Defense Technologies - Shareholder Update

Las Vegas, Nevada--(Newsfile Corp. – September 29, 2016) – Defense Technologies International Corp (OTCQB-DTII) (The Company), a developer of security technologies, issues a Shareholder Update.

DTII's subsidiary, 'Defense Technology Corporation' (DTC) is in the midst of completing its final testing of its advanced metal detection device, **The Offender Alert Passive Scan™** which will provide enhanced safety especially to schools, without any harmful effect to the students throughout their entire school life, due to our exclusive, advanced technology. Our scanner will detect any type of Firearm, Knives and other dangerous items and will equally serve sports stadiums and other venues around the country and the world.

Due to the recent rash of shootings in schools as today in South Carolina we are working feverishly to complete the final process so that we can provide alternative and enhanced safety measures for our children across the United States.

We anticipate having the final product for installation within 30 days and look forward to present our product in school districts across the United States.

Merrill W. Moses the CEO of Defense Technologies International Corp. commented: "I'm pleased and increasingly proud of what we portend to do in helping the public as well as the private education system. We know it's every school's moral directive to provide both Security and a sense of Safety for both the students and as well the hard-working staff".

"In our discussions with School Administrators, we've heard and felt that they each feel an inherent stewardship and responsibility over both their student body and as well their fellow educators. We at DTI wish to advance the schools ability to provide a sense of tranquility and safety by making available to them an affordable security detection system and to assist each school's efforts in providing for that same said 'Sense of Peace' by providing detection products that help insure that Moral Obligation is met".

As of August 30, 2016, the Company had approximately 26,196,056 common shares issued and outstanding, and was traded on the OTCQB exchange under the ticker symbol "DTII".

Forward-Looking Statements

This news release contains certain statements that may be deemed "forward-looking" statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in forward looking statements. Forward looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made. Except as required by law, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.
