The accompanying notes are an integral part of these financial statements

## TURNER VALLEY OIL & GAS CORPORATION

Notes to the Financial Statements  
March 31, 2017

### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### A. Organization

The Company was incorporated under the laws of Nevada on April 21, 1999 as NetParts.com. The Company was originally organized to create a series of 16 specialized auto salvage yards whereby the salvageable components would be inventoried on a computer and listed on the internet. The Company, however, changed their operations and its name on July 24, 2003 to Turner Valley Oil & Gas Corporation.

#### B. Revenue Recognition

Revenue from sales of crude oil, natural gas and refined petroleum products are recorded when deliveries have occurred and legal ownership of the commodity transfers to the customers. Title transfers for crude oil, natural gas and bulk refined products generally occur at pipeline custody points or when a tanker lifting has occurred. Revenues from the production of oil and natural gas properties in which the Company shares an undivided interest with other producers are recognized based on the actual volumes sold by the Company during the period

#### C. Oil and Gas Properties

The full cost method is used in accounting for oil and gas properties. Accordingly, all costs associated with acquisition, exploration, and development of oil and gas reserves, including directly related overhead costs, are capitalized. In addition, depreciation on property and equipment used in oil and gas exploration and interest costs incurred with respect to financing oil and gas acquisition, exploration and development activities are

Turner Valley Oil And Gas – Quarter Ended March 31, 2017  
3270 Sul Ross Houston, TX 77098 - Phone: 1-713-521-4205

capitalized in accordance with full cost accounting. All capitalized costs of proved oil and gas properties subject to amortization are being amortized on the unit-of-production method using estimates of proved reserves. Investments in unproved properties and major development projects not subject to amortization are not amortized until proved reserves associated with the projects can be determined or until impairment occurs. If the results of an assessment indicate that the properties are impaired, the amount of the impairment is added to the capitalized costs to be amortized.

#### D. Cash and Cash Equivalents

The Company considers all highly liquid investments with maturities of three months or less to be cash equivalents.

#### E. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. In these financial statements assets and liabilities involve extensive reliance on management's estimates. Actual results could differ from those estimates.

#### F. Financial Instruments

The recorded amounts of financial instruments, including cash equivalents, accounts receivable, accounts payable and short term notes approximate their market values as of March 31, 2016 and December 31, 2016. The Company has no investments in derivative financial instruments.

#### G. Basis of Presentation

These financial statements are presented in United States dollars and have been prepared in accordance with generally accepted accounting principles.

#### H. Accounts Receivable

Management reviews its accounts receivable on a regular basis. If an account

has a balance which is six months old, it is the policy of the company to record an allowance for doubtful accounts. The Company will continue to pursue all collection efforts. If at a later date, the account is deemed uncollectible, the account balance will be written off.

## **NOTE 2 - GOING CONCERN**

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has suffered recurring operating losses and is dependent upon raising capital to continue operations. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

The Company has agreed to participate in the program. The program was completed on October 15, 2003 and as of October 20, 2003, the new production rates have stabilized at 2.66 MMCF/Day, representing a 40% increase over initial production rates.

In addition to the preceding acquisition, the Company entered into a purchase agreement to acquire 0.5% interest in 10 Sections (6,400 acres) of drilling rights offsetting Sect. 22-38-9W-5. These offsetting sections have identified seismic anomalies in multiple cretaceous pay zones.

The terms of the Farm-Out agreement are as follows:
