## NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Basis of Presentation** –The accompanying consolidated financial statements have **not been audited** and are the representation of management. While an attempt has been made to prepare the statements in accordance with accounting principles generally accepted in the United States of America for and pursuant to the rules and regulations of the United States Securities and Exchange Commission (“SEC”), several disclosures have been omitted, pending external audits and disclosure completion. In the opinion of management, revenues and expenses are a fair and comparable representation of current operations.

**Reclassifications** – Certain amounts presented in the previous unaudited consolidated financial statements have been reclassified to conform to current-period presentation. These reclassifications have had an effect on net income and stockholders' equity.

**Principles of Consolidation** – The accompanying consolidated financial statements include the operations, transactions and balances of Blue Diamond Ventures, Inc. and all of its wholly-owned subsidiaries. Intercompany balances and transactions have been eliminated in consolidation.

**Use of Estimates** – The preparation of financial statements, in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. Significant estimates include the recoverability of merchant reserves, revenue returns and refunds, share-based compensation forfeiture rates, and the potential outcome of future tax consequences of events that have been recognized for financial reporting purposes. Actual results and outcomes may differ from management's estimates and assumptions.

**Cash and Cash Equivalents** – The Company considers all highly-liquid investments purchased with an original maturity of three months or less to be cash equivalents.

**Property and Equipment** – Property and equipment are recorded at cost less accumulated depreciation. Maintenance, repairs, and minor replacements are charged to expense as incurred. When depreciable assets are retired, sold, or otherwise disposed, the cost and related accumulated depreciation are removed from the accounts and the resulting gain or loss is reflected in operations. Depreciation is calculated on the straight-line method over the estimated useful lives of the assets, which are three to fifteen years.

**Revenue Recognition** – Revenue for the Company is recorded when:

- The risks and rewards have been transferred from the Company to the buyer;
- The seller has no control over the goods sold;
- Collection of payment is reasonably assured;
- The amount of revenue can be reasonably measured; and
- Costs of earning the revenue can be reasonably measured.

**Earnings (Loss) Per Share** –The computations of basic earnings (loss) per share are based on net income (loss) divided by the weighted-average number of common shares outstanding during the period, adjusted for qualified participating securities, using the if-converted method, when the qualified participating securities are dilutive. Diluted earnings (loss) per share are calculated by dividing net income (loss) assuming dilution by the weighted-average number of common shares and potentially dilutive shares of common stock issuable upon conversion of non-participating shares. When dilutive, the potential common shares issuable upon exercise of warrants included in diluted earnings (loss) per share are determined by the treasury stock method.

**Impairment of Long-lived Assets** – Management reviews and evaluates the net carrying value of all facilities, including idle facilities, for impairment at least annually, or upon the occurrence of other events or changes in circumstances that indicate that the related carrying amounts may not be recoverable. We estimate the net realizable value of each property based on the estimated undiscounted future cash flows that will be generated from operations at each property, the estimated salvage value of the surface plant and equipment, and the value associated with property interests.

Although management has made a reasonable estimate of factors based on current conditions and information, assumptions underlying future cash flows are subject to significant risks and uncertainties. Estimates of undiscounted future cash flows are dependent upon estimates of metals to be recovered from proven and probable ore reserves, and to some extent, identified resources beyond proven and probable reserves, future production and capital costs and estimated metals prices (considering current and historical prices, forward pricing curves and related factors) over the estimated remaining mine life. It is reasonably possible that changes could occur in the near term that could adversely affect our estimate of future cash flows to be generated from our operating properties. If undiscounted cash flows including an asset's fair value are less than the carrying value of a property, an impairment loss is recognized.

### **NOTE 3 – DEBT**
