## **XCELERATE ANNOUNCES PROGRESS ON MEDICAL DEPLOYMENT PROGRAM IN AFRICA**

**MAULDIN, SC** - Xcelerate Inc. (OTC: XCRT) today announced that its majority-owned subsidiary, AfiyaSasa Africa LLLC, is currently in discussions with several medical consultants and healthcare experts to support the next phase of the Company's AfiyaSasa Africa initiative. These discussions represent an operational step toward implementing the strategic direction outlined in the Company's recent year-end update, which highlighted plans to explore artificial intelligence-enabled healthcare delivery models in underserved markets.

The next phase of work for AfiyaSasa Africa is expected to include reviewing the capabilities of the AdviNOW Medical system, identifying localization requirements, and compiling relevant clinical data aligned with regional treatment guidelines and pharmaceutical standards. In addition, the Company is evaluating potential consultants who may assist in identifying and assessing suitable clinical locations that could support a future pilot clinic program intended to demonstrate a proof-of-concept deployment. Xcelerate expects that formal consulting agreements will be finalized as these discussions progress and the scope of work for the next phase of the initiative is defined. The Company anticipates announcing finalized consulting agreements related to the next phase of the AfiyaSasa Africa initiative during the current quarter.

Michael O'Shea, Chief Executive Officer of Xcelerate, commented: "In our recent strategic update, we noted that a key focus for 2026 would be moving from planning toward execution for the AfiyaSasa Africa initiative. We are currently engaging with several healthcare professionals and consultants to help evaluate how advanced healthcare technologies such as AdviNOW could be adapted for use in African healthcare environments. These discussions represent an important step as we work toward defining localization requirements and preparing for a potential pilot clinic

Management believes the completion of this evaluation phase will provide important insight into the feasibility, cost structure, and operational framework required for introducing AI-supported healthcare systems in emerging markets.

## ABOUT XCELERATE INC.

In May 2020, Xcelerate commenced implementation of a new business plan that encompasses two separate but related businesses within the medical industry, including (i) owning and licensing the rights to various forms of medical equipment and portfolio of patents, patents pending and technology licenses and (ii) development of virtual health technology to assist patients in developing countries obtain medical care by extending the reach of physicians through the use of that technology.
