Napoleonville, LA IFUS:PK

IFUS CONDUCTS ZOOM CALL WITH BOARD MEMBERS OF THE NATIONAL DAIRY DEVELOPMENT BOARD OF INDIA

On Tuesday March 25, 2025 the IFUS scientific team participated in a zoom meeting with the Board members of the National Dairy Development Board of India (NDDB). The mission of NDDB is to promote within the farming community the latest technologies that are cost effective and more efficient. You can learn more about the NDDB by visiting their website at [Welcome to nddb.coop | nddb.coop](https://www.nddb.coop).

The Board has asked that once AGB is in production and can provide enough SGP+2.0™ for 25-30 cows, they will finance a test to confirm IFUS' claims that SGP+2.0™ contains adequate protein sources for bovine nutrition as well as reduces Carbon-footprint so as to generate Carbon Credits. "The original trial in India provided insight into these claims, but the Board wants to validate these with additional studies," said Marc Walther CEO. In the meantime, AGB will continue with their plans to build a footprint facility in the Surat India area with a view to providing the NDDB with sufficient SGP+2.0™ to conduct the testing. AGB will also work with the SUMUL Dairy to continue additional testing so as to determine how to mix SGP+2.0™ with Sugarcane tops so as to optimize the efficacy of this particular ration.

The IFUS Scientific Team has worked for several years on careful review of scientific studies that support IFUS' claims that SGP+™/SGP+2.0™ contains adequate protein sources for bovine nutrition. As reported by ranchers and dairymen utilizing SGP+™/SGP+2.0™ as part of their Ration Management, three indicators in conjunction

with each other support these claims: Herd Performance, Manure Scoring, and Forage Analysis.

To that effect, a White paper can now be found on the IFUS website at www.impactfusionbrands.com/knowledge/base/. It is titled "SGP+ & SGP+2.0 Formulation Protein Content Rev. 8".

One of many studies shows, "Chemically pretreated (delignified) sugarcane bagasse...shown to contain 22.6% of crude protein." See ([https://doi.org/10.1016/0921-3449\(94\)90007-8](https://doi.org/10.1016/0921-3449(94)90007-8)). IFUS pretreats bagasse with Nutri-Mastic™ and Carob. This pretreatment does NOT use harsh synthetic chemicals. Rather, SGP+™/SGP+2.0™ contains ALL-NATURAL ingredients that are either produced by nature or are found in nature. Scientific studies like the aforementioned overlayed with Herd Performance, Manure Scoring, and Forage Analysis are providing plausible explanations as to IFUS' claims.

Furthermore, a similar effort has been underway to support the claims of ranchers and dairymen that SGP+™ reduces Greenhouse Gas Emissions. This information will be forthcoming.

IFUS remains grateful for your investment and trust in our Company. Our team is back to work to make your company financially profitable. Feed the World!

For our customers of both Intact Digest and Intact Endurance you may now send your testimonials to: mwalther@impactfusionintl.com We can also be reached at 1-800-775-4130 seven days a week.

About Impact Fusion International Inc.

Impact Fusion International, Inc. is in the business of marketing products in the "Health and Wellness" sector of all international markets. It is the company's mission to invent, develop and market these proprietary products worldwide for the health and well-being of humans and animals.
