The Company is still devoting substantially all of its efforts on establishing the business and its planned principal operations have not commenced. All losses accumulated, since inception, have been considered as part of the Company's development stage activities.

ACCOUNTING METHOD

The Company's financial statements are prepared using the accrual method of accounting. The Company has elected a fiscal year ending on December 31.

USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In the opinion of management, all adjustments necessary in order to make the financial statements not misleading have been included. Actual results could differ from those estimates.

CASH EQUIVALENTS

The Company considers all highly liquid investments with maturity of three months or less when purchased to be cash equivalents.

BASIC EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is computed by dividing net income, or loss, by the weighted average number of shares of common stock outstanding for the period. Diluted earnings (loss) per share is computed by dividing net income, or loss, by the weighted average number of shares of both common and preferred stock outstanding for the period.
