

FutureNet, Inc. Expands Reach with Acquisition of AcaPro Platform, Targets Southeast Asia, and Prepares for Shell Symbol Removal

We are thrilled to announce a series of transformative developments at FutureNet, Inc. that underscore our commitment to growth, transparency, and delivering long-term value to our stakeholders.

First and foremost, we are excited to share that FutureNet, Inc. is preparing for the removal of the shell symbol, a significant milestone that reflects our dedication to transparency and our continued evolution as a robust, operational entity.

In conjunction with this exciting development, we are pleased to announce the successful acquisition of AcaPro Platform, a pioneering venture owned and operated by Kiuyu Group Holdings Limited in Hong Kong. This acquisition marks a significant leap forward for FutureNet, Inc. as we solidify our presence in the automotive services sector and embark on a journey to revolutionize the industry.

AcaPro Platform:

AcaPro Platform is an innovative car service platform redefining the automotive maintenance landscape. Seamlessly connecting car maintenance shops, service providers, and car owners, AcaPro offers a standardized process for shops and ensures top-tier service quality for customers. With a transparent record-keeping system, additional services like pick-up and emergency road assistance, and advanced AI technology, AcaPro has already garnered over 20,000 active users in Shanghai alone.

Untapped Potential:

With an estimated annual car maintenance fee of RMB 4000 per owner across 81 target cities in China and assuming 1 million registered cars per city, the potential market size reaches a staggering RMB 324 Billion in fees. This presents an unparalleled opportunity for FutureNet, Inc. to further establish itself as a leader in the automotive service industry and generate substantial revenue growth.

Expansion Plans:

In addition to consolidating our presence in China, we are excited to announce our expansion plans into Southeast Asia. Leveraging the success of AcaPro Platform, we aim to duplicate this model and create a new ecosystem in the region. By targeting Southeast Asia, we are poised to tap into a rapidly growing market and capitalize on emerging opportunities in the automotive services sector.

The acquisition of AcaPro Platform and our expansion into Southeast Asia, combined with the impending removal of the shell symbol, mark the beginning of an exciting new chapter for FutureNet, Inc. We are confident that these strategic initiatives will position us for sustained growth, innovation, and success in the automotive services industry and beyond.
