MEDX HOLDINGS, INC.
Condensed Consolidated Unaudited Financial Statements
Notes For the Six Months Ending June 30, 2020

NOTE 1. NATURE AND BACKGROUND OF BUSINESS

The accompanying consolidated financial statements include MEDX Holdings, Inc., its wholly-owned subsidiaries and any majority controlling interests.

Originally a development business, the Company has now become a holding company focused on acquiring businesses throughout the United States which have proven track records to maximize return on investment. Through its subsidiaries, the Company acquires real estate and develops and builds residential and commercial properties for immediate sale or long-term cash flow.

The Company was originally incorporated in Colorado on September 5, 2006 as Disaboo, Inc., with the name changed to Disaboom, Inc. on November 12, 2006 and Cantor Group, Inc. on August 12, 2015. The Company was redomiciled to Wyoming on December 28, 2015 and changed its name to MedX Holdings, Inc. on the same day.

On December 19, 2019, there was a change of control of the Company, whereby Mark Miller resigned as director and CEO and Jason Black became the controlling shareholder and interim President through the assignment of a convertible loan note for \$70,000 to Mark Miller, the issuance of 50,000 series C preferred shares to Jason Black.

On December 21, 2019, Jeremy Amsden was appointed as the Company's CEO.

On February 24, 2020, the Company completed the acquisition of Bio Hydro LLC as a wholly owned subsidiary, through the issuance of 4,000,000 series B preferred shares. Simultaneous with the transfer, the Company completed the divestment of its subsidiaries, MJ Builders of MN and DDG Properties. Bio Hydro LLC is engaged in the development of real estate in Maricopa County, Arizona to procure pharmaceutical grade water wells in Arizona's saturated zone.

On June 5, 2020, Jeremy Amsden resigned as the Company's CEO due to an injury and was replaced by Hans Enriquez.

At no point in its history has the Company been classified as a shell.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying pro forma financial statements have been prepared for MEDX Holdings, Inc. in accordance with accounting principles generally accepted in the United States of America (US GAAP).

In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for fair presentation of the financial statements have been included. The financial statements include acquired subsidiaries, as discussed below, and include all consolidation entries required to include those subsidiaries.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

For the Balance Sheet and Statement of Cash Flows, all highly liquid investments with maturity of three months or less are considered to be cash equivalents. The Company had no cash equivalents as of December 31, 2019 or June 30, 2020.

Income Taxes

Income taxes are provided in accordance with the FASB Accounting Standards (ASC 740), Accounting for Income Tax. A deferred tax asset or liability is recorded for all temporary differences between financial and tax reporting and net operating loss carry forwards. Any deferred tax expense (benefit) resulting from the net change during the year is shown as deferred tax assets and liabilities. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it was more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Basic and Diluted Net Income (Loss) Per Share

Net income (loss) per unit is calculated in accordance with Codification topic 260, "Earnings per Share" for the periods presented. Basic net loss per share is computed using the weighted average number of common membership units outstanding. Diluted loss per share has not been presented because the shares of common stock equivalents have not been included in the per share calculations as such inclusion would be anti-dilutive. Diluted earnings per share is based on the assumption that all dilutive stock options, warrants and convertible debt are converted or exercised applying the treasury stock method. Under this method, options, warrants and convertible debt are assumed exercised at the beginning of the period (or at the time of issuance, if later), and as if funds obtained thereby were used to purchase shares of common stock at the average market price during the period. Options, warrants and/or convertible debt will have a dilutive effect during periods of net profit only when the average market price of the units during the period exceeds the exercise or conversion price of the items.

Stock Based Compensation

Codification topic 718 "Stock Compensation" requires that the cost resulting from all share-based transactions be recorded in the financial statements and establishes fair value as the measurement objective for share-based payment transactions with employees and acquired goods or services from non-employees. The codification also provides guidance on valuing and expensing these awards, as well as disclosure requirements of these equity arrangements. The Company adopted the codification upon creation of the Company and will expense share-based costs in the period incurred. The Company has not yet adopted a stock option plan and all share-based transactions and share based compensation has been expensed in accordance with the codification guidance.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with professional standards for "Accounting for Derivative Instruments and Hedging Activities". Professional standards generally provide three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instruments are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. Professional standards also provide an exception to this rule when the host instrument is deemed to be conventional as defined under professional standards as "The Meaning of Conventional Convertible Debt Instrument".

The Company accounts for convertible instruments when it has determined that the embedded conversion options should not be bifurcated from their host instruments in accordance with professional standards when "Accounting for Convertible Securities with Beneficial Conversion Features," as those professional standards pertain to "Certain Convertible Instruments." Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying shares of common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of conversion options embedded in preferred shares of common stock based upon the differences between the fair value of the underlying shares at the commitment date of the note transaction and the effective conversion price embedded in the note.

ASC 815-40 provides that, among other things, generally, if an event not within the entity's control could require net cash settlement, then the contract shall be classified as an asset or a liability.

Fair Value of Financial Instruments

We adopted the guidance of ASC-820 for fair value instruments, which clarifies the definition of fair value, prescribes methods for determining fair value, and establishes a fair value hierarchy to classify the inputs used in measuring fair value, as follows:

| | |
|---------|--|
| Level 1 | Inputs are unadjusted quoted prices in active markets for identical assets or liabilities available at the measurement date. |
| Level 2 | Inputs are quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs derived from or corroborated by observable market data. |
| Level 3 | Inputs are unobservable inputs which reflect the reporting entity's own assumptions on what assumptions the market participants would use in pricing the asset or liability based on the best available information. |

The carrying amounts for cash, accounts receivable, accounts payable and accrued expenses, and loans payable approximate their fair value based on the short-term maturity of these instruments. We did not identify any assets or liabilities that are required to be presented on the balance sheet at fair value in accordance with the accounting guidance.

ASC 825-10 "Financial Instruments" allows entities to voluntarily choose to measure certain financial assets and liabilities at fair value (fair value option). The fair value option may be elected on an instrument-by-instrument basis and is irrevocable, unless a new election date occurs. If the fair value option is elected for an instrument, unrealized gains and losses for that instrument should be reported in earnings at each subsequent reporting date. We did not elect to apply the fair value option to any outstanding instruments.

Derivative Liabilities

Derivative financial instruments consist of convertible instruments and rights to shares of the Company's common stock. The Company assessed that it had no derivative financial instruments as of June 30, 2020 and December 31, 2019.

ASC 815 generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument subject to the requirement of ASC 815. ASC 815 also provides an exception to this rule when the host instrument is deemed to be conventional. as described.

Impact of New Accounting Standards

The Company does not expect the adoption of recently issued accounting pronouncements to have a significant impact on the Company's results of operations, financial position, or cash flow.

NOTE 3. GOING CONCERN

The Company's financial statements are prepared in accordance with generally accepted accounting principles applicable to a going concern. This contemplates the realization of assets and the liquidation of liabilities in the normal course of business. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Currently, the Company does not have significant cash or other material assets, nor does it have operations or a source of revenue sufficient to cover its operation costs and allow it to continue as a going concern.

The Company has a limited operating history and had a cumulative net loss from inception to June 30, 2020 of \$1,990,737. The Company has a working capital deficit of \$721,304 as at June 30, 2020.

These financial statements for the six months ending June 30, 2020 have been prepared assuming the Company will continue as a going concern, which is dependent upon the Company's ability to generate future profits and/or obtain necessary financing to meet its obligations as they come due.

The management has committed to an aggressive growth plan for the Company. The Company's future operations are dependent upon external funding and its ability to execute its business plan, realize sales and control expenses. Management believes that sufficient funding will be available from additional borrowings and private placements to meet its business objectives including anticipated cash needs for working capital, for a reasonable period of time. However, there can be no assurance that the Company will be able to obtain sufficient funds to continue the development of its business operation, or if obtained, upon terms favorable to the Company.

NOTE 4. ACQUISITIONS AND DISPOSALS

On January 15, 2018, the Company acquired MJ Builders of MN, LLC ("MJ") and DDG Properties LLC ("DDG") as wholly-owned subsidiaries. MJ serves as a licensed contractor in the state of Minnesota. In addition to building custom homes, MJ also owns several rental properties, as does DDG, both residential and commercial, all of which were leased at the point of acquisition, creating both a hard asset and ongoing revenue stream for the Company's shareholders. The CEO of MJ also became the CEO, President and controlling shareholder of the Company on completion of the acquisition.

The purchase price for MJ and DDG was \$1,000,000, satisfied through the issuance of 4,000,000 shares of series B Preferred Stock valued at \$0.25 per share, with the acquisition price broken down as follows:

| Subsidiary | Allocation |
|---------------------|---------------------|
| Cash on hand | \$ - |
| Current assets | - |
| Fixed assets | 411,311 |
| Current liabilities | (411,311) |
| Goodwill | 1,000,000 |
| Total | \$ 1,000,000 |

The assets and liabilities acquired totaled nil, with the balance of the purchase price of \$1,000,000 allocated to Goodwill.

In October 2019, the Company sold all rental properties owned by MJ and DDG and repaid all loans related to these properties. The Goodwill related to the original acquisitions was written off as part of the transaction.

On February 24, 2020, the Company disposed of both MJ and DDG in full. The 4,000,000 series B Preferred Stock, valued at \$0.25 per share, that were issued for the acquisition, were returned to the Company on January 1, 2020.

Also on February 24, 2020, the Company finalized the acquisition of Bio Hydro LLC for \$1,000,000, satisfied through the issuance of 4,000,000 shares of series B Preferred Stock valued at \$0.25 per share.

NOTE 5. OTHER CURRENT ASSETS

Other current assets as at June 30, 2020 and December 31, 2019 are as follows:

| | June 30, 2020 | December 31, 2019 |
|------------------|---------------|-------------------|
| Prepaid expenses | - | - |
| Totals | \$ - | \$ - |

NOTE 6. FIXED ASSETS

Through the acquisition of MJ Builders of MN, LLC ('MJ') and DDG Properties, LLC ('DDG'), the Company holds fixed assets with values at June 30, 2020 and December 31, 2019 as follows:

| Asset | Useful Life (years) | June 30, 2020 | December 31, 2019 |
|--------------------------|---------------------|------------------|-------------------|
| Equipment | 5 | \$ 37,500 | \$ 37,500 |
| Accumulated depreciation | | (18,750) | (15,000) |
| Total | | \$ 18,750 | \$ 22,500 |

During the six months ending June 30, 2020, a total of \$3,750 was charged to the Statement of Operations for depreciation.

NOTE 7. INTANGIBLE ASSETS

The Company acquired MJ Properties of MN, LLC and DDG Properties, LLC in January 2018, creating \$1,000,000 of Goodwill through these transactions. The Company also capitalized its reorganization costs connected with these transactions.

On the sale of all of the Company's rental properties in October 2019, the Company extinguished the Goodwill created through the original transaction, as well as the capitalized reorganization costs.

On February 24, 2020, the Company acquired Bio Hydro LLC for \$1,000,000 in total, with \$996,000 of this represented by Goodwill.

| Asset | Description | June 30, 2020 | December 31, 2019 |
|-------------------|--------------------|----------------------|--------------------------|
| Goodwill | Goodwill | \$ 996,000 | \$ - |
| Intangible assets | Design costs | 200 | 200 |
| Totals | | \$ 996,200 | \$ 200 |

Goodwill is not amortized, but is tested on an annual basis for impairment and the value of the goodwill written down accordingly if the value is below the carrying value in the financial statements.

There was no impairment test carried out during the period ending June 30, 2020.

NOTE 8. LOANS AND NOTES PAYABLE

The Company had multiple notes and loans payable as at June 30, 2020 and December 31, 2019, totaling \$101,169 and \$89,177 respectively, as follows:

| Description | Date of Loan Note | June 30, 2020 | December 31, 2019 |
|--|--------------------------|----------------------|--------------------------|
| 12 month convertible loan note entered into with Northwoods Elite LLC; interest rate 20%; conversion price \$0.0001. | 10/21/2019 | \$ 21,065 | \$ 19,220 |

| Total | | \$ 101,169 | \$ 89,177 |
| Long-term total | | \$ - | \$ - |
| Short-term total | | \$ 101,169 | \$ 89,177 |

| Loans and Notes Amortization | Amount Due |
|-------------------------------------|-------------------|
| Due within 12 months | \$ 101,169 |
| Due within 24 months | - |
| Due within 36 months | - |
| Due within 48 months | - |
| Due after 48 months | - |
| Total | \$ 101,169 |

Notes

1. There was a part repayment of \$500 made on June 29, 2020 through the issuance of 5,000,000 shares of common stock. Further repayments followed from July onwards.

NOTE 9. DERIVATIVE LIABILITY

The Company applies the provisions of ASC Topic 815-40, Contracts in Entity's Own Equity ("ASC Topic 815-40"), under which convertible instruments, which contain terms that protect holders from declines in the stock price (reset provisions), may not be exempt from derivative accounting treatment. As a result, embedded conversion options in convertible debt are recorded as a liability and are revalued at fair value at each reporting date. If the fair value of the note exceeds the face value of the related debt, the excess is recorded as change in fair value in operations on the issuance date.

The Company identified embedded derivatives related to the Convertible Promissory Notes issued in October and December 2019 for a total of \$88,500, with these embedded derivatives including certain conversion features. The accounting treatment of derivative financial instruments requires that the Company record the fair value of the derivatives as of the inception date of the Convertible Promissory Notes and to adjust the fair value as of each subsequent balance sheet date. At the inception of the Convertible Promissory Notes, the Company determined a fair value for the embedded derivative using the Black Scholes Model based on the following assumptions:

| | |
|----------------|--------------|
| Dividend yield | 0.00% |
| Volatility | 66.07-71.26% |
| Risk-free rate | 1.60-1.74% |

The initial fair value of the embedded debt derivative was \$546,665. This amount was allocated as a debt discount up to the proceeds of the notes of \$88,500, to be amortized over the life of the Convertible Loan Notes. The remaining balance of \$458,165 was charged to operations as a loss on change in fair value of the derivative liability.

The fair value of the embedded debt derivative was reviewed at December 31, 2019, using the following inputs:

| | |
|----------------|--------|
| Dividend yield | 0.00% |
| Volatility | 65.93% |
| Risk-free rate | 1.68% |

The fair value of the embedded debt derivative at December 31, 2019 was \$579,573, an increase in the valuation of the embedded debt derivative of \$32,908 for the period.

The following table provides a summary of changes in fair value of the Company's Level 3 derivative liabilities for the year ended December 31, 2019:

| | December 31, 2019 | December 31, 2018 |
|--|----------------------|----------------------|
| Balance, beginning of period | \$ - | \$ - |
| Additions | 546,665 | - |
| Mark-to-market at modification date | 32,908 | - |
| Reclassified to additional paid-in capital upon modification of term | - | - |
| Balance, December 31, 2019 | \$ 579,573 | \$ - |
| Net loss due to change in fair value for the year, included in statement of operations | \$ (32,908) | \$ - |

This mark-to-market change of \$32,908 for the period was charged to the statement of operations.

The Company identified embedded derivatives related to the Convertible Promissory Note issued in January 2020, for \$7,000, with these embedded derivatives including certain conversion features. The accounting treatment of derivative financial instruments requires that the Company record the fair value of the derivatives as of the inception date of the Convertible Promissory Notes and to adjust the fair value as of each subsequent balance sheet date. At the inception of the Convertible Promissory Notes, the Company determined a fair value for the embedded derivative using the Black Scholes Model based on the following assumptions:

| | |
|----------------|--------|
| Dividend yield | 0.00% |
| Volatility | 66.11% |
| Risk-free rate | 1.67% |

The initial fair value of the embedded debt derivative was \$36,921. This amount was allocated as a debt discount up to the proceeds of the notes of \$7,000, to be amortized over the life of the Convertible Loan Notes. The remaining balance of \$29,921 was charged to operations as a loss on change in fair value of the derivative liability.

The fair value of the embedded debt derivative was reviewed at June 30, 2020, using the following inputs:

| | |
|----------------|--------|
| Dividend yield | 0.00% |
| Volatility | 58.03% |
| Risk-free rate | 0.38% |

The fair value of the embedded debt derivative at June 30, 2020 was \$233,114, a decrease in the valuation of the embedded debt derivative of \$383,380 for the period.

The following table provides a summary of changes in fair value of the Company's Level 3 derivative liabilities for the six months ending June 30, 2020:

| | June 30, 2020 | December 31, 2019 |
|--|---------------|-------------------|
| Balance, beginning of period | \$ 579,573 | \$ - |
| Additions | 36,921 | 546,665 |
| Mark-to-market at modification date | 4,164 | 32,908 |

NOTE 10. STOCK OPTIONS AND WARRANTS

The Company does not have any stock options or warrants outstanding.

NOTE 11. INCOME TAXES

The Company uses the assets and liability method of accounting for income taxes pursuant to SFAS No. 109 "Accounting for Income Taxes". Under the assets and liability method of SFAS No. 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

In June 2006, the FASB issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes." Specifically, the pronouncement prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken from year ended December 31, 2015 tax return onwards. The interpretation also provides guidance on the related derecognition, classification, interest and penalties, accounting for interim periods, disclosure and transition of uncertain tax positions. The Company adopted this interpretation effective on inception.

The Company has made losses since inception and has a carry forward tax loss balance. The Company believes that no income tax is due to be paid by either the parent company or any of its subsidiaries as at the date of these financial statements.

NOTE 12. COMMITMENTS AND CONTINGENCIES

The Company believes that it has no commitments or contingencies to be disclosed as at June 30, 2020.
