COVID 19

The recent COVID-19 pandemic could have an adverse impact on the Company going forward. COVID-19 has caused significant disruptions to the global financial markets, which may severely impact the Company’s ability to raise additional capital and to pursue certain planned business activities. The full impact of the COVID-19 outbreak continues to evolve as of the date of this report and is highly uncertain and subject to change. Management is actively monitoring the situation but given the daily evolution of the COVID-19 outbreak, the Company is not able to estimate the effects of the COVID-19 outbreak on its operations or financial condition in the next 12 months. There are no assurances that the Company will be able to meet its obligations, raise additional funds or continue to implement its planned business objectives to obtain profitable operations.

Basis of Presentation and Organization

This summary of significant accounting policies of SSHT S&T Group Ltd. (“the Company”) is presented to assist in understanding the Company’s financial statements. These accounting policies conform to accounting principles generally accepted in the United States of America and have been consistently applied in the preparation of the accompanying financial statements. While the Company has commenced generating revenues from its principal business purpose during the most recently completed quarter ended June 30, 2024, we remain in the development stage in accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic No. 915 (SFAS No. 7). The Company has elected a fiscal year end of December 31.

The accompanying financial statements are prepared on the basis of accounting principles generally accepted in the United States of America (“GAAP”). The accompanying financial statements have been prepared assuming the continuation of the Company as a going concern.

The Group’s ability to continue as a going concern is dependent upon its ability to obtain additional financing and to generate revenue and cash flow to meet its obligations on a timely basis. The Company expects to finance its operations primarily through cash flow from revenue and continuing financial support from a shareholder. In the event that we require additional funding to finance the growth of the Company’s current and expected future operations as well as to achieve our strategic objectives, the shareholder has indicated the intent and ability to provide additional financing. The Group will focus on the

following activities: (1) improve operational efficiency, and enhance marketing function; (2) seek to raise additional funding through debt or equity financing. Based on cash flows projection from operating and financing activities and existing balance of cash and cash equivalents, management concludes that the Company has sufficient funds for sustainable operations and it will be able to meet its payment obligations from operations and debt related commitments for the next twelve months from the issuance of the consolidated financial statements.

Based on the above considerations, the accompanying financial statements have been prepared in accordance with U.S. GAAP, on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The financial statements do not include any adjustments relating to the recoverability and classification of asset and amounts and classification of liabilities that may be necessary should the Company be unable to continue as a going concern.

Note 2 – Summary of significant accounting policies

Principals of Consolidation

The unaudited condensed consolidated financial statements include the accounts of the Company and its 100% controlled subsidiaries: Wahoo Holdings Ltd., a British Virgin Islands corporation, and Shanghai Jieshi Management Consulting Co., Ltd. a Chinese corporation. All significant intercompany balances and transactions have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant items subject to estimates and assumptions include timing of recognition of commission revenue on insurance policy renewals and expenses related thereto, along with costs associated with policy acquisition and our allowance for doubtful accounts. Actual results could differ from those estimates.

Cash and Cash Equivalents

For purposes of reporting within the statement of cash flows, the Company considers all cash on hand, cash accounts not subject to withdrawal restrictions or penalties, and all highly liquid debt instruments purchased with a maturity of three months or less to be cash and cash equivalents.

Share-based compensation

We account for stock-based compensation in accordance with ASC 718, *Compensation – Stock Compensation*. Under the fair value recognition provision of this guidance, share-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period and reduced for actual forfeitures in the period they occur. Stock-based compensation is included as consulting expenses in our consolidated statements of operations.

Acquisition

The Company accounts for business combinations in accordance with Accounting Standards Codification (“ASC”) 805, Business Combinations. The results of businesses acquired in a business combination are included in the Company’s consolidated financial statements from the date of the acquisition. Purchase accounting results in assets and liabilities of an acquired business generally being recorded at their estimated fair values on the acquisition date. Any excess consideration over the fair value of assets acquired and liabilities assumed is recognized as goodwill. Transaction costs associated with business combinations are expensed as incurred and are included in general and administrative related costs in the consolidated statements of operations. The Company performs valuations of assets acquired and liabilities

assumed and allocates the purchase price to its respective assets and liabilities. Determining the fair value of assets acquired and liabilities assumed requires management to use significant judgment and estimates.

Accounts Receivable

The Company's accounts receivables arise from provision of services to customers and reimbursements for our of pocket costs invoiced to customers. In general the Company invoices for services rendered at the time the service is provided or the cost incurred. In the event the Company does have accounts receivable, the Company will evaluate each reporting period to provide a reserve against accounts receivable for estimated losses that may result from a customer's inability to pay based on customer-specific analysis and general matters such as current assessments of past due balances, economic conditions and forecasts, and historical credit loss activity. Amounts determined to be uncollectible will be charged or written-off.

Revenue Recognition

The Company has adopted ASC 606 — Revenue from Contracts with Customers. Under ASC 606, the Company recognizes revenue from service related agreements and contracts by applying the following steps: (1) identify the contract with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to each performance obligation in the contract; and (5) recognize revenue when each performance obligation is satisfied. Customers are billed for services in installments as they are performed either based on agreed contract terms or on a monthly basis for those clients to whom we provide recurring monthly services.

Property and Equipment, Net

Property and equipment are stated at cost less accumulated depreciation and amortization. Depreciation of property and equipment is computed using the straight-line method over their estimated useful lives of five to seven years for furniture and equipment and three to five years for computer hardware and software. Leasehold improvements are amortized on a straight-line basis over the lesser of their useful life or the term of the lease. Upon retirement or sale, the cost and related accumulated depreciation or amortization are removed from the Condensed Consolidated Balance Sheets and the resulting gain or loss is reflected in the Condensed Consolidated Statements of Operations. Repairs and maintenance are expensed as incurred

Goodwill and Other Long-Lived Assets

Goodwill represents the excess of the cost of an acquired business over the fair value of the identifiable tangible and intangible assets acquired and liabilities assumed in a business combination.

In accordance with guidance within FASB ASC 350 "Intangibles - Goodwill and Other," goodwill and identifiable intangible assets with indefinite lives are not subject to amortization but must be evaluated for impairment.

We evaluate long-lived assets, including finite-lived intangible assets, for impairment by comparison of the carrying amounts to future net undiscounted cash flows expected to be generated by such assets when events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Should an impairment exist, the impairment loss would be measured based on the excess carrying value of the asset over the asset's fair value or estimates of future discounted cash flows.

For goodwill and indefinite-lived intangible assets, in-process research and development, we review for impairment annually and upon the occurrence of certain events as required by ASC Topic 350, "Intangibles — Goodwill and Other." Goodwill and indefinite-lived intangible assets are tested at least annually for impairment and more frequently if events or changes in circumstances indicate that the asset might be impaired. We review goodwill for impairment by first assessing qualitative

factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. If we are able to determine that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, we would conclude that goodwill is not impaired. If the carrying amount of a reporting unit is zero or negative, the second step of the impairment test is performed to measure the amount of impairment loss, if any, when it is more likely than not that a goodwill impairment exists.

Basic and Diluted Net Income (Loss) Per Share

The Company computes net income (loss) per share in accordance with ASC 260, *Earning per Share*. ASC 260 requires presentation of both basic and diluted earnings per share (EPS) on the face of the income statement. Basic EPS is computed by dividing net income (loss) available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted EPS gives effect to all dilutive potential common shares outstanding during the period using the treasury stock method and convertible preferred stock using the if-converted method. In computing Diluted EPS, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted EPS excludes all dilutive potential shares if their effect is anti-dilutive. At June 30, 2024 there were no potentially dilutive shares.

Fair Value of Financial Instruments

FASB ASC 820, Fair Value Measurements and Disclosures, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. FASB ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. FASB ASC 820 describes three levels of inputs that may be used to measure fair value:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are financial instruments whose values are determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant judgment or estimation.

If the inputs used to measure the financial assets and liabilities fall within more than one level described above, the categorization is based on the lowest level of input that is significant to the fair value measurement of the instrument.

Foreign Currency

Translation and Remeasurement Items included in the condensed consolidated financial statements of the Company and its subsidiaries are measured using the currency of the primary economic environment in which the entity operates (the 'functional currency'). The Company's reporting currency is the U.S. dollar. The functional currency of subsidiaries based in China is the RMB. Companies based in the British Virgin Islands operate in US Dollars. All transactions initiated in RMB are translated into U.S. dollars in accordance with Accounting Standards Codification ("ASC") 830-30, "Translation of Financial Statements," as follows: monetary assets and liabilities are translated into U.S. dollars at exchange rates as of the balance sheet date and non-monetary assets, liabilities and equity are translated at historical rates. Sales and expenses are translated using a weighted average exchange rate for the period. All resulting exchange differences are recognized as other comprehensive income, a separate component of equity.

Income taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and net operating loss and credit carryforwards. Deferred tax assets and liabilities are measured at rates expected to apply to taxable income in the years in which those temporary differences and carryforwards are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the statement of operations in the period that includes the enactment date. A valuation allowance is recorded when it is not more likely than not that all or a portion of the net deferred tax assets will be realized.

Recently issued accounting pronouncements

The Company has reviewed other recently issued accounting pronouncements and plans to adopt those that are applicable to it. The Company does not expect the adoption of any other pronouncements to have an impact on its results of operations or financial position.

Note 3 – Acquisitions

On December 5, 2022, the Company entered into an agreement with Wahoo Holdings Ltd., a British Virgin Islands corporation (“WHL”), whereunder the Company acquired 100% ownership interest in WHL for the issuance of 10,000,000 shares of the Company’s common stock. WHL through its China based subsidiaries, Shanghai Jieshi Management Consulting Co., Ltd. provides business consulting services and using a team of accounting and finance professionals offers its clients capital market research, back office support, financial accounting, listing support and support for mergers and acquisitions. The transaction closed effective December 08, 2022 and has been treated as a business combination under common control.

The assets acquired were recorded based on their historical cost, and the excess paid over the parent’s basis of the net assets acquired was recorded to equity.

Note 4 – Related Party Transactions

During the year ended June 30, 2024, Mr. Zonghan Wu advanced a total of US\$130,094 to the Company in the form of an interest free demand loan for payment of administrative expenses and legal fees, which amount remains due and payable. This loan is unsecured, non-interest bearing, and has no specific terms for repayment

Note 5 – Equity

On December 08, 2022, the Company issued 10,000,000 shares of common stock with respect to the acquisition of Wahoo Holdings Ltd, (BVI) discussed in Note 3 above.

As of June 30, 2024, the Company is authorized to issue 1,000,000,000 shares of common stock with a par value of \$0.001. All shares have equal voting rights, are non-assessable, and have one vote per share. The total number of shares of Company common stock issued and outstanding as of June 30, 2024 and December 31, 2023, was 109,903,473 and 109,903,473 shares, respectively.

Note 7 - Subsequent Event

Management has evaluated subsequent events through the date of this filing. All subsequent events requiring recognition as of June 30, 2024 have been incorporated into these financial statements and there are no subsequent events that require disclosure in accordance with FASB ASC Topic 855, “Subsequent Events”.
