

January 26, 2022

CEO Mark Leonard has announced that Tytan Holdings Inc (TYTN) is in the midst of acquiring Tytan Equipment LLC. Mr. Leonard has been working for two years on developing a line of Dumping Trailers, which he feels meet the quality features that Consumers want, and in a feature by feature comparison, the new Tytan's with shine.

These new Tytan Trailers feature:

- 30" tall walls that can easily be removed
- To swinging rear doors that can also be changed to a single swing gate for dumping gravel etc
- the walls are a thicker material and stronger then seen on the competition
- The dumping cylinder on the Tandem is 2 3/4" in diameter, eliminating a weak point of the lifting like most competitors have.
- The Tandem also has a hydraulic tongue jack that can easily lift a fully loaded trailer off the hitch
- Tires are extremely high quality, 14 ply tires
- The Tytan Trailers all have large storage areas under the dump deck that can handle chains, shovels, chain saws, supplies, etc. and are all out of sight.
- Unlike competitors, the Tytan trailer is built with ample tongue length, so that the trailer will follow smoothly without sway and will not jackknife like others when backing up.

These goods have been tested and at Tytan for over two years and sold to extremely knowledgeable buyers with wonderful responses. CEO Leonard using his experience in being the Largest Boat Trailer Distributor in the US in 1989-90, feels confident this year will bring substantial growth in sales for the Single and Double axle model. One is 6'x12'x30" with one axle and has a carrying capacity of 3T. The other is model is 6.5' x 15.5' x 30" with dual axles. It has a carrying capacity of 6T.

Tytan Equipment current has no debt on its Inventory or products on order. These product lines have had extensive testing and are now ready for increased sales Tytan will be seeking sales at the retail store, from Internet Sales and through Dealer Sales. A full Marketing plan is now underway.

Promotional Brochures will be out soon.
