Notes to Financial Statements

CGROWTH CAPITAL, INC. NOTES TO FINANCIAL STATEMENTS (unaudited)

NOTE 1 – Summary of Significant Accounting Policies

Basis of Presentation

The accompanying un-audited interim financial statements include all information and footnotes required by accounting principles generally accepted in the United States of America ("GAAP") for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of financial position and the results of operations for the periods presented have been included. Operating results for the periods are not necessarily indicative of the results that may be expected for future years. All transactions are denominated in US dollars.

Management's Estimates and Assumptions

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements. Management considers CGrowth Capital's most significant accounting estimates to include valuation assumptions for share-based payments, allowance for doubtful accounts receivable, inventory reserves, accrual for reserves, the carrying value of long-lived assets, income tax valuation allowances and capitalization of labor and overhead to inventory for work in progress. Actual results could differ significantly from those estimates.

Fair Value of Financial Instruments

The fair value of financial instruments approximates their carrying values at period end dates due to their short maturities. These financial instruments consist of cash and cash equivalents, accounts receivable and accounts payable.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with an initial maturity of 90 days or less to be cash equivalents.

Accounts Receivable and Allowance for Doubtful Accounts

The Company recognizes an allowance for losses on accounts receivable based on an analysis of historical bad debt experience, current receivables aging, and expected future write-offs, as well as an assessment of specific identifiable customer accounts considered at risk or uncollectible. As of June 30, 2014, management has determined all receivable balances to be fully collectible and accordingly, no allowance was recognized

at such time. Accounts receivable are non-interest bearing and are generally unsecured.

Inventories

Inventories are stated at the lower of cost or market with cost being determined on the first-in, first-out method. Work in progress and finished goods inventory includes an allocation for capitalized labor and overhead. The Company routinely evaluates the carrying value of inventories and provides reserves when appropriate to reduce inventories to the lower of cost or market to reflect estimated net realizable value. As of June 30, 2014, no inventory existed for the Company and, accordingly, no reserve has been recognized at June 30, 2014.

Property and Equipment

Property and equipment are carried at depreciated cost. Gains or losses related to retirements or disposition of fixed assets are recognized in operations in the period incurred. Costs of normal repairs and maintenance are charged to expense as incurred, while betterments or renewals are capitalized. Depreciation commences at the time the assets are placed in service. Depreciation is provided using the straight-line method over the estimated economic lives of the assets or for leasehold improvements, over the shorter of the estimated useful life or the lease term, which are summarized as follows:

Computer equipment.....	3 – 5 years
Furniture and equipment.....	5 – 7 years
Leasehold improvements.....	7 years
Warehouse and commercial	25 years

As of June 30, 2014, the Company had accounted for depreciation on all of its current property and equipment.

Revenue Recognition, Deferred Revenue and Change in Accounting Principle

Net revenues include sales services. Services include consulting work performed by the Company. The Company recognizes revenue for these services when it is realized or realizable and earned. Revenue is considered realized and earned when: (i) persuasive evidence of an arrangement exists; (ii) delivery has occurred and/or services have been rendered; (iii) the price is fixed and determinable; and (iv) collection of the resulting receivable is reasonably assured.

Financial Instruments and Concentrations of Credit Risk

We believe the book value of our current assets and liabilities approximate their fair values due to their short term nature.

Financial instruments that potentially subject us to significant concentrations of credit risk consist principally of cash. With respect to cash, during the six month period ended June 30, 2014, we maintained all of our cash in a deposit account with two financial institutions, which deposit account at times may exceed federally insured limits. We have not experienced any losses in such account.

Income Taxes

We compute income taxes in accordance with Financial Accounting Standards Statement No. 109 "Accounting for Income Taxes" ("SFAS 109"). Under SFAS 109, deferred taxes are recognized for the tax consequences of temporary differences by applying enacted statutory rates applicable to future years to differences between the tax bases of assets and liabilities and their financial statement carrying amounts. Also, the effect on deferred taxes of a change in tax rates is recognized in income in the period that included the enactment date.

Net Income (Loss) per Common Share

The net income per common share is computed by dividing net income by the weighted average of common shares outstanding.

Accounting Pronouncements

We do not expect that the adoption of any recent accounting pronouncements will have a material impact on our financial statements.

NOTE 2 – Going Concern

The accompanying financial statements have been prepared on a going concern basis, which assumes the Company will be able to meet its obligations and continue its operations for at least the next twelve months. Such assumption contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company incurred a net loss for the quarter ended June 30, 2014 and had an accumulated deficit of \$806,569 as of June 30, 2014. For the six months ending June 30, 2014, the Company had a loss of \$238,964, and anticipates a current annual working capital deficit of approximately \$500,000. These deficits raise doubt about the Company's ability to continue as a going concern. As a result, realization values of the Company's assets and liabilities may be substantially different from reported carrying values and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should we be unable to continue as a going concern.

The Company's continuation as a going concern is dependent upon its ability to generate sufficient cash flow from sales to meet its obligations on a timely basis, to obtain additional financing as may be required, and ultimately to attain profitability. Potential sources of cash include new contracts, external debt, the sale of shares of Company's stock or alternative methods such as mergers or sale transactions. No assurances can be given, however, that the Company will be able to obtain any of these potential sources of cash. Furthermore, the Company may be unable to raise additional capital on commercially acceptable terms, if at all, and if the Company raises capital through additional equity financings, existing shareholders may have their ownership interests diluted.

6) Describe the Issuer's Business, Products and Services

Describe the issuer's business so a potential investor can clearly understand the company. In answering this item, please include the following:

A. a description of the issuer's business operations;

Following the change of control in July 2012, the Company began to diversify itself and position the Company to be an asset holding and management company servicing assets and companies in the mining, exploration, real estate and emerging technology sectors with solutions designed to help companies monetize their undervalued or unused assets and bring products and services to market.

Prior to the change of control, the Company had provided telephonic inpatient nursing and rehabilitative services to patients who require continuous healthcare but not hospital services through its subsidiary, Spectrum Managed Care of California, Inc. ("Spectrum"). The Company also provided proprietary software for nurse case management services through this same subsidiary. The Company fully impaired the value of Spectrum and its software on its balance sheet. At the end of FY2013, the Company made the decision to divest itself of the market sector since the telephonic services has since ceased.

In July 2012, the Company entered into an Assignment of Contract with Keystone Financial Management, Inc. ("KFM"), its majority shareholder, whereby KFM assigned to the Company, and the Company assumed from KFM, all of KFM's rights, title and interest in and to that certain Joint Venture Agreement pursuant to which the Company acquired the rights to an ore processing agreement enabling conversion of raw ore materials into marketable commodities, such as gold and silver. This acquisition demonstrates the Company's strategy of purchasing or executing joint ventures on valuable assets and to monetize the assets to bring shareholder value.

During the latter part of 2012, the Company has worked to line up additional contracts in the metal mining field, worked on agreements with strategic partners and consultants, and established targeted equipment purchases to carry out operations in 2013. During the first quarter of 2013, the Company was able to initiate its first series of equipment purchases for the processing of raw ore materials into marketable commodities.

On March 13, 2013, the Company announced that it had executed a Purchase and Sale Agreement for the purchase of the Deer Trail Mine in Eastern Washington. The 40 acre fee simple parcel contains three (3) historically active mines and is grandfathered as an active mining site. Terms of the purchase are to be disclosed upon closing of the transaction. The transaction has yet to close, however, the parties continue to work together as joint partners.

During the second quarter of 2013, the Company engaged the Bureau of Land Management to secure a rock quarry near Colville, Washington, known as the Chewelah Community Pit. On June 17, 2013, the Company entered into an agreement with JPX Global, Inc. for the lease and purchase of the representative material at the quarry along with a joint venture agreement for the Company to oversee the extraction and sale of the material. The Company has recognized a gain on the sale of assets related to the net cash received in the transaction. Effective the end of FY2013, the Company severed the relationship with JPX Global and now has all rights to the quarry.

Effective September 30, 2013, the Company closed on a Purchase and Sale Agreement with West Salt Creek, Inc. for the purchase of 2,064 acres of Wyoming oil leases. Located in the Powder River Basin, the leases include active wells with current production along with the associated fixtures, pumps, vehicles, and tanks for the current field operation. The purchase price for the property leases, well interest, and equipment is \$3,900,000. The Company paid for the acquisition through the issuance of a) \$3,000,000 in Preferred A stock (which amounted to 300,000 shares of Preferred A stock valued at \$10.00 per shares).
