Digital Utilities Ventures, Inc. is working to become a formidable presence in the green solutions marketplace. We have identified strategic opportunities for acquisitions and joint ventures that will allow us to capitalize on existing and emerging opportunities in this industry. Consumers understand the significance of progressing from conventional assets to inexhaustible sources that produce no ozone harming greenhouse gas emissions from petroleum by-products and lessen air contaminants. Enhancing green solutions such as in energy supply and lessening reliance on imported fuels will assist with economic development by increasing occupations in manufacturing, assembling, and that's just the beginning.
