Metatron Apps to Add Cronos (CRO) to AI-Managed Treasury, Expanding Cross-Chain Yield Potential and Capitalizing on Growing Corporate Crypto Adoption

The largest Alt-Coin ETF in history with $6.4 billion CRO-backed treasury strategy

DOVER, DE / ACCESSWIRE / September 3, 2025 – Metatron Apps Inc. (OTC PINK: MRNJ), a pioneer in AI-powered blockchain finance and mobile app development, announced plans to add Cronos (CRO) to its planned corporate crypto treasury. This development builds on Metatron's recently announced AI-managed treasury overhaul, the upcoming Solana (SOL) staking program, and the planned cross-chain yield strategy, positioning the company as a leader in digital asset adoption for publicly traded firms.

The addition of Cronos comes amid significant industry news: Trump Media & Technology Group (TMTG), in partnership with Crypto.com and Yorkville Acquisition Corp, has unveiled a $6.4 billion CRO-backed treasury strategy. The funding package includes $1 billion in CRO, $200 million in cash, $220 million in warrants, and a $5 billion equity line. TMTG has separately committed to purchasing $105 million in CRO, while Crypto.com will acquire $50 million in TMTG stock. This announcement fueled a surge in CRO prices, with reported gains ranging from 22% to 160%, making CRO one of the most closely watched assets of the quarter.

Metatron's integration of CRO (Cronos) is intended to complement its existing and planned holdings in Ethereum (ETH), Solana (SOL), Chainlink (LINK), Polygon (MATIC), Avalanche (AVAX), and Aerodrome (AERO). CRO will function as both a reserve asset and utility token, aligned with Metatron's AI-driven approach that optimizes portfolio performance and mitigates risk across multiple blockchains.

Metatron is also preparing for a rapidly evolving regulatory climate. President Donald Trump has signaled support for allowing cryptocurrency investments in retirement accounts such as 401(k) plans, further validating blockchain as a mainstream asset class and driving institutional interest.

"Our goal is to give investors exposure to high-growth crypto assets in a way that's diversified, secure, transparent, and AI-optimized," said Joe Riehl, CEO of Metatron Apps

Inc. “Adding Cronos (CRO) to our planned treasury is a major milestone that positions Metatron at the forefront of blockchain integration and corporate finance innovation.”

About Metatron Apps Inc.

Metatron Apps Inc. (OTC PINK: MRNJ) is a leading developer of AI-driven mobile applications and blockchain finance solutions. With over 1,000 app releases, Metatron is building an advanced corporate crypto treasury platform that integrates real-time AI analytics, algorithmic rebalancing, professional custodial security, and multi-chain yield generation strategies. Investors will soon be able to view real-time portfolio performance through a live dashboard launching next quarter.
