

PRESS RELEASE

FOR IMMEDIATE RELEASE

November 19, 2013

**WORLDWIDE ACQUIRES INTEREST IN CYBER SECURITY COMPANY
Encryption Solutions, Inc. is next generation encryption software**

NEW YORK, NY, NOVEMBER 19, 2013 – Worldwide Internet, Inc. (OTC Pink: WNTR) announced today that it has completed the acquisition of an interest in Encryption Solutions, Inc.

The interest was acquired from an existing Encryption Solutions, Inc. shareholder, in a private transaction, in exchange for its Series C Preferred shares. The company also has an option to increase its ownership in Encryption Solutions, Inc. The company has authorized 45,000,000 shares of Series C Preferred, with a stated value of \$5.00 per shares to provide for up to \$225 million in acquisitions with minimum dilution to shareholders.

The phenomenal growth in digitizing information in certain industry sectors combined with an increased need for information security poses a strong market demand for products that can securely enable wireless networking and mobile communications, high speed file transfer (FTP/EDI) and email messaging. Healthcare, education, finance and banking, critical infrastructure such as energy, power and water, government entities and the TV, film and music industries are all impacted by the need for secure communications.

Encryption Solutions, Inc.'s SkyLOCK security solution utilizes an encryption system that is structurally and functionally unique and possesses distinct advantages over any currently marketed security product. The core technology is a proprietary and patent-pending algorithm that surpasses the standards of current encryption algorithms and provides for end-to-end, unbreakable and totally secure communications across both wireless and hard-wired networks.

Frank Kristan, President of Worldwide Internet, Inc stated that:

"We are continuing to complete acquisitions that will benefit shareholders and complement investments we have already made in cyber security. We are executing on our business plan and making acquisitions that will develop a diversified holding company. This will provide increased shareholder value and distributions to shareholders from our portfolio"
