

Phase Holographic Imaging AB (PHI)

January 2026

Phase Holographic Imaging AB confirms that the company's bankruptcy filing was approved by the Lund District Court. The company is now formally under bankruptcy administration.

PHI has long operated in the field of non-invasive cell analysis, developing several patented methods for digital holographic microscopy under the HoloMonitor® brand.

As part of the bankruptcy proceedings, the bankruptcy estate is now evaluating strategic options, including the sale of the entire company or parts of the business.

Additional information and inquiries are available on the law firm's website.
