value of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary were the going concern assumptions inappropriate. These adjustments could be material.

**2. BASIS OF PRESENTATION**

**Statement of Compliance**

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 - Interim Financial Reporting, using accounting policies consistent with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board. IFRS includes International Accounting Standards (“IAS”) and interpretations issued by the IFRS Interpretations Committee (“IFRIC”). As such, these condensed consolidated interim financial statements do not contain all the disclosures required by IFRS for annual financial statements and should be read in conjunction with the Company’s consolidated audited annual financial statements for the year ended December 31, 2024.

These condensed consolidated interim financial statements were approved and authorized for issuance by the Company’s Board of Directors on May 23, 2025.

**Basis of Preparation**

These condensed consolidated financial statements have been prepared on historical cost basis except for financial instruments classified as and measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The condensed consolidated interim financial statements are presented in Canadian dollars, which is also the Company’s and all its subsidiaries’ functional currency, unless otherwise indicated. The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company’s accounting policies.

**Basis of Consolidation**

The condensed consolidated interim financial statements include the accounts of the Company and its controlled entities. Details of controlled entities are as follows:

	Country of Incorporation	Percentage Owned	
		March 31, 2025	December 31, 2024
Minera Grenville S.A.C.	Peru	100%	100%
Sierra Capital Inc. <sup>(i)</sup>	Nevada, USA	100%	100%
1202745 BC Ltd.	BC, Canada	100%	100%

<sup>(i)</sup>Sierra Capital, Inc. is a dormant subsidiary to hold the title of the Company’s mineral interests located in the USA.

Inter-company balances and transactions are eliminated on consolidation.

Subsidiaries are those entities which the Company controls by having the power to govern the financial and operating policies. Subsidiaries are fully consolidated from the date on which control is obtained by SGRO and are deconsolidated from the date that control ceases.

**2. BASIS OF PRESENTATION (Continued)**

**Functional Currency**

These condensed consolidated interim financial statements are presented in Canadian dollars, which is also the Company's and all its subsidiaries' functional currency, unless otherwise indicated. The functional currency of each entity is measured using the currency of the primary economic environment in which the entity operates.

**Significant Judgements and Estimates**

The preparation of the consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to estimates are adjusted for prospectively in the period in which the estimates are raised.

Estimates and assumptions where there is significant risk of material adjustments to assets and liabilities in future accounting periods include the following:

- exploration and evaluation asset impairment assessment;
- recognition and measurement of deferred tax assets and liabilities; and
- share-based payments.

The most significant judgments in applying the Company's consolidated financial statements include the following:

- assessment of the Company's ability to continue as a going concern and whether there are events or conditions that may give rise to significant uncertainty; and
- determination of functional currency of the Company and its subsidiaries.

**3. MATERIAL ACCOUNTING POLICY INFORMATION**

The accounting policies applied in the preparation of these financial statements are consistent with those applied and disclosed in notes 2 and 3 to the Company's audited annual consolidated financial statements for the year ended December 31, 2024.

**Adoption of new accounting policies and new accounting pronouncements**

The Company has not adopted new accounting policies since its recent year ended December 31, 2024.

Certain other accounting pronouncements were issued but the Company anticipates that the application of these standards, amendments and interpretations in future periods will have no material impact on the results and financial position of the Company except for additional disclosures. The Company is assessing the impact of the new or revised IFRS standards on its financial position and financial performance.

**4. EXPLORATION AND EVALUATION ASSETS**

**8. FINANCIAL RISK AND CAPITAL MANAGEMENT**

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits and controlling and reporting structures.

The type of risk exposure and the way in which such exposure is managed is provided as follows:

**Credit Risk**

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is its cash held in bank accounts. Cash is deposited in bank accounts held with major banks in Canada and Peru. As most of the Company's cash is held by two banks, there is a concentration of credit risk. However, this risk is managed by using major banks that are high credit quality financial institutions as determined by rating agencies.

**Liquidity Risk**

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company ensures that there are sufficient holdings of cash and cash equivalents to meet its short-term exploration and evaluation requirements and anticipated operating cash flows.

Historically the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

**Foreign Exchange Risk**

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company's Peruvian subsidiaries are exposed to currency risk as they incur expenditures that are denominated in US dollars and the Peruvian Soles, and their functional currency is the Canadian dollar. The Company does not hedge its exposure to fluctuations in foreign exchange rates.

**Interest Rate Risk**

Interest rate risk refers to the risk that fair values of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company does not have material financial assets or liabilities that are exposed to fluctuation of interest rate. As a result, the exposure to interest rate risk is not significant.

**Capital Management**

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of exploration and evaluation assets. In the management of capital, the Company includes components of shareholders' equity. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The properties in which the Company currently has an interest in are in the exploration stage; as such, the Company is dependent on external financing to fund activities. To carry out planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. The Company is not subject to externally imposed capital requirements. There were no changes to the Company's approach to capital management during the period.

**Financial Instruments**

The Company's financial instruments consist of cash, amounts receivables, notes receivable, and trade payables. The fair values of these financial instruments approximate their carrying values, unless otherwise noted.

The following summarizes fair value hierarchy under which the Company's financial instruments are valued:

Level 1 – fair values based on unadjusted quoted prices in active markets for identified assets of liabilities;

Level 2 – fair values based on inputs that are observable for the asset or liability, either directly or indirectly; and

Level 3 – fair values based on inputs for the asset or liability that are not based on observable market data.

Cash is measured at fair value using Level 1 input.
