

PHOENIX, ARIZONA – (Disclosure & News Service – April 19, 2021) – PetroSun, Inc (OTC PINK: PSUD) The Company announced today that Compania Minera La Meseta, S.A. de C.V. has completed the deeper drilling and analysis at the San Judas I and San Judas II sites covering 259 hectares. Teche Mining LL, a wholly-owned subsidiary of PetroSun, Inc holds a 77.5% equity position in Compania Minera La Meseta.

The Company reported on March 6, 2021 that the San Judas I and San Judas II sites contained an average concentration of 1,550 ppm of lithium contained within an estimated 66,250,000 tons of zeolite clay deposits. The results of the drilling and analysis down to 150 feet upgraded the lithium concentrations to 1,763 ppm contained within an estimated 136,444,240 tons of zeolite clay deposits.

Compania Minera La Meseta and Teche Mining are now planning to enter Phase 1 of the commercialization of the San Judas I and San Judas II zeolite resources. Bulk marketing of zeolite is expected to commence during May 2021. The commercial uses of zeolite include soil reclamation, as an organic soil amendment that increases water retention and nutrient utilization, ammonia filtration for dairy, livestock and fish hatcheries, absorbent for oilfield waste and spills, heat storage for solar energy, municipal wastewater treatment, storm water filtration, swimming pool filter media, nuclear remediation and many other industrial applications.

The Companies will also be entering into Phase 1 of the commercialization of the San Judas I and San Judas II lithium resources. Teche Mining will be involved in the manufacturing and operation of novel processing technology to extract and purify the lithium concentrations contained within the zeolite clays. It is anticipated that the commercial lithium processing phase will commence during early 2022.
