Pedro Blach

Jose Ramon Barañano

HEC-TINA

Spain

Dear Pedro & Jose Ramon,

We have had some excellent discussions, last week and earlier over the past several months, re: “**GREEN ENERGIES**” & “**GREEN HYDROGEN**” Sectors and their ‘Great Potential Opportunities’ especially in India, as clearly manifested and again strongly reemphasized after the recent visit to the **UN** ( viz: ‘**UNGA**’ Address ), **USA** of **Prime Minister Narendra Modi**, where he has specifically mentioned and emphasized the **role of India as a ‘Global Green Hydrogen Production Hub’**.

Through this letter, we would like to confirm the ‘**STING Interest and Intent**’ to enter into a ‘**Formal Collaborative Agreement**’ with **HEC-TINA/ Any other SPV**, to promote and progress these “**Indo – Spanish – USA : ‘Green Energies’, ‘Green Hydrogen’, ‘Green Ammonia’ Production & Global Market Development Opportunities Strategies & Programs**”.

STING are already interacting with the Government in the contexts of :  
“**Convergence@360**” programs for ‘**Digital and Societal Transformations**’ and have considerable experience and knowledge about the entire ‘**Renewable Energies Sectors**’ [ viz : **Country’s first SPV (solar photovoltaic) projects – hybrid lighting pumping systems in villages ; Wind Farms ; Solar Thermal Milk Chilling Plant**] in late 1980’s, when we had also been suggesting to the government of India at the highest political levels – the great potential benefits and indeed ‘future imperatives’ of moving towards major scope and scale ‘Green Energies and Hydrogen Economy’ strategies and (P<sup>x</sup>) programs.

**PM Modi** had in fact recently specifically mentioned about launching the ‘**National Green Hydrogen Mission**’ in his latest Independence Day speech.

As a consequence of the overall **‘STING Vision : Convergence@360’** we are already interacting with the specific and most relevant ministries and agencies including **Ministry of New and Renewable Energy (MNRE)** ; **‘NITI Aayog’** (National Think Tank, wherein the PM is the CEO ); **Ministry of Rural Development** etc. The ‘Partnership, Support and Facilitation’ from these relevant ministries and agencies would be crucial for optimal program implementation and exponential improvement of ‘Program Valuation’ with potential collaborators / investors etc.

### **‘STING : Convergence@360’**

As we have already been comprehensively explaining in our earlier conversations, STING are **‘Orchestrating STING Convergence Coalitions’**, which are entirely oriented towards the promotion and acceleration of the currently massively lagging - yet, critically important, indeed crucial **“Global ‘SDG’ Goals & Objectives : Solutions, Implementation Strategies and their overall associated ‘Local’, ‘Regional’, ‘Continental’ complete Fulfilment Programs.**

STING : Convergence@360 are entirely paradigm-shifting programs for these **“Global ‘SDG’ Goals: Solutions, Implementation, Fulfilment Programs”**, which are proposed to be implemented through **“Public-Private Partnerships”(‘PPP’)** with the Government of India (‘GOI’) : Ministries, Agencies and Public Sector Entities, together with a world-leading “Coalition of National and International Technology and Investment Partners”.

### **Conclusion:**

In these overall C<sup>X</sup> (‘Collaborative Communication Convergence’) Coalitions contexts with the government and potential investors it would be ‘opportunistic and more feasible’ for us to develop an cost effective proposal, especially within the contexts of ‘National Hydrogen Mission’, which was recently announced by the Prime Minister last month as a National Priority Program and would consequently enable ‘substantial support’ from both the government (eg PLI Scheme) and investors, technology partners etc.

In conclusion, as discussed, we need to immediately finalize our own **‘internal collaborative arrangements’** and strategic agreements to most expeditiously pursue this program successfully with both the ‘Government of India’ and also potential Industry ‘Collaborators and Investors’. In these arrangements, we would also need to agree to a reasonable ‘cost sharing arrangement’ for the development of a ‘small dedicated professional team’ (including some highest level professionals and retired bureaucrats as ‘Advisory Experts’) for discussions and putting together and coordinating the relevant proposals with the above-mentioned entities including ‘NITI Aayog’ , ‘PMO’, ‘Ministry of New and Renewable Energy’ (‘MNRE’) etc.

Kindly, message back confirming the earliest feasible ‘Zoom Conference Session’.

Warm Regards

Robin Grewal
