SCHAUMBURG, Ill., June 26, 2024 /PRNewswire/ -- Kinetic Seas Inc. (OTC:ECGR) a leading AI consulting, educational, and hosting services company and Oasis AI Learning are proud to announce their new partnership to create a unique AI learning experience that brings together students, expert mentors, and high-level educational resources. Through a combination of Oasis' ability to effectively educate bright young students and the Kinetic Seas' expertise in the AI field, the two companies will work together to train the next generation of AI thinkers.

As part of the agreement, Kinetic Seas CEO Edward Honour will lead course development and instruction on behalf of Oasis in the areas of Data Science, Machine Learning, and Artificial Intelligence. Speaking on the matter, Honour said, "We are excited about this partnership with Oasis because as more companies begin to adopt AI in their business, the need for skilled technical resources will grow dramatically. The only way for those resources to be available when they are needed is to start training them now."

Oasis AI Learning Managing Director Robert Potter will be leading Oasis' intern recruitment and social media marketing. Bringing his experience as an expert in social media and digital marketing, Potter spoke on his new role saying, "I am excited to help interns master AI and stay updated with its constant advancements. Organizations will gain significantly by hiring future professionals well-versed in AI, ensuring a competitive edge, while interns will pave the way for successful and prosperous careers."

The new program, which is free for students, takes a comprehensive approach to learning. Not only do students learn high level AI skills and get to spend time on modern Nvidia GPUs, which are provided by Kinetic Seas, but they will also gain access to the Oasis' Mentor Network to help them learn business and life skills. Combining each companies' expertise, the partnership will produce new educational texts, videos, animations, graphics, and more all designed to lower the barriers to learning AI.

Additionally, Kinetic Seas and Oasis will join together to host AI Seminar events in major cities across the country. These teaching events will mean that truly any student will have the opportunity to gain experience from industry leaders. AI Seminars are also designed to be a vehicle for positive change in the world. By partnering with charities that lift up traditionally disenfranchised groups with initiatives that help promote minorities in STEM and school safety, the events will serve as a forum for raising money to help these worthy causes. In this way the two companies hope that their new partnership is about more than just teaching, but being Good Global Citizens that work to create a better and more equitable world.
