Baristas Coffee Company, Inc. ("BCCI") fiscal year end date is December 31st. Neither the issuer nor any of its predecessors has ever been in bankruptcy, receivership or any other similar proceeding.

The Company was originally formed as InfoSpi.com in 1996, and developed software programs, hired programmers and procured funding from a venture capital group prior to merging with Innovative Communications Technologies in 2001. At this time the company was renamed Innovative Communications Technologies, Inc. In 2009, Innovative Communications Technologies, Inc. was looking for new opportunities, as its discount long distance business was decreasing and winding down. Pangea was accumulating coffee shops, formulating a business model and procedures for the Baristas brand. On December 22, 2009, Innovative Communications Technologies, Inc. acquired greater than a 60% interest in Pangea Networks, Inc. ("Pangea"), DBA Baristas and Inc., for cash, stock, and other consideration, including numerous coffee stands in the greater Seattle area. In May of 2010, the Company changed its name to Baristas Coffee Company, Inc. The transaction was structured as a partial stock purchase. After the acquisition, the assets and operations were transferred to Innovative Communications Technologies, Inc., and it was renamed to Baristas Coffee Company. In April 2010, Pangea became inactive.

The Company is not in default on the terms of any indebtedness or financing arrangement requiring it to make payments, nor has it had a change of control.

In conjunction with the above discussed acquisition of Pangea, the acquisition of certain coffee shops and the conversion of debt to equity, the Company issued common stock shares that increased the number of shares outstanding by more than 10%. The Company effected a 20:1 reverse split resulting in the number of shares outstanding at June 30, 2010, being more than 10% less than the number of shares outstanding at December 31, 2009.

On March 15, 2017, the Company filed a Form 15-12G, Certificate and Notice of Termination of Registration under Section 12(g) of the Securities Exchange of the 1934 Act. The Form 15-12G terminates the registration of the Company's Common Stock which was registered under 12(g) of the Securities Exchange Act of 1934 on July 24, 2015.

Management’s Discussion and Analysis or Plan of Operation.

A. Plan of Operation. The Company has sold its last retail stands on June 2, 2017 and will focus on developing e-commerce and media opportunities. For the nine months ended September 30, 2017 and 2016, our revenues were \$205,759, and \$524,810 respectively, and we incurred a net loss of \$232,600 and \$1,064,544 for nine months ended September 30, 2017 and 2016, respectively. We have an accumulated deficit since inception of \$13,463,576

For the foreseeable future, our operating plan is dependent upon both the ability to conserve existing cash resources and the ability to obtain additional capital through equity financing and/or debt financing in an effort to provide the necessary funds and cash flow to meet our obligations on a timely basis and to execute our business plan. In the event that we are unable to conserve existing cash resources and/or obtain the additional and necessary capital, the Company may have to cease. This could materially impact the Company’s ability to continue as a going concern for a reasonable period of time.

Liquidity and Capital Resources

We have eliminated our operating coffee stands and reported \$205,759 of revenues for the nine months ended September 30, 2017 compared to three operating coffee stand and revenues of \$524,810 for the nine months ended September 30, 2016. Based on anticipated operating and administrative expenses, the Company will not have sufficient cash resources to finance its operations except for several months unless we are able to raise additional equity financing and/or debt financing in the immediate future. We have commenced, and will continue to pursue, efforts to raise additional equity financing and/or debt financing from a variety of sources and means. There are no assurances that we will be able to obtain any additional financing and, even if obtained, that such financing will be in a sufficient amount to be able to continue operations for a sufficient period until the Company is able to generate sufficient revenues and become profitable.

Basis of Presentation

The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America ("GAAP").

Reclassifications

Certain prior year amounts have been reclassified to conform to the current year presentation for comparative purposes.

Estimates and Assumptions

Preparing financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Examples include, but are not limited to, estimates for asset and goodwill impairments, stock-based compensation forfeiture rates, future asset retirement obligations, and inventory reserves; assumptions underlying self-insurance reserves and income from unredeemed stored value cards; and the potential outcome of future tax consequences of events that have been recognized in the financial statements. Actual results and outcomes may differ from these estimates and assumptions.

Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. At September 30, 2017 and December 31, 2016, the Company had \$8,894 and \$4,470 cash, respectively.

Marketable Securities

The Company's marketable equity securities have been classified and accounted for as available-for-sale. Management determines the appropriate classification of its investments at the time of purchase and reevaluates the designations at each balance sheet date. The Company classifies its marketable equity securities as either short-term or long-term based on the nature of each security and its availability for use in current operations. The Company's marketable equity securities are carried at fair value, with the unrealized gains or losses reported as a component of shareholder's equity except impairment.

Adjustments resulting from the change in fair value, included in accumulated other comprehensive income in shareholder's equity, were an unrealized gain on marketable securities of \$62 and \$-0- for the three months ended September 30, 2017 and 2016, respectively, and a \$20 gain of on marketable securities for the nine months ended September 30, 2017 and a unrealized loss on marketable securities of \$11 for the nine months ended September 30, 2016. In addition, the Company reported a realized gain on marketable securities of \$157,500 and a realized loss on marketable securities of \$155,588 for the nine months ended September 30, 2016.

Fair Value of Financial Instruments

The carrying amount of the Company's cash, accounts payables and accrued liabilities approximates their estimated fair values due to the short-term maturities of those financial instruments.

The Company has adopted a single definition of fair value, a framework for measuring fair value, and providing expanded disclosures concerning fair value whereby estimated fair value is the price to be paid for an asset or the amount to settle a liability in an orderly transaction between market participants at the measurement date. Accordingly, fair value is a market-based measurement and not an entity-specific measurement.

The Company utilizes the following hierarchy in fair value measurements:

Level 1 – Inputs use quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.

Level 2 – Inputs use other inputs that are observable, either directly or indirectly. These inputs include quoted prices for similar assets and liabilities in active markets as well as other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 – Inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset or liability.

	As at September 30, 2017 Fair Value Measuring Using				
	Carrying Value	Level 1	Level 2	Level 3	Total
Investments in Marketable Securities, available-for-sale	\$ 64	\$ 64	-	-	\$ 64
Total	\$ 64	\$ 64	-	-	\$ 64

	As at December 31, 2016 Fair Value Measuring Using				
	Carrying Value	Level 1	Level 2	Level 3	Total
Investments in Marketable Securities, available-for-sale	\$ 44	\$ 44	-	-	\$ 44
Total	\$ 44	\$ 44	-	-	\$ 44

Inventories

Inventories are stated at the lower of cost or market. Cost is computed using weighted average cost, which approximates actual cost, on a first-in, first-out basis. Inventories on hand are evaluated on an on-going basis to determine if any items are obsolete or in excess of future needs. Items determined to be obsolete are reserved for. The Company provides for the possible inability to sell its inventories by providing an excess inventory reserve. As at September 30, 2017 and December 31, 2016, the Company determined that no reserve was required.

Property, Plant and Equipment

Property, plant and equipment are carried at cost less accumulated depreciation. Cost includes all direct costs necessary to acquire and prepare assets for use, including internal labor and overhead in some cases. Depreciation of property, plant and equipment, which includes assets under capital leases, is provided on the straight-line method over estimated useful lives, generally ranging from 3 to 5 years for equipment and 5 years for buildings. Leasehold improvements are amortized over the shorter of their estimated useful lives or the related lease life, generally 5 years. For leases with renewal periods at our option, we generally use the original lease term, excluding renewal option periods, to determine estimated useful lives. If failure to exercise a renewal option imposes an economic penalty to us, we may determine at the inception of the lease that renewal is reasonably assured and include the renewal option period in the determination of the appropriate estimated useful lives. The costs of repairs and maintenance are expensed when incurred, while expenditures for refurbishments and improvements that significantly add to the productive capacity or extend the useful life of an asset are capitalized. When assets are retired or sold, the asset cost and related accumulated depreciation are eliminated with any remaining gain or loss recognized in net earnings.

The Company recorded \$1,380 and \$-0- depreciation for the three months ended September 30, 2017, and 2016, respectively, and \$6,040 and \$10,419 depreciation for the nine months ended September 30, 2017, and 2016, respectively.

Goodwill

We test goodwill for impairment on an annual basis, or more frequently if circumstances, such as material deterioration in performance or a significant number of store closures, indicate reporting unit carrying values may exceed their fair values. When evaluating goodwill for impairment, we may first perform a qualitative assessment to determine if the fair value of the reporting unit is more likely than not greater than its carrying amount. If we do not perform a qualitative assessment or if the fair value of the reporting unit is not more likely than not greater than its carrying amount, we calculate the implied estimated fair value of the reporting unit. If the carrying amount of goodwill exceeds the implied estimated fair value, an impairment charge to current operations is recorded to reduce the carrying value to the implied estimated fair value. There were no goodwill impairment charges recorded during the periods ended September 30, 2017 and 2016.

Other Intangible Assets

Definite-lived intangible assets, which mainly consist of acquired rights, trade secrets, trademarks and copyrights, are amortized over their estimated useful lives, and are tested for impairment when facts and circumstances indicate that the carrying values may not be recoverable. There were no intangible asset impairment charges recorded during the periods ended September 30, 2017 and 2016.

Long-lived Assets

Long-lived assets such as property, equipment and identifiable intangibles are reviewed for impairment whenever facts and circumstances indicate that the carrying value may not be recoverable. When required impairment losses on assets to be held and used are recognized based on the fair value of the asset. The fair value is determined based on estimates of future cash flows, market value of similar assets, if available, or independent appraisals, if required. If the carrying amount of the long-lived asset is not recoverable from its undiscounted cash flows, an impairment loss is recognized for the difference between the carrying amount and fair value of the asset. When fair values are not available, the Company estimates fair value using the expected future cash flows discounted at a rate commensurate with the risk associated with the recovery of the assets. On June, 2, 2017, the Company recorded an impairment charge for \$169,740 to write-off the remaining assets related to the coffee stands.

Revenue Recognition

The Company's revenues consist of sales by Company-operated coffee stores and e-commerce.

The Company recognizes revenues from the sales of our products or services using the following criteria for recognition:

- 1) Persuasive evidence of an arrangement exists;
- 2) delivery has occurred or services have been rendered;
- 3) the seller's price to the buyer is fixed or determinable, and
- 4) collectable is reasonably assured.

Barter transactions represent the exchange of Company services for other services. These transactions are recorded at the estimated fair market value of the services provided or the fair value of the services received, whichever is most readily determinable. Revenue is recognized on barter and trade transactions when the services are provided. Expenses are recorded ratably over a period that estimates when the service received is utilized, or when the event occurs. Barter and trade revenues and expenses from continuing operations are included in revenue and cost of revenues, respectively.

Marketing & Advertising

Advertising costs are expensed as incurred. Advertising costs totaled -0- and \$545 for the three months ended September 30, 2017, and 2016 respectively, and \$1,974 and \$8,785 for the nine months ended September 30, 2017, and 2016, respectively.

Stock-based Compensation

The Company accounts for employee stock-based compensation to employees, including grants of employee stock options, based on their fair values. The fair value of the equity instrument is charged directly to compensation expense and credited to additional paid-in capital over the period during which services are rendered.

Stock options and warrants issued to consultants and other non-employees are accounted for based upon the fair value of the services provided or the estimated fair market value of the option or warrant, whichever can be more clearly determined.

Stock-based expenses to employees and consultants for general and administration services totaled \$0 and \$102, for the three months ended September 30, 2017, and 2016, respectively, and \$0 and \$282,704, for the nine months ended September 30, 2017, and 2016, respectively.

Earnings per Share

Basic net loss per common share is computed using the weighted average number of common shares outstanding. Diluted earnings per share (EPS) include additional dilution from common stock equivalents, such as stock issuable pursuant to the exercise of stock options warrants and convertible notes. Common stock equivalents are not included in the computation of diluted earnings per share when the Company reports a loss because to do so would be anti-dilutive for periods presented. As of September 30, 2017, the Company has no options or warrants outstanding. At September 30, 2017, the total shares issuable upon conversion of convertible notes payable and to officers and directors would be approximately 50,739,000 shares of the Company's common stock.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued guidance codified in Accounting Standards Codification ("ASC") 606, "Revenue Recognition - Revenue from Contracts with Customers," which amends the guidance in ASC 605, "Revenue Recognition," and becomes effective beginning January 1, 2018. The Company is currently evaluating the impact of the provisions of ASC 606.

Accounting standards that have been issued by the FASB or other standards setting bodies that do not require adoption until a future date are being evaluated by the Company to determine whether adoption will have a material impact on the Company's financial statements.

NOTE 2 – GOING CONCERN

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates the realization of assets and the liquidation of liabilities in the normal course of business. As at September 30, 2017, the Company has a loss from operations of \$232,600 and an accumulated deficit of \$13,463,576. The Company intends to fund operations through equity financing arrangements, which may be insufficient to fund its capital expenditures, working capital and other cash requirements for the year ending December 31, 2017.

The ability of the Company to fully commence its operations is dependent upon, among other things, obtaining additional financing to continue operations, and execution of its business plan. In response to these concerns, management intends to raise additional funds through public or private placement offerings and through loans from officers and directors.

These factors, among others, raise substantial doubt about the Company's ability to continue as a going concern. The accompanying financial statements do not include any adjustments that might result from the outcome of this uncertainty. There can be no assurance that management's plan will be successful.
