

## APT Systems underscores need for NFTs backed with Gold as Real-World Assets

SAN FRANCISCO, CA— (03/03/2023) – **APT Systems, Inc.** (OTC Pink: **APTY**), a fintech company, focused on building a modern brand around its cryptocurrency and escrow has launched a new website to explore creating solid gold plates etched with the exciting artwork of NFTs. Transactions are made using the gold backed Spera stablecoin wallets.

This new website, geared towards the value that gold can add to a NFT collection, delivers information about our Gold NFT Minting program and how an NFT image can translate into a beautiful etching. Enhancements to the site include resources such as the historic value of gold objects. Real claim examples help explain the importance of real-world assets while embracing new blockchain technology and trends. We want to support artists interested in creating NFTs from their original artworks.

**BACKING AN ARTIST'S COLLECTION WITH GOLD**

### Create an NFT from your artwork then we mint it

An NFT is a unit of data stored on a digital ledger, called a Blockchain that certifies the digital asset is unique and can be purchased or traded. Non-Fungible Tokens can be used to represent items such as art, photos, video/audio recordings.

Pre-numbered 24KT gold plate is etched with an associated NFT image that arrives with a gold purity certificate and is registered separately on Blockchain for ownership security.

CEO Glenda Dowie says, “The NFT Gold Minting website encompasses what we stand for as a brand and our commitment to both blockchain and cryptocurrency markets. The site offers access to Spera stablecoin wallets as well as important resources supporting the historic importance of gold as an asset.”

APT Systems Inc (APTY) is in the middle by developing its own ecosystem that is offering everything from smart contract escrow options with payments made with Spera stablecoins. Spera remains in a good place due to our custodial arrangements and other safety measures employed in the design of the stablecoin. The gold asset commitment is expanded with the NFT gold plate production. Visit the new website at [www.NFTGoldMinting.com](http://www.NFTGoldMinting.com).

Be sure to follow us on **Twitter @APTYSys** for quick and timely updates.

### About APTY- APT Systems Inc:

APTY represents a software development and fintech company, focusing on our Verifundr escrow and payment services supported with a stablecoin named Spera (SPRA).

Visit [www.sperastablecoin.com](http://www.sperastablecoin.com) to read our white paper and learn more about SPRA stablecoin backed by U.S. currency and partially by gold.
