

TBURN x DCP

The Intelligent Autonomous Economy

Revolutionizing Web 3.0 with Ultra-High-Speed Mainnet and AI-Driven Decentralized Spaces

1. Executive Summary

This business model combines the ultra-high-speed transaction processing capabilities of the TBURN mainnet, the distributed spatial technology of the Decentralized Cube Protocol (DCP), and the intelligent operation of Large-Scale Language Models (LLM). It aims to move beyond the speculative nature of the existing coin market and build an **"Independent Digital Nation"** ecosystem capable of real-world utility and real-time economic activity.

2. Key Business Models

2.1 Decentralized Hyper-Banking

Banks issue dedicated 'Financial Cubes' to customers via DCP. Asset management and consultations occur in a secure, decentralized space. TBURN ensures all transfers are processed in **5ms**.

- Revenue: Cube-as-a-Service (SaaS) fees and transaction commissions.

2.2 Real-Time Streaming Wealth Management

A **'Pay-per-Second'** economy. NexBot AI generates profits every second, which are streamed into user wallets in real-time using TBURN's micro-payment technology.

2.3 Enterprise Biz-Cube

Selling private economic zones as a package to corporations. Custom metaverse cubes with private altcoin issuance.

- Revenue: Setup fees, maintenance subscriptions, and on-chain transaction fees.

2.4 Creator House & CNS

'One Person, One Coin' economy. Free 'MyCube' distribution with paid CNS (Cube Name Service) domain registration (e.g., user.dcp).

3. Market Innovation & Comparison

Comparison Item	Legacy Web 3.0	TBURN x DCP Model
Issuance	Complex & Expensive	Instant AI-assisted creation
Speed / Finality	400ms ~ 12s (Slow)	5ms (Real-time)
Economic Unit	Single token per chain	Independent economy per Cube
Utility	Mostly Speculative	Real-use Utility (Streaming Pay)

4. Strategic Roadmap

Phase 1 — 2026 H1: Foundation & Security Audit. Release of real-time node maps.

Phase 2 — 2026 H2: LLM-based World Builder Beta launch. Altcoin marketplace activation.

Phase 3 — 2027 H1: Global Tier-1 Exchange listings. Full integration with real-world payment systems (Hybrid Web-Chain).

5. Financial Potential

Total Annual Opportunity

\$4.6B+ through diversified streams

Competitive Moat

Technical barrier of 520k TPS — non-replicable by Ethereum or Solana for streaming s

TBURN and DCP are not just providing a platform — they are building the infrastructure for the next century's digital economy. Join us in the era of **'Digital Daily Currency.'**
