American Defense Systems Inc. has just acquired a manufacturing equipment line from Aerojet/Rocketdyne to manufacture advanced Fire Suppressors for General Dynamics Land Systems (GDLS) Ground Combat Vehicle program. This major milestone allows ADSI to develop and expand our Fire Suppression business, which will allow us to deliver our SPFE products to GDLS in the 2nd QTR 2014. ADSI believes our Fire Suppression Program will have significant potential applications in both the Military and commercial industries.
