

AI Software demand expected to drive company growth in next 5 years. Company to benefit from 30% annual growth in AI software market.

RENO, NV, October 15, 2024. **Blue Star Opportunities Corp.** (The "Company") (OTC: **BSTO**), announces today that revenue projections for its AI applications are on track to benefit from increasingly favorable market conditions worldwide as AI revenues continue to outstrip all other software revenues in the information technology sector. According to analysis from the Gartner Group, the AI software market will reach a value of \$135 billion in 2025 with a significant acceleration in its growth. To be more precise, the AI market had grown by 14.4% in 2021, but growth will now jump to 31.1% by 2025, outpacing the growth of the overall software market.

The Company welcomes this confirmation that it can look confidently to positive market performance for its patient medication safety suite of intelligent apps, Diomedes AI. The Company is using recent advances in artificial intelligence to offer consumers the ability to monitor their own medication safety and help make up for any gaps by provider organizations as reported in recent studies. Our solutions were already using early forms of AI when the Diomedes legacy applications were tested in major tertiary care hospitals including McGill University affiliates, where it reduced medication errors by 80% as well as reducing inpatient mortality by 50%.

The next milestones for the company's Diomedes AI medication safety apps will be the expansion of use by individual consumers, strengthening security measures to safeguard users' personal information and setting up a support desk.

About Blue Star Opportunities Corp

Blue Star Opportunities Corp (OTC BSTO) deploys a deep bench of knowledge and expertise in developing AI driven systems for solving critical issues impacting people's health. The company's AI driven innovative solutions include apps for individuals to protect themselves against potentially deadly prescription errors, allergies and undesirable reactions. Our latest generation Diomedes applications provide online real time protection against prescription and over-the-counter drug risks.

FORWARD-LOOKING STATEMENTS: Except for historical information provided herein, this press release may contain information and statements of a forward-looking nature concerning the future performance of the Company. These statements are based on suppositions and uncertainties as well as on management best possible evaluation of future events. Such factors may include, without excluding other considerations, fluctuations in quarterly results, evolution in customer demand for Company products and services, the impact of price pressures exerted by competitors, and general market trends or economic changes. As a result, readers are advised that actual results may differ from expected results.
