

FOR IMMEDIATE RELEASE

Verify Smart Corp Announces the Launch of Its New, Comprehensive Corporate Website

[Mahwah, NEW JERSEY, April 20, 2023] - Verify Smart Corp., a global leader in innovative solutions and services, is proud to announce the long-awaited and much anticipated launch of its new, state-of-the-art corporate website. The new platform showcases Verify Smart's commitment to continuous growth, transparency, and collaboration with stakeholders, clients, and partners worldwide.

Verify Smart, a renowned security solutions provider, owns the global patent license to two-factor and multi-factor authentication, 2FA and MFA, technologies, activating security precaution that adds an extra layer of protection to the user accounts, ensuring secure and seamless access. The cutting-edge 2FA and MFA technology secures important information and makes it more difficult for cybercriminals to gain unauthorized access to personal data reducing the likelihood of theft and cyber-crimes.

The new website offers visitors a user-friendly experience, with streamlined navigation, intuitive design, and enriched content tailored to meet the needs of our diverse clientele. The website's Newsroom is a dynamic hub for the latest press releases, encompassing corporate material events, litigation matters and updates, and other relevant news. This feature will provide easy access to critical information, ensuring transparency and fostering trust among our stakeholders.

A significant addition to the website is the introduction of a detailed Stakeholder Inquiry Form, designed to facilitate seamless communication and transparency. The form enables visitors to submit inquiries regarding the Company, its products and services, and corporate developments, ensuring their concerns are addressed promptly and efficiently by our dedicated management team.

Key features of the new website include:

1. Exclusive license of MFA technology information and patents: Verify Smart provides innovative technology through its exclusive global patent for Two-Factor and Multi-Factor Authentication (2FA and MFA). This disruptive technology patent verifies a user in an electronic transaction.
2. Newsroom: A comprehensive repository of press releases, including corporate material events, litigation matters and updates, allowing visitors to stay up-to-date on the latest developments at Verify Smart.

3. Detailed Stakeholder Inquiry Form: A user-friendly platform that enables visitors to submit inquiries and receive prompt, personalized responses from our knowledgeable management team.
4. Mobile-optimized design: The website is fully responsive and optimized for mobile devices, ensuring a seamless experience for visitors on-the-go.

Annamarie Seabright, VP of Communications for Verify Smart Corp., said, "The launch of our new website marks an important milestone in our commitment to transparency, communication, and customer service."

We invite you to visit the new Verify Smart Corp website at **www.verifysmart.net** and explore the information on our MFA technology, Newsroom and Inquiry Form to experience the enhanced features, functionality, and user-friendly platform firsthand.

About Verify Smart Corp.:

Verify Smart is a global leader in innovative solutions and services, catering to a diverse clientele across various industries. Verify Smart is a publicly traded company, OTC pink. In March of 2009, the Company changed its name to Verify Smart Corp. and commenced activity developing and selling internet security software for the prevention of credit and debit card fraud. Currently, the Company is providing innovative technology through its exclusive global patent for Two-Factor and Multi-Factor Authentication (2FA and MFA). This disruptive technology patent verifies a user in an electronic transaction. A United States patent (# 8,285,648 B2), a South Korean Patent (#10-1309594), and a Canadian patent (#2664680), along with a European patent pending (# EP2080158) was granted with Verify Smart securing exclusive global licensing rights.

"2FA and MFA" technology is currently used THOUSANDS of times every SECOND by nearly five (5) BILLION concurrent users across nearly ALL transactional platforms. The Company has licensed a multitude of financial institutions, telecommunications and crypto currency companies, as well as Microsoft.
