

# ENERGY TODAY CORP. (\$NRGT) ANNOUNCES 2026 TOKENIZATION EXECUTION PLAN FOLLOWING FIRST BOARD MEETING OF THE YEAR

**New York, USA – January, 14, 2026** — Energy Today Corp. (OTCID: \$NRGT) (“Energy Today” or the “Company”) today announced the outcomes of its first Board of Directors meeting for 2026, marking a significant milestone in the execution of the Company’s long-term asset tokenization strategy.

As approved by the Board, Energy Today will initiate the first execution phase of its tokenization roadmap through the development of its proprietary technological platform. To support this initiative, the Company has commenced collaboration with Tokeny, an internationally recognized leader in compliant tokenization infrastructure.

## **Initial Token Launches Focused on Core Hard-Asset Projects**

As part of this first phase, Energy Today plans to launch two initial asset-backed tokens, each aligned with the Company’s primary operating projects:

- Avista Beach Villas & Resort Token – Representing Energy Today’s beachfront real estate development located in the coastal region of Córdoba, Colombia, a region recognized for its natural beauty, tourism potential, and long-term development opportunities.
- Gold Mining Token – Designed for gold-focused investors seeking exposure to the Company’s industrialization and expansion efforts at its gold mine in Remedios, Antioquia, a historically significant mining region in Colombia.
- KavaKoin and GMSacha Inchi Tokens– agribusiness crop projects in Colombia, enabling investors to participate in structured agricultural opportunities while supporting local producers and communities.

These token offerings are intended to provide structured, transparent participation for investors aligned with long-term value creation in real estate development and mining infrastructure.

## **Umbrella Token Issuance Deferred to Align with Strategic Momentum**

The Board has also made the executive decision to postpone the issuance of the Company’s umbrella token, “Parasol,” until a later stage in the tokenization strategy. This decision reflects the Board’s commitment to launching the umbrella token at a time when the Company has achieved greater operational scale, market traction, and ecosystem momentum.

# ENERGY TODAY LAUNCHING NEW ERA OF GROWTH

## **Strategic Focus on Hard-Asset Investment Identity**

Energy Today will further refine its corporate focus in 2026 by prioritizing investments that appeal to structured, well-informed investors with experience in construction, mining, and energy development. This strategic alignment reinforces the Company's identity as a hard-asset investment platform, centered on projects that generate measurable economic returns while creating positive regional and community impact. In line with this positioning, the Company has initiated plans to spin off its leisure and entertainment assets, transitioning the Trillium brand to operate independently within the film and entertainment industry. This separation allows Energy Today to maintain a clear, disciplined investment thesis.

## **Attractive Share Structure and Valuation Opportunity**

Energy Today enters 2026 with a disciplined and attractive share structure, characterized by a low public float and a modest market capitalization. Management believes the Company's current valuation does not yet fully reflect the depth of its underlying asset base, its advancing operational milestones, or its long-term growth potential.

As execution progresses and visibility increases through project development, token launches, and enhanced disclosures, management believes the Company's current valuation represents a compelling opportunity for both existing and prospective shareholders seeking early-stage exposure to growth supported by real, revenue-capable assets.

## **Expansion Into Tokenization Services for Third-Party Assets**

In addition to tokenizing its own portfolio, Energy Today is expanding its strategy to offer tokenization services to select third-party projects, positioning the Company as a targeted investment platform for well-structured external opportunities. Through this initiative, Energy Today will provide qualified partners access to advanced tokenization technology, compliant infrastructure, and the Company's global digital investor network.

# ENERGY TODAY LAUNCHING NEW ERA OF GROWTH

As an initial step, Energy Today will begin the tokenization of \$QEDN agribusiness crop projects in Colombia, enabling investors to participate in structured agricultural opportunities while supporting local producers and communities. This initiative is expected to generate financial returns for investors, deliver tangible regional benefits, and open a new investment channel for Energy Today's platform participants.

Through this expansion, Energy Today evolves from a traditional holding company into a multi-sector, technology-enabled investment enterprise, operating at the forefront of one of the most significant financial innovations of the modern era—the tokenization of real-world assets.

## **Commitment to Transparency, Investor Relations, and OTC Growth**

Throughout 2026, Energy Today will continue strengthening its investor relations and public communications through:

- Timely and consistent reporting
- Regular press releases
- A digital platform designed to maintain open and transparent communication with investors

The Company also reaffirms its commitment to advancing within the OTC Markets tier system, with the objective of achieving OTCQB listing status in the near future.

## **Looking Ahead**

With these strategic initiatives, Energy Today expects 2026 to be a transformative year as the Company aligns capital, technology, and governance to build a platform focused on returns, wealth creation, and meaningful regional impact.

## **Forward-looking statement:**

This release contains forward-looking statements which are subject to risks and uncertainties. Actual results could differ materially. Investors should consider the company's filings and public disclosures for additional information and risk factors.
