Item VI: Describe the Issuer's Business, Products and Services

Describe the issuer's business so a potential investor can clearly understand the company. In answering this item, please include the following:

A. a description of the issuer's business operations;

INSCOR, Inc. specializes in providing significant funding solutions utilizing high cash- value life insurance contracts combined with low-cost financing. The Company's solutions are tailored to municipalities, other government entities and corporations, as a low-cost solution to funding retiree and other employee benefits. In addition, INSCOR markets a variation of the plan to affluent individuals as well.

Today, many retiree health care and Other Post-Employment Benefits (OPEB) plans, especially those run by governmental entities, remain largely unfunded, due to the financial crisis. In the past, accounting rules enabled municipalities to use "pay as you go" accounting. However, with the advent of GASB 45 accounting rules, it has been revealed that unfunded liabilities are in excess of $1.5 trillion, among the 67,000 state, and local governments, and agencies.

Unfortunately, this situation leaves governments in a major bind as there are no real, practical and low-cost, existing options to fund these liabilities. After all, cities and counties have had their ratings slashed, budgets cut to the bone and some have even filed for bankruptcy protection. As a result, attempts to raise taxes, further cuts in spending in already reduced budgets, or floating bonds are non-starters.

Separately, the current financial morass has led to many stories in the press regarding the financial difficulties of entertainers and professional athletes. These stories highlight the need for affluent individuals seeking solutions for estate planning or funding cash flow needs to engage in innovative strategies today, even if one is not in financial distress.

<u>The *FIT OPEB* Model</u>

Management has spent more than 2 years educating and marketing its *FIT OPEB* solution to governmental leaders across the country. With so many municipalities in distress, INSCOR has elected to focus its energies on higher rated (by Moody's, S&P and Fitch ratings services) municipalities, as these entities can enjoy the greatest benefit and INSCOR's execution capabilities are highest.

The innovative Financed Insurance Trust OPEB plan, or *FIT OPEB* plan, is a customizable solution which combines the procurement of specifically designed life insurance on active employees using funds borrowed from the financial sector or bond issuance and secured by the insurance policies themselves.

Life insurance, which in large measure has been successfully used by corporations and banks for years, is modeled in coordination with the financing to provide an income stream from policy proceeds of predictable employee mortality and yearly distributions from policy cash values. As a result, a *FIT OPEB* plan can provide a cash stream to help support yearly other cash flow obligations, plus fund future cash flow and OPEB liabilities with reduced spending increases or tax increases and with fewer cuts in benefits.

<u>*Premium Matching* variation of the *FIT strategy*</u>

For those entities that want the benefits of a FIT OPEB plan, but wish to avoid incurring the additional debt that is reflected on balance sheets, Premium Matching is a solution. Prearranged lending terms are in place with banks to make low-interest loans to a third party trust instead of loaning to the municipality. Every $1.00 paid by the municipality toward the life insurance is matched by an additional $2.70 (approximate amount) into the life insurance from the trust spread-out over 10 years. The trust carries, administers and eventually retires the loan using a portion of the increased cash growth in the policies from the additional matching funds. As result, cash flow potential is nearly doubled versus plans that employ no financing.

It should be noted that with interest rates at historical lows, highly rated municipalities that implement the *FIT* strategies now are also able to benefit from incredibly low initial costs.

As part of the marketing and execution of INSCOR's *FIT OPEB* plan, the Company engaged Actuarial Risk Management, Ltd ("ARM") to conduct independent, comparative, actuarial analysis of its flagship solution, FIT OPEB. With the tools and evaluation services provided by ARM, government officials can avail themselves with critical, independent insight into the benefits of implementing a FIT OPEB strategy. In addition, INSCOR anticipates that the resulting analysis will go beyond just providing independent verification supporting governmental use of *FIT OPEB* plans. Analysis also provides governments with back-tested comparisons of other options and information helpful in making informed decisions.

<u>The *FIT Plan* and *Premium Matching* variations for Business Owners. Professionals, Key Executives and affluent individuals</u>

The FIT Plan and Premium Matching financing variations apply especially well within this market. The plans gain additional leverage from the inherent tax benefits of life insurance— tax deferred cash accumulation and tax-free distributions that can be especially meaningful to successful businesses and professionals. The strategies again use a combination of favorable financing terms and innovative uses of specific life insurance products and trusts - all of which result in minimum levels of out-of-pocket costs in producing the potential for significant cash flow opportunities.

On the financing side, INSCOR management has significant capabilities and relationships in which to execute financing for municipalities, corporations, professionals and affluent individuals. It should be noted that premium financing loans are considered among the safest in the industry since they are backed by the guaranteed liquidity of life insurance cash values and the strength and reputation of the life insurance companies. The security of these loans, when coupled with the current low interest rate environment, results in lending terms that are extremely favorable. Loan rates are typically LIBOR plus 1.5-2%, depending on plan design, the cash value of the life insurance provides the bulk, if not all, of the collateral on the loan.

NOTE 1- GOING CONCERN

The financial statements have been prepared on a going concern basis which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses. The ability to continue as a going concern is dependent upon the Company's ability to obtain the necessary capital to fund operations and expansion.

NOTE 2 - SUMMARY OF SIGNIFCANT ACCOUNTING POLICIES

Basis of Presentation

The Company uses the accrual basis of accounting and accounting principles generally accepted in the United States of America ("GAAP" accounting) are the financial statements are presented in US dollars. The Company has adopted a December 31 fiscal year end.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of assets requires management to make estimates and assumptions that affect the reported amounts and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and the expenses during the reporting period. Actual results could differ from those estimates.

Financial Instruments

The carrying value of the Company's financial instruments approximates their fair value because of the short maturity of these instruments.

Income Taxes

Income taxes are accounted for under the assets and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. Use of net operating loss carry forwards for income tax purposes may be limited by Internal Revenue Code section 382 if a change of ownership occurs.

Basic Income (Loss) Per Share

Basic income (loss) per share is calculated by dividing the Company's net loss applicable to common shareholders by the weighted average number of common shares during the period.

Diluted earnings per share is calculated by dividing the Company's net income available to common shareholders by the diluted weighted average number of shares outstanding during the year. The diluted weighted average number of shares outstanding is the basic weighted number of shares adjusted for any potentially dilutive debt or equity. There are no such common stock equivalents outstanding as of September 30, 2012

Dividends

The Company has not adopted any policy regarding payment of dividends. No dividends have been paid during any of the periods shown.

Impairment of Long-Lived Assets

The Company continually monitors events and changes in circumstances that could indicate carrying amounts of long- lived assets may not be recoverable. When such events or changes in circumstances are present, the Company assesses the recoverability of long-lived assets by determining whether the carrying value of such assets will be recovered through undiscounted expected future cash flows. If the total of the future cash flows is less than the carrying amount of those assets, the Company recognizes an impairment loss based on the excess of the carrying amount over the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or the fair value less costs to sell.

Advertising Costs

The Company's policy regarding advertising is to expense advertising when incurred.

Revenue Recognition

The Company recognizes revenue when products are fully delivered or services have been provided and collection is reasonably assured.

Stock-Based Compensation

Stock---based compensation is accounted for at fair value in accordance with SFAS No. 123 and 123 (R) (ASC 718) To date, the Company has not adopted a stock option plan and has not granted any stock options.

New Authoritative Accounting Guidance

On July 1,2009, the Accounting Standards Codification ("ASC") became the Financial Accounting Standards Board ("FASB") officially recognized source of authoritative U.S. generally accepted accounting principles applicable to all public and non-public non-governmental entities, superseding existing FASB, AICPA, EITF and related literature. Rules and interpretive releases of the SEC under the authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. All other accounting literature is considered non-authoritative. The switch to the ASC affects the away companies refer to U.S. GAAP in financial statements and accounting policies. Citing particular content in the ASC involves specifying the unique numeric path to the content through the Topic, Subtopic, Section and Paragraph structure.

FASB ASC Topic 260, "Earnings Per Share." On January 1,2009, the Company adopted new authoritative accounting guidance under FASB ASC Topic 260, "Earnings Per Share," which provides that unvested share---based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two---class method.

FASB ASC Topic 820, "Fair Value Measurements and Disclosures." New authoritative accounting guidance under ASC Topic 820,"Fair Value Measurements and Disclosures," affirms that the objective of fair value when the market for an asset is not active is the price that would be received to sell the asset in an orderly transaction, and clarifies and includes additional factors for determining whether there has been a significant decrease in market activity for an asset when the market for that asset is not active. ASC Topic 820 requires an entity to base its conclusion about whether a transaction was not orderly on the weight of the evidence. The new accounting guidance amended prior guidance to expand certain disclosure requirements. The Company adopted the new authoritative accounting guidance under ASC Topic 820 during the first quarter of 2009. Adoption of the new guidance did not significantly impact the Company's consolidated financial statements.

Further new authoritative accounting guidance (Accounting Standards Update No. 2009---5) under ASC Topic 820 provides guidance for measuring the fair value of a liability in circumstances in which a quoted price in an active market for the identical liability is not available. In such instances, a reporting entity is required to measure fair value utilizing a valuation technique that uses (i) the quoted price of the identical liability when traded as an asset, (ii) quoted prices for similar liabilities or similar liabilities when traded as assets, or (iii) another valuation technique that is consistent with the existing principles of ASC Topic 820, such as an income approach or market approach. The new authoritative accounting guidance also clarifies that when estimating the fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. The forgoing new authoritative accounting guidance under ASC Topic 820 will be effective for the Company's consolidated financial statements beginning October 1,2009 and is not expected to have a significant impact on the Company's consolidated financial statements

FASB ASC Topic 825 *"Financial Instruments."* New authoritative accounting guidance under ASC Topic 825,"Financial Instruments," requires an entity to provide disclosures about the fair value of financial instruments in interim financial information and amends prior guidance to require those disclosures in summarized financial information at interim reporting periods.

FASB ASC Topic 855, *"Subsequent Events."* New authoritative accounting guidance under ASC Topic 855, "Subsequent Events," establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. ASC Topic 855 defines (i) the period after the balance sheet date during which a reporting entity's management should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and (iii) the disclosures an entity should make about events or transactions that occurred after the balance sheet date. The new authoritative accounting guidance under ASC Topic 855 became effective for the Company's financial statements for periods ending after June 15,2009. Effective February 24, 2010, the FASB issued Accounting Standards Update ("ASU") No. 2010-09, "Subsequent Events (Topic 855): Amendments to Certain Recognition and Disclosure Requirements" which revised certain disclosure requirements. ASU No. 2010-09 did not have a significant impact on the Company's consolidated financial statements. The company evaluated subsequent events, which are events or transactions that occurred after June 30, 2012 through the issuance of the accompanying consolidated financial statements.

Management does not believe that any other recently issued but not yet effective accounting pronouncements, if adopted, would have an effect on the accompanying consolidated financial statements

NOTE 3 – NOTES PAYABLE RELATED PARTIES

The Company receives periodic advances from its principal stockholder based upon the Company's cash flow needs. As of March 31, 2013, the Company had received a total of $406,340, which is payable on demand and does not bear interest. As of December 31, 2012 the Company also received a short term loan from one of the officers of the Company in the amount of $8,274 which is payable on demand and does not bear interest. During the quarter ended March 31, 2013 $1,082 of this amount was paid back leaving a balance due of $7,192.

NOTE 4 - COMMON STOCK

During the fiscal year ended December 31, 2012, the Company issued 72,000,000 shares of restricted common stock in exchange for services rendered valued at $216,500.

During the fiscal year ended December 31, 2012, the Company cancelled 3,500,000 shares of common stock previously issued in advance of services to be rendered. The company decided to not engage the individuals and the shares were returned to company and cancelled. The value of the services, $350, has been reflected in the accompanying Statement of Equity.

During the three month period ending March 31, 2013 the Company did not issue any stock.
