### **Unisource Shareholder Update On Latest Corporate Activities**

Miami, FL — June 10, 2015, Unisource Corporate Corporation (OTC Markets: USRC) has issued the following statement to update shareholders on the latest corporate activities:

Since our acquisition of Top Flight Concepts in May of 2014, Unisource has focused on internal growth of our operations. This two-year operating plan, adopted in 2014, has achieved significant improvement in earnings results. For the fiscal year 2013, Unisource reported earnings of \$-0.02 per share. For the fiscal year 2014, we reported earnings of \$0.00 per share, or break even. Reported revenues during the period also increased dramatically. From a performance and EPS point of view, Unisource is now much stronger than a year ago. The company believes that this growth will continue to accelerate into 2016.

In a further effort to increase existing shareholder value, Unisource has not issued any new stock since the Top Flight Concepts deal was closed over a year ago. Moreover, no new shares have been registered as "free trading" for over 36 months.

Additionally, as announced at the end of 2014, Unisource has embarked on a total realignment of our operations. This has resulted in significant operational cost savings and overall margin improvements. Our final step in this process began on June 1, 2015, and it is our belief that this implementation will increase net margins as much as 25% over the next nine months. This includes the acquisition of multiple new, high-margin customers who we have not announced due to competitive concerns. All of these customers have signed multi-year service agreements with Unisource, which translates to significant and ever-increasing contracted revenue improvements to Unisource not just for 2015, but 2016 and 2017 as well. As an example of the potential revenue scale, one of these new customers is a New York Stock Exchange listed market-leading provider of wireless telecommunications services. Unisource software and services are now rolling out on a national basis with this client.

Unisource is also currently in discussions with another potential M&A target for a similar type of transaction as we achieved with Top Flight Concepts last year. Although not a completed deal, the company will continue to pursue these types of engagements, all of which have the potential to substantially increase shareholder value.
