

## HIRU CORPORATION – 2nd Quarter 2022 Revenue Results

**PHOENIX, ARIZONA – July 21, 2022 (ACCESS WIRE)** – Hiru Corporation (OTC Markets: HIRU), a Georgia corporation, would like to announce 2<sup>nd</sup> quarter ended revenues of over \$2,800,000 USD with a quarterly net profit of \$1,359,005 USD.

The Company posted its 2<sup>nd</sup> quarter ended June 30, 2022, Disclosure Statement with OTC Markets, Inc. which included our Financial Statements and Notes thereto. The Company has had over \$4,600,000 USD in top line revenue during the first two quarters of 2022 with net profits of over \$2,300,000 USD. The 2<sup>nd</sup> quarter top line revenue beat our 1<sup>st</sup> quarter by over \$1,000,000 USD. The Company expects to beat its predicted annual 2022 top line revenue of \$10,000,000 USD at the close of this fiscal year.

Ms. Kathryn Gavin (President and CEO of the Company), states...”We have worked very hard to meet the expectations of our clients and provide proof to them that we can meet all of their water bottling needs on an ongoing basis. We have shown them that we are willing to make major capital investments, on an as needed basis, in our automated water bottling lines to fulfill all their current and requested future needs. These actions have allowed us to solidify our relationship with our long-term clients and attract other large-scale national clients that have requested our co-packing assistance. As such, we are on currently on pace to beat our predicted 2022 revenue expectations by a 50% margin that we previously announced in November of 2021. From a financial performance perspective, we have consistently beaten each quarters revenue expectation for four consecutive quarters while at the same time increasing top line revenue performance in each of these quarters. We fully expect this trend to continue as our long-term clients are steadily increasing their purchase orders and some large new clients, that we have been negotiating with over the past few months, are starting to place large purchase orders as well. We fully expect our 3<sup>rd</sup> and 4<sup>th</sup> quarter top line revenue performance to continue this trend through the end of this fiscal year and well into the future.”

The Company is now reaching its full operational potential which has proven that our decision to dramatically increase our automated water bottling line capabilities last summer was the correct course of action. The Company expects to produce in excess of \$4,000,000 USD for the 3<sup>rd</sup> quarter ended June 30, 2022, and between \$6,000,000 USD to \$8,000,000 USD for the 4<sup>th</sup> quarter ended December 31, 2022. That will result in an annual revenue of between \$14,000,000 USD to \$16,000,000 USD for calendar year ended December 31, 2022.

Ms. Kathryn Gavin (President and CEO of the Company) further stated...”Our co-packing relationship with Alkaline 88 is solid and growing each quarter. We are growing of capabilities to meet their increasing product requirements. We are also continuing to provide product support for the U.S. Border Patrol which we see increasing in the coming months and years. We are also excited to be now working with WaterSourceOne and Walmart in the coming months and years. Our conservative expectations for fiscal year ended December 31, 2023, to be in excess of \$30,000,000 USD in top line revenue. As I have been quoted before, the future of the Company is solid and our continued growth in all areas of our business is exciting to say the least.”

### Disclaimer Regarding Forward Looking Statements

Certain statements that we make may constitute “forward-looking statements” under the Private Securities Litigation Reform Act of 1995. Forward-looking statements include information

concerning future strategic objectives, business prospects, anticipated savings, financial results (including expenses, earnings, liquidity, cash flow and capital expenditures), industry or market conditions, demand for and pricing of our products, acquisitions and divestitures, anticipated results of litigation and regulatory developments or general economic conditions. In addition, words such as “believes,” “expects,” “anticipates,” “intends,” “plans,” “estimates,” “projects,” “forecasts,” and future or conditional verbs such as “will,” “may,” “could,” “should,” and “would,” as well as any other statement that necessarily depends on future events, are intended to identify forward-looking statements. Forward-looking statements are not guarantees, and they involve risks, uncertainties and assumptions. Although we make such statements based on assumptions that we believe to be reasonable, there can be no assurance that actual results will not differ materially from those expressed in the forward-looking statements. We caution investors not to rely unduly on any forward-looking statements.

## **ABOUT US**
