

Alternative Reporting Standard: Pink® Basic Disclosure Guidelines

Federal securities laws, such as Rules 10b-5 and 15c2-11 of the Securities Exchange Act of 1934 (“Exchange Act”) as well as Rule 144 of the Securities Act of 1933 (“Securities Act”), and state Blue Sky laws, require issuers to provide *adequate current information* to the public markets. With a view to encouraging compliance with these laws, OTC Markets Group has created these Pink Basic Disclosure Guidelines (“Guidelines”).¹ These Guidelines set forth the disclosure obligations that make up the “Alternative Reporting Standard” for Pink companies. These Guidelines have not been reviewed by the U.S. Securities and Exchange Commission or any state securities regulator, although OTC Markets Group as a matter of policy welcomes comments from these and other regulators. We use information provided by companies under these Guidelines to designate the appropriate tier in the Pink Market: Current Information, Limited Information or No Information.² The information provided by companies under these Guidelines is subject to our [Privacy Policy](#).

These Guidelines may be amended from time to time, in the sole and absolute discretion of OTC Markets Group, with or without notice.

5) Issuer's Business, Products and Services

The purpose of this section is to provide a clear description of the issuer's current operations. In answering this item, please include the following:

A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations"):

The Issuer currently owns 74% of SStartrade SA, a Swiss corporation. This Swiss company controls 100% of the shares of two companies in Russia: one is LLC Gaysky, a steel plant in the Orenburg region; the other being a gold mining company, LLC Favorit Centre. Because of changes in licensing procedures, limiting the size of each property for which a license may be granted to 100 square kilometers (the property in question, known as the Kadara property, is 237.17 square kilometers), LLC Favorit Centre's license to conduct geological surveys and to conduct extraction work on a property located in the Trans-Baikal region of eastern Russia, is now required to be divided into three licenses, all of which are in process.

SStarTrade Tech Inc. through its subsidiary won the state competition for the license for the right for researching, exploration and production of the gold on Kadarinskoe gold field (includes Kadarinsky gold deposit) in the Mogochinsky area, Transbaikal Region, the Russian Federation and received issued and registered license. It is the first of pack of licenses of the large gold field area, previously mentioned by SStarTrade Tech Inc.

In order to operate in the assigned territory, companies must obtain a license that allows survey and exploration geological works and mining operations. Russian law now defines a maximum territorial extension per license at 100 square kilometers. This means the issue of separate licenses is required to replace the previous single license.

The newly registered Kadarinskoe field license is the one part of the pack of licenses to be received by the Company through its subsidiary in order to substitute previously issue license.

Highlights for the Kadarinskoe field are as follows:

- The Kadarinsky field is located on the territory of Mogochinsky district of the Trans-Baikal Territory, between the Shilka River and the Amazar River. The Mogochinsky district is located in the northeastern part of the Trans-Baikal Territory. The square of the territory is 19,7 sq.km.
- Gold deposit Kadarinskoe was explored in the 1970-1973 by Chita geological department.
- Kadarinsky deposit includes proved reserves (Russian category B and C1).
- The structure of Kadarinkoe deposit, located at Kadarinsky plot, is relatively simple and is typical for many well-known deposits of the medium-sized valleys of Chita region.
- The width of the deposit is quite sustained and varies within 30 to 143.5 m at an average value of 60m. The depth of excavation, as well as the content of the blocks are also relatively constant and vary from 4.1 to 4.9 m. The thickness of the formation according to the accounted blocks varies from 1.0 to 1.6 m.

Also, it is worth to mention that SSTT (through its subsidiaries) had registered with Russian Ministry of Natural Resources official claims to receive licenses for geological exploration (with aim to establish operating goldmines after successful allocation of proved reserves) for four perspective plots located in Trans-Baikal region, Russian Federation.

The newly claimed fields is the other part of the pack of licenses to be received by the Company through its subsidiary in order to substitute previously issue license.

The name and the current volume of inferred resources of the claimed gold fields are as follows:

Bagadginsky gold field – inferred resources are 50 tons of gold.

Davan Holodgikansky gold field – inferred resources are 10 tons of gold.

Kadarinsky plot № 1 – inferred resources are 21 tons of gold

Kadarinsky plot № 2 – inferred resources are 9 tons of gold

The area has been known as gold bearing since 1885. In the past, miners carried out mining operations in separate valleys.

The work area is located within the northeastern flank of the large gold-molybdenum belt. All known ore deposits and occurrences are formed in the Mesozoic metallogenetic stage.

Several manifestations of ore gold and numerous points of mineralization of the gold-carbon formation with ore bodies in the form of vein-disseminated mineralization zones, as well as a cataclase and quartz-sulfide-polymetallic mineralization zone with gold grade from 2 to 10 g / t were found on the license territory during the geological mapping in the past.

The company plans to conduct geological exploration on the territory of the licenses, submit a report on the work performed to the state body, and then obtain licenses for the mining operations within deposits.

The steel enterprise LLC Gaysky renewed a number of existing contracts and concluded new contracts for a total amount of \$ 68.7 million. Also, despite the beginning of the phased technical re-equipment of two workshops, LLC Gaysky ends this fiscal year with a profit exceeding 4 million US dollars. However, LLC Gaysky still owes \$8M to the bank, which is currently still due, and retooling will be required (due to the replacement of a number of machine tools and workshop equipment). As a result, a decision was made by the Board of Directors of SStarTrade SA to prepare for the sale of LLC Gaysky in order to concentrate solely on the gold mining business, in which most members of the Board of Directors see serious appeal.

These procedures are being defined, and the forecast is that **the alienation of the plant will be effective during the 4th Quarter of 2019.**

- B. Describe any subsidiaries, parents, or affiliated companies, if applicable, and a description of their business contact information for the business, officers, directors, managers or control persons. Subsidiary information may be included by reference
