

FOR IMMEDIATE RELEASE

International Endeavors Corporation cooperate with one of leading building materials suppliers in Australia

United States, July 8, 2025 – International Endeavors Corporation (OTC: IDVV) (“IDVV” or the “Company”) today announced that its wholly owned subsidiary, Modulink Corporation Limited, has signed a Cooperation Agreement in respect of our modular integrated construction (“MiC”) projects with a wholly owned subsidiary of Hume Plasterboard Pty Ltd (“HUME”) on 1 July 2025.

The Cooperation Agreement encompasses joint efforts from both parties, IDVV will lead project planning and modular design. HUME will supply off-site prefabricated MiC using building materials according to the design requirement of IDVV and in compliance with the local building codes. Both parties will collaborate on applying MiC technologies across a range of housing developments, with a shared focus on quality, speed, and sustainability.

The collaboration brings together Modulink’s expertise in modular construction and Hume Plasterboard’s industry leadership, aiming to deliver faster, greener, and smarter solutions for future building projects.

“This partnering is a key step in our strategy to lead the modular transformation in Australia.” said William Fu, CEO of IDVV. “Through close cooperation with Hume Plasterboard, we are confident in delivering innovative, high-performance MiC solutions that meet the evolving needs of the construction industry in Australia.”

About Hume Plasterboard Pty Ltd

Hume Plasterboard Pty Ltd is one of Australia’s leading suppliers of high-quality building materials. With a strong market presence, Hume Plasterboard specializes in interior systems and is committed to driving innovation in the construction industry.

About IDVV

International Endeavors Corporation and its subsidiaries engage in the business of property development by implementing modular integrated construction technology (“MiC”), embedded with our proprietary atmospheric water generators (“AWG”) and property management system by internet of things technology (“IoT”). We believe that these technologies support the development of sustainable and intelligent properties tailored for varieties of markets, including residential, commercial, industrial, and remote or resource-scarce environments.
