DPOLLUTION INTERNATIONAL, INC.
(Formerly: RAM GOLD & EXPLORATION, INC.)

QUARTERLY REPORT

For Period Ending December 31, 2010

Table of Content

Item 1: I. Exact name of the Issuer:
DPOLLUTION INTERNATIONAL, INC.

II. Address of its principal executive offices:
4141 Sherbrooke St. W, # 200, Westmount QC, Canada, H3C 1B8

III. Jurisdiction and date of the issuer's incorporation:
Incorporated in the State of Delaware on February 6, 1987.

Item 2: Shares Outstanding

THE NUMBER OF SHARES OR TOTAL AMOUNT OF SECURITIES OUTSTANDING:

Common voting shares:

(i)	Period end date:	December 31, 2010
(ii)	Authorized shares:	200,000,000
(iii)	Outstanding shares:	176,533,964
(iv)	Freely tradable shares:	51,533,964
(v)	Shareholders:	

121 beneficial Shareholders of record . 2,175 shareholders
Attributed to the booked entry holders of record of the former
Ice Holding Inc. for a total 2,296 approximately

Preferred shares:

(i)	Period end date:	December 31, 2010
(ii)	Authorized shares:	10,000,000
(iii)	Outstanding shares:	None
(iv)	Freely tradable shares:	None
(v)	Total beneficial shareholders:	None
(vi)	Total shareholders of record:	None

Item 3: Interim financial statements

Attached under Item 8 A) below

Item 4: Management's discussion and analyses of plan of operation.

About dPollution International Inc.

DPollution (PINK SHEETS: RMGX) owns the exclusive manufacturing and distribution rights to a patented fuel-conditioning technology that reduces polluting emissions and increases mileage. DPollution's innovative products improve engine performance by using fuel to combust more efficiently and completely. The technology works on all closed-combustion engines, including those used in cars, trucks, buses, trains and heavy equipment.
For more information, visit www.dPollution.com.

Growth in Management Strength

We believe the ultimate success of a company is directly related to the strength of its top management. To this end, we have conducted an extensive executive search for senior talent to join our team in a variety of roles and will soon announce the appointing of our new team.

Initial Sales

On December 07,2010 a letter of Intent was signed with the Suriname Ministry for an initial purchase of 1,000 units of the DPollution device.

On December 08, 2010 the company received a request to supply 3,000 units of the DPollution device to Stem Italia S.R.L. of Rome, Italy.
On January 26, 2011 the company announced the scheduled delivery of a first shipment of1,000 units of its DPollution device to Stem in Italy.

Strong Sales Initiatives

DPollution has a strong pipeline of sales opportunities in various stages of development with large international customers. In the days and weeks ahead, we will be announcing the details of these agreements, which include:

- A bus transportation service for one of Europe's largest tourist cities, which has requested a quote for 3,000 units.

- A government request for the purchase of 100,000 units, destined for one of the world's most polluted cities.

- The demonstration and testing of the dPollution Device on municipal vehicles in the City of Fort Myers, Florida.

- In addition, dPollution is reviewing several potentially lucrative international testing and sales opportunities in CARICOM Member countries.

- On January 20, 2011 the company announced the signing of a three year business advisory agreement with the Mercosur Common Market, a South American Economic Trade Zone.

New Product Developments

We are close to unveiling a host of advances and developments to our dPollution Device, including:

- Expansion of our product suite to address additional industry vertical and new markets.

- Integration and implementation of new intelligent sensor technology.

- Hardware updates to reflect our use of smaller components allowing for different product applications.

Ongoing Testing, Research and Development

Top internationally recognized, independent research facilities have been supplied the DPollution Device for testing and validation purposes. We anticipate announcing test results in the coming months in the areas of:

- Diesel transport truck engines
- Diesel train engines
- Government vehicles (including consumer vehicles)

Following Test Results were achieved:

- Announced breakthrough independent research, conducted by chemist Domenico Chiovitti (Order Des Chimistes -1979-144) at the OTI Canada Group research facility in Montreal, showing that the dPollution Device "cracks" longer-chain hydrocarbons into shorter molecules, resulting in fuel that burns more completely and efficiently.

- Reported that VM Motori of Italy, one of the world's leading manufacturers of diesel engines, conducted independent research showing that the dPollution

Device delivered significant improvements in engine fuel consumption, torque, temperature and power.

- Reported that Engine System Development Centre (ESDC), a leading applied research center dedicated to large-bore diesel engines, conducted independent research showing that the dPollution Device reduced the mass emission rate of total hydrocarbons (THC) by 12.9%; the rate of carbon monoxide (CO) by 7.4%; and the rate of particulate matter (PM) by 6.5%.

- Reported that Environmental Research & Development Corp., an Environmental Protection Agency (EPA)-approved research facility in Maryland, conducted independent research based on EPA protocols showing that the dPollution Device reduced emissions substantially, while also improving fuel economy

Continued Intellectual Property Protection

A new patent was filled in Italy which reflects the changes that were made on the Dpollution Technolgy

In Summary

DPollution is pleased at the advances it is making on numerous fronts to build its business and reward its shareholders. In the coming months, the company anticipates that third-party research validations of its technology will substantially escalate demand for its products and open up many new opportunities for sales and expansion.

The Company will provide continued updates on dPollution's progress

A. Management's Discussion and Analyses of Financial Condition and Results of Operations.

1. Full fiscal years.

In the past the Company depended on Loans by Shareholders and Related Parties as well as financings.
The Company will at present and for the coming six months require additional funding to augment shortfall in income from the present

Operation. Based on present income the Company believes that within six months it will sustain its operations from its sales revenues.

i. Any known trends, events or uncertainties that have or are reasonably likely to have a material impact on the issuer's short-term or long-term liquidity;
With the world community and governments looking to greener and more efficient energy, expectations for increased sales and future profits are well justified, especially also as present estimates are based on the present downturn of the world economy which shows signs of recovery.

ii. Internal and external sources of liquidity;
The Issuer is able to finance its interim requirements through loans from Shareholders and Related Parties. The issuer also has a good relationship with its bank.

iii. Any material commitments for capital expenditures and the expected sources of funds for such expenditures;
N/A

iv. Any known trends, events or uncertainties that have had or that are reasonably expected to have a material impact on the net sales or revenues or income from continuing operations;
No

v. Any significant elements of income or loss that do not arise from the issuer's continuing operations;
No

vi. The causes for any material changes from period to period in one or more line items of the issuer's financial statements;
Through the addition of new products, sales will increase.

vii. Any seasonal aspects that had a material effect on the financial condition or results of operation.
No

2. Interim Periods.

Since the issuer only acquired the subsidiary on June 10, 2010 the Company will see its revenues increase during the coming period comparable to the same period of last year’s fiscal period.

B. Off-Balance Sheet Arrangements.

Not applicable; the issuer has no off-balance sheet arrangements.

Item 5: Legal proceedings.

There are no legal proceedings either by the Company or against the Company.

Item 6: Defaults upon senior securities.

N/A

Item 7: Other information.

N/A

Item 8: Exhibits.

Quarterly Statements to December 31, 2010 (unaudited)

DPOLLUTION INTERNATIONAL, INC.

(formerly Ram Gold & Exploration, Inc.)

CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(Unaudited)

December 31, 2010

Responsibilities for Financial Statements

The consolidated financial statements for Dpollution International, Inc. have been prepared by management in accordance with accounting principles generally accepted in the United States of America. These consolidated financial statements, which are the responsibility of management, are unaudited and have not been reviewed by the Company's auditors. Management believes the financial statements are free of material misstatement and present fairly, in all material respects, the financial position of the Company as at December 31, 2010 and the period from inception of development stage to December 31, 2010 and the results of its operations and its cash flows for the periods then ended.

DPOLLUTION INTERNATIONAL, INC.
(Formerly Ram Gold & Exploration, Inc.)
(A Development Stage Company)
Notes to Consolidated Financial Statements

NOTE 1 – NATURE OF BUSINESS

DPOLLUTION INTERNATIONAL, INC. (the "Company") (formerly Ram Gold & Exploration, Inc.) was incorporated under the laws of the State of Delaware on February 6, 1987 under the name of Shopping at Home television Network, Inc. In September, 1987, the Company changed its name to TV Net, Inc. In February, 1989 the Company changed its name to Vegas Chips, Inc. In October, 1996 the Company changed its name to Skydoor Media and Entertainment, Inc. and then to Ice Holdings, Inc. In 1997 Ice Holdings, Inc. was formed in the State of Nevada and in 1999, Ice Holdings, Inc (Nevada) merged with Ice Holdings, Inc. (Delaware) with Ice Holdings, Inc. (Nevada) becoming the survivor of the merger. In September, 2006, the Company changed its name to Gaia resources, Inc. and in January, 2008 the Company changed its name to Ram Gold & Exploration, Inc. On July 27, 2010 the Company changed its name to Dpollution International, Inc. Since the disposal of the Company's assets and the cessation of operations, majority control of the Company changed several times between 1995 and 2008.
In September, 2006, the Company approved a forward stock split of 1.010:1 with all fractional shares rounded to 100 shares.
A change in Capitalization was filed on September 1, 2006 from 50 million common shares at $0.001 par value to 210 million shares at $0.0001 par value. The shares were divided into two classes – 200 million common shares authorized and 10 million preferred shares authorized. The preferred shares may be divided in various series. There are currently no issued or outstanding preferred shares.
In February, 2008, the Company approved a reverse stock split of 1:50 with all fractional shares being rounded up to 100 shares.
On July 10, 2010 the Company acquired 100% ownership in Dpollution Inc., a private company operating in Quebec, Canada that owns and controls technologies for pollution reduction and improved vehicle fuel mileage.

NOTE 2 – GOING CONCERN

These interim consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles, on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has incurred losses since inception of development stage of $496,127and has a working capital deficit of $496,127. Further losses are anticipated in the development of its business and there can be no assurance that the Company will be able to achieve or maintain profitability.

The continuing operations of the Company and the recoverability of the carrying value of assets is dependent upon the ability of the Company to obtain necessary financing to fund its working capital requirements, and upon future profitable operations. The accompanying financial statements do not include any adjustments relative to the recoverability and classification of asset carrying amounts or the amount and classification of liabilities that might result from the outcome of this uncertainty.

There can be no assurance that capital will be available as necessary to meet the Company's working capital requirements or, if the capital is available, that it will be on terms acceptable to the Company. The issuances of additional equity securities by the Company may result in dilution in the equity interests of its current stockholders. Obtaining commercial loans, assuming those loans would be available, will increase the Company's liabilities and future cash commitments. If the Company is unable to obtain financing in the amounts and on terms deemed acceptable, the business and future success may be adversely affected.

NOTE 3 – SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

These interim consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States

Development Stage Company

The Company complies with Financial Accounting Standards Board Statement No. 7 and Securities and Exchange Commission Act Guide 7 for its characterization of the Company as development stage.

Principles of consolidation

The accompanying consolidated financial statements include all of the accounts of the Company and its wholly-owned subsidiary Dpollution Inc. All intercompany balances and transactions have been eliminated.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation.

Cash and Cash Equivalents

Cash and cash equivalents are defined as cash on hand, demand deposits and short-term, highly liquid investments with an original maturity of ninety days or less.

Financial instruments

As of December 31, 2010, the Company's financial instruments consist of cash, accounts payable, due to related party and shareholder advances. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments. Because of the short maturity of such liabilities the fair value of the financial instruments approximates their carrying value, unless otherwise noted.

Technology

The Company periodically reviews the carrying value of intangible assets not subject to amortization, including Technology, to determine whether impairment may exist. Statement of Financial Accounting Standards No. 142, Technology and Other Intangible Assets (“FAS 142”) requires that Technology and certain intangible assets be assessed annually, or when certain triggering events occur, for impairment using fair value measurement techniques. These events could include a significant change in the business climate, legal factors, a decline in operating performance, competition, sale or disposition of a significant portion of the business, or other factors. Specifically, Technology impairment is determined using a two-step process. The first step of the Technology impairment test is used to identify potential impairment by comparing the fair value of a reporting unit with its carrying amount, including Technology. The estimates of fair value of a reporting unit are determined using various valuation techniques with the primary technique being a discounted cash flow analysis. A discounted cash flow analysis requires one to make various judgmental assumptions including assumptions about future cash flows, growth rates, and discount rates. The assumptions about future cash flows and growth rates are based on the Company's budget and long-term plans. Discount rate assumptions are based on an assessment of the risk inherent in the respective reporting units. If the fair value of a reporting unit exceeds its carrying amount, Technology of the reporting unit is considered not impaired and the second step of the impairment test is unnecessary. If the carrying amount of a reporting unit exceeds its fair value, the second step of the Technology impairment test is performed to measure the amount of impairment loss, if any. The second step of the Technology impairment test compares the implied fair value of the reporting unit's Technology with the carrying amount of that Technology. If the carrying amount of the reporting unit's Technology exceeds the implied fair value of that Technology, an impairment loss is recognized in an amount equal to that excess. The implied fair value of Technology is determined in the same manner as the amount of Technology recognized in a business combination. That is, the fair value of the reporting unit is allocated to all of the assets and liabilities of that unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid to acquire the reporting unit. The Company's evaluation of Technology completed during the six months ended December 31, 2010 resulted in no impairment losses.

Revenue Recognition

The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectability is probable. These criteria are generally met at the time product is shipped or services are performed.

All sales are final and returns are not accepted. All sales are paid at the time the products are delivered.

Basic and diluted net loss per share

The Company computes net loss per share in accordance with SFAS No. 128, "*Earnings per Share*". SFAS No. 128 requires presentation of both basic and diluted earnings per share ("EPS") on the face of the income statement. Basic EPS is computed by dividing net loss available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted EPS gives effect to all potentially dilutive common shares outstanding during the period using the treasury stock method and convertible preferred stock using the if-converted method. Diluted EPS excludes all potentially dilutive shares if their effect is anti-dilutive. For the nine months ended December 31, 2010 and 2009, potential dilutive securities had an anti-dilutive effect and were not included in the calculation of diluted net loss per common share.

Income taxes

The asset and liability approach is used to account for income taxes by recognizing deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax basis of assets and liabilities. The Company records a valuation allowance to reduce the deferred tax assets to the amount that is more likely than not to be realized.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenue and expenses during the period. Actual results may differ from those estimates.

Recent accounting pronouncements

During the year ended March 31, 2009 and subsequently, the Financial Accounting Standards Board (“FASB”) has issued a number of financial accounting standards, none of which did or are expected to have a material impact on the Company’s results of operations, financial position, or cash flows, with exception of:

SFAS No. 157. In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (“SFAS No. 157”). This statement defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements, but does not require any new fair value measurements. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. In February 2009, the FASB issued FASB Staff Position, or FSP, No. FAS 157-2, *Effective Date of FASB Statement No. 157* (“FSP FAS 157-2”), which delayed the effective date of SFAS No. 157 for certain nonfinancial assets and liabilities to fiscal years beginning after November 15, 2009, and interim periods within those fiscal years. The Company adopted SFAS No. 157 for the Company’s financial assets and liabilities in the first quarter of fiscal 2009, and provisions for nonfinancial assets and liabilities in the first quarter of fiscal 2010, which did not result in recognition of a transaction adjustment to retained earnings or have a material impact on the Company’s financial condition, results of operations or cash flows.

SFAS No. 165. In May 2009, the FASB issued SFAS No. 165, *Subsequent Events* (“SFAS No. 165”). This statement provides guidance to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before the financial statements are issued or are available to be issued. This statement is effective for interim or fiscal periods ending after June 15, 2009, and is applied prospectively. The Company adopted SFAS No. 165 in the year ended June 30, 2009; this adoption did not have any impact on the Company’s financial condition, results of operations or cash flows.

SFAS No. 168. In June 2009, the FASB issued SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally of Generally Accepted Accounting Principles — a Replacement of FASB Statement No. 162 (“SFAS No. 168”). SFAS No. 168 establishes the FASB Accounting Standards Codification as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. SFAS No. 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Company adopted SFAS No. 165 in the quarter ended December 31, 2009; this adoption did not have any impact on the Company’s financial condition, results of operations or cash flows.

NOTE 4 – ACQUISITION OF DPOLLUTION INC.

On July 10, 2010 the Company signed a definitive agreement with Dpollution Inc., a private company operating in Quebec, Canada to acquire 100% interest in Dpollution Inc. by issuing 125,000,000 common shares of the Company. The common shares issued were valued at $1,250,000 at an estimated value of $0.01 per share. At the time of the acquisition Dpollution Inc. had a zero net book value. As a result the share value of $1,250,000 is recorded as Technology.

NOTE 5 – SHAREHOLDER ADVANCES– RELATED PARTY TRANSACTIONS

During the nine months ended December 31, 2010 the Company had net advances of
$ 814,489 from Shareholders of the Company, which is outstanding at December 31, 2010. The balance owed is unsecured, non-interest bearing.
Note 5a : These loans are debt conversions to be converted to restricted shares under rule 144 one year following the reception at the market rate .
Note 5b : These loans are debt conversions to be converted after one year following the reception at a rate of ($0.03) which was the market rate June 2010.

NOTE 6 - STOCKHOLDERS' EQUITY

Preferred Stock

On September 1, 2006, the stockholders of the Company approved the creation of a class of 10,000,000 shares of preferred stock, and authorized the Board of Directors to establish and designate the number of shares and relative rights, preferences and limitations of such preferred stock. As at December 31, 2010, there are no issued and outstanding preferred shares.

Common Stock

As at December 31, 2010 the Company's common stocks are:

- 200,000,000 shares authorized at par value of $0.0001;
- 176,533,964 issued and outstanding.

During the nine months ended December 31, 2010 the Company issued 125,000,000 shares of the Company's common stock for acquisition of 100% ownership in Dpollution Inc.

NOTE 7 – SUBSEQUENT EVENTS

None

Item 8: Certifications

I, Rocco Di Fruscia, certify that:

1. I have reviewed this quarterly disclosure statement of Dpollution International, Inc.

2. Based on my knowledge, this Information and Disclosure statement does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this disclosure statement; and

3. Based on my knowledge, the financial statements, and other financial information included or incorporated by reference in this disclosure statement, fairly present in all material respects the financial condition, results of operations and cash flows of the issuer as of, and for, the periods presented in this disclosure statement.

Signed this April 6, 2011th
